LAND TREATMENT - IRRIGATION RETURN LINE POLICY:
The Projects Committee discussed the current buried return line cost-share policy with regard to the provision which disallows cost-share if the reuse pit collects water from land of more than one owner. The current policy is intended to promote efficient reuse of groundwater by all landowners and to discourage allowing irrigation water to runoff to local streams.

The current policy allows cost-share for a buried irrigation water return line if the "....water impounded in the reuse pit, and subsequently pumped through the return line, is returned to the land from which the runoff occurred, or to other crop land under the same ownership, provided resulting runoff is controlled." Cost sharing on a given installation is only available for the number of feet of pipe necessary to return the water to the head of the field from which it came, not to exceed $2,000
Obermier made the motion (Motion #5) that the current policy on buried return lines be modified as follows: "....water impounded in the reuse pit, and subsequently pumped through the return line, must include water from land owned by the person receiving cost-share, but may include water from other sources. The water must be returned to the land from which the landowners runoff occurred, or to other crop land under the same ownership, provided resulting runoff is controlled." Cost sharing on a given installation is only available for the size of pipe aid number of feet of pipe necessary to return the water contributed by the landowner to the head of the field from which it came, not to exceed $2,000 per system or $3,500 per cooperator per year. Seconded by Ediger. Question called. Motion carried.

AYE: Burke, Ediger, Ehlers, Goding, Hansen, Hermansen, Jackson, Obermier, Oswald, Regier, Sedlak, Siebert, Volkmer
NAY: Anderson, Moore, Reichlinger, Dickinson
ABSENT: None

PROJECT PRIORITIES:  
Representatives from the Cities of Sutton and Aurora were present at the Projects Committee meeting to speak in favor of Projects 02-0705W, Sutton Area Flood Control Study, and 24-11-07W, Aurora Flood Control Dam.

Obermier made the motion (Motion #7) that Project 02-07-05W, Sutton Area Flood Control Study, be moved to priority number seven. Seconded by Hansen. Question called. Motion carried.

Obermier made the motion (Motion #8) to adopt the project priority list as attached. Seconded by Hansen.

Some discussion of various projects followed. Moore asked for clarification of whether Roger Bailey was seeking technical design assistance, financial and construction assistance, or both. Turnbull advised the board that Mr. Bailey's request was not completely clear. Mr. Bailey initially requested planning and technical assistance, but he may be interested in funding assistance from the district.

Moore felt that if Mr. Bailey was simply asking for planning and technical assistance, in order to begin construction himself, that he should be moved up to a higher priority, but if he was asking for cost-share on construction of the dam then that would be a different matter.

Volkmer indicated that in talking with Mr. Bailey he got the impression that he was looking for assistance beyond design.

Hansen stated that his intent in trying to move the project up on the priority list was to provide Mr. Bailey with design assistance, but that if construction assistance was requested at a later date the board would need to reconsider at that time.

Reichlinger was of the opinion that Mr. Bailey is reluctant to commit himself until he has seen the design modifications.

Hansen amended the motion to make the motion ((Motion #9) to move Project 18-9-1W (Bailey Dam modification) up to number 10 on the Project Priority List for the purpose of design. Seconded by Jackson.
Reichlinger felt that even at priority number 10 it would be too long before staff was able to begin work on the design modifications for the dam.

Reichlinger offered another amendment (Amendment #2) to make the motion (Motion #10) to move Project 18-9-1W (Bailey Dam modification) to priority number 5 on the Project Priority List. Seconded by Ehlers. Question called on amendment #2. Amendment failed.

YORK GROUNDWATER RECHARGE PROJECT - PROGRESS PAYMENT - PHASE, I DAM AND SPREADING BASINS:

Staff explained that there is disagreement between the District and Schwisow Enterprises, Inc. about the volume of spoil earthwork to be paid for. The issue to be resolved is the method to be used in determining the volume of earthwork. Steve Seglin, attorney for the District, has advised that all payment for spoil be withheld until agreement is reached as to the pay quantity. Adjustments in the amount of $4,879 have been added to the contract for site clearing and culvert adjustment. In order to adjust the contract for spoil earthwork, a deduction of $18,303.33 should be made. The revised Contract amount and payment due at this time are then computed as follows:

LANDMARK HEARING AND BIOLOGICAL OPINION:
The Nebraska Game and Parks Commission issued a new biological opinion on November 15, 1990 for the Landmark Project. The consultation was requested by the Department of Water Resources as a result of the Landmark Hearing.

The 45 page document says "It is the biological opinion of the Game and Parks Commission that the Landmark Project will jeopardize the continued existence of the Least Tern and Piping Plover." The opinion goes on to say, "The Project will not jeopardize the continues existence of the Whooping Crane, Bald Eagle, Peregrine Falcon, Black-footed Ferret, or the River Otter... it.

The document states that not enough information is available to determine the impact on the Western Prairie Fringed Orchid, American Burying Beetle and the Pallid Sturgeon.

The negative biological opinion will make it more difficult to get a water right granted by the Department of Water Resources. The staff and legal counsel think that the opinion can be challenged.

Hansen made the motion (Motion #14) that the staff seek proposals from consultants to assess the November 15, 1990 biological opinion. Seconded by Burke.

Turnbull advised the board that the hearing on the Landmark Biological Opinion has been set for March 25th and due to the amount of time required for the consultant to review the biological opinion we need to move quickly.

Moore amended the motion to make the motion (Motion #15) to give the Budget, Planning & Legislative Committee the authority enter into a contract with the consultant to assess the biological opinion. Seconded by Burke. Question called on the amendment. Amendment carried.

LINCOLN TELEPHONE SYSTEM:
Lincoln Telephone and Telegraph has informed the district that they are unable to adequately maintain our leased phone system, because parts are difficult to find. We currently pay $88.05 a month for telephone maintenance. That rate will drop to $16.50 a month on January 1, 1991, but maintenance will not be guaranteed. The Manager is shopping for a new phone system. The cost will be somewhere in the range of $8,000 to $10,000. The current system was leased by the prior building owner in 1979.
LIABILITY INSURANCE:
The District has been searching for liability insurance for our dams since July. The insurance company dropped our liability coverage for dams when the general policy was renewed. The following quotes were received for the entire package.

PROPOSAL FOR COST-SHARING ON MODEL AQUIFERS FOR SCHOOLS:
A cost-share program for aiding schools in acquiring model aquifers, similar in set-up to the outdoor classroom or land treatment programs, has been proposed. A budget limit would be set by the
committee and ratified by the board each year.

Oswald made the motion (Motion #20) that the NRD establish a cost-share program to provide assistance to schools that want to purchase a model aquifer(s). The cost-share rate will be 50 percent of the actual cost of the model, not to exceed $200 per model. Seconded by Volkmer.

Reichlinger amended the motion to make the motion (Motion #21) to limit the number of models to one per school district. Seconded by Anderson. Question called on the amendment. Amendment failed.

FENCING AND SEEDING PROGRESS PAYMENT:
Oswald made the motion (Motion #6) that the Upper Big Blue Natural Resources District authorize a partial payment of $16,153.41, $5,674.47 of which is to be held as retainage, be made to B.A.B., Inc. for the fencing and seeding work completed on the York Ground - Recharge Demonstration Project between October 29, 1990 through October 31, 1990. Seconded by Volkmer.

A discussion arose regarding the amount of the partial payment and retainage. It was discovered that the figures were incorrect and needed to be corrected to accurately reflect the amount due the contractor.

Anderson amended the motion to make the motion (Motion #7) to correctly read as follows: "that the Upper Big Blue Natural Resources District authorize a partial payment of $17,948.23, $1,794.82 of which is to be held as retainage, be made to B.A.B., Inc. for the fencing and seeding work completed on the York Ground water Recharge Demonstration Project between October 29, 1990 and October 31, 1990. PROJECTS COMMITTEE MEETING REPORT:
Obermier gave a report on the Projects Committee meeting held November 7, 1990 and reviewed the committee report as distributed.

LAND TREATMENT, IRRIGATION RETURN LINE POLICY:
The provisions of the NRD cost-share policy that disallows cost-share if the reuse pit collects water from the land of more than one owner was discussed. The current policy is intended to promote efficient reuse of ground water by all landowners and to discourage allowing irrigation water to runoff to local streams.

The current policy allows cost-share for a buried irrigation water return line if the "....water impounded in the reuse pit, and subsequently pumped through the return line, is returned to the land from which the runoff occurred, or to other crop land under the same ownership, provided resulting runoff is controlled." Cost sharing on a given installation is only available for the number of feet of pipe necessary to return the water to the head of the field from which it came, not -to exceed $2,000 per system or $3,500 per cooperator per year.

The Board can consider individual circumstances on a case by case basis and can grant a variance from the policy if warranted.

Obermier made the motion (Motion #10) that the current policy on buried return lines not be modified at this time. Seconded by Anderson. Question called. Motion failed.

LAND TREATMENT, NSWCP FUNDS, NEW APPLICATIONS:
Obermier made the motion (Motion #11) that the board of directors approve 14 new applications, which were submitted and reviewed as eligible for NSWCP funds. Seconded by Hansen. Question called. Motion carried.

LAND TREATMENT, NSWCP FUNDS, PAYMENTS:
Obermier made the motion (Motion #12) that the board of directors authorize payment of 2,614.00 on one NSWCP application, which was submitted and reviewed. Seconded by Anderson. Question called. Motion carried.

PROJECT 18-09-OIW - ROGER BAILEY DAM:
A proposal for engineering services to modify the Bailey Dam had been reviewed by the Committee. HWS Technologies, Inc. proposes to provide the required hydraulic and geotechnical engineering for a fee not to exceed $12,273.85. Construction costs would be in addition to engineering costs.

The Committee felt that the structure is operating satisfactorily as is, and that modification to the structure would be solely for the convenience of the landowner, therefore, the landowner should pay the costs associated with modification.

Obermier made the motion (Motion #13) that the Board of Directors authorize modification of the Bailey Dam, Project 18-09-01W, providing that Roger Bailey agrees to pay for engineering aid construction costs. Seconded by Ediger.

Following the motion there was considerable discussion regarding various aspects of the dams design, as well as the possibility of in-house design and the cost and time frame involved for staff to do the required work.

Anderson made the (Motion #14) that the matter be referred back to the Projects Committee for discussion at their December meeting. Seconded by Moore. Question called on the motion to refer to Committee. Motion carried.

PROJECT 28-10-03E - DARGELOH DAM - PROJECT PRIORITY:
Project 28-10-03E is a small dam, approximately 2,400 acres drainage area, which has been on the priority list for at least five years. The landowner is very interested in proceeding with the project. The project design could be done parallel with work on Johnson Creek Site #12 this winter and plans would be ready for spring or fall construction in 1991.
Obermier made the motion (Motion #20) that Project 28-10-03E be moved from priority number 14 to priority number #5 so that design can be completed prior to the spring of 1991. Seconded by Hansen. Question called. Motion carried.

WATER COMMITTEE MEETING REPORT:
Ehlers gave a report on the Water Committee meeting held October 11, 1990 and reviewed the committee report as distributed.
IAMS COMPANY WELL SPACING VARIANCE REQUEST:
The IAMS Company has requested that a variance be granted to allow them to operate their industrial well at a rate exceeding 100 gpm. This well (two in a series) is less than 1,000 feet from two industrial wells owned by CF Industries. CF Industries has been asked by IAMS for consent to this variance.

Rod recommended that no action be taken on the IAMS request until CF Industries has a chance to respond.

DEEP SOIL SAMPLING PROPOSALS:
In August the board authorized the solicitation of proposals for deep soil sampling to supplement information being gathered in the SPA studies and the Mid-Nebraska Nitrogen Management Demonstration Program. The work consists of soil sampling at eight sites across the NRD. Samples will be collected down to the groundwater.

Three proposals were received:
- Geotechnical Services, Inc. $ 6,298.00
- HWS Technologies, Inc.        10,654.00
- Servi-Tech Laboratories 25,250.00

Ehlers made the motion (Motion #6) to enter into a contract with Geotechnical Services, Inc. for deep soil nitrate sampling for eight sites at a cost of $6,298.00. Seconded by Regier. Question called. Motion carried.

SPECIAL PROTECTION AREA VS. MANAGEMENT AREA:
The status of the Department of Environmental Control's SPA study activity was discussed. The Polk/York study has been delayed one year as a result of the rains in July and August which prevented sampling of irrigation wells.

The procedure for establishment of either a Management or Special Protection Area were reviewed. Rod advised the board that if they wanted the option of considering the establishment of a management area in the future, the district staff would need to begin updating the district's Groundwater Management Plan.

Ehlers made the motion (Motion #7) to direct the Water Committee and staff to begin updating the district's Groundwater Management Plan, as time permits. Seconded by Regier. Question called. Motion carried.
AYE: Anderson, Burke, Ediger, Ehlers, Goding, Hansen, Jackson, Moore, Obermier, Oswald, Regier, Reichlinger, Sedlak, Siebert, Dickinson
JOHN LOWE 404 PERMIT: 
John Lowe of Fairmont has applied for a 404 permit. His application includes a request for after-the-fact approval for the silt removal and deepening of an existing pit in a wetland and completion of the project by spreading the excavated material to fill a six-acre cropped wetland adjacent to the pit.

Dennis Schroeder, District Conservationist in Fillmore County, met with Mr. Lowe concerning this application and concerning compliance with the swamp buster provisions of FSA. Dennis indicated that if the 404 application is approved, Mr. Lowe will be entering into a minimal effect agreement. An adjacent six acre tract of land will be converted into wetlands to mitigate the destroyed wetland. This project will allow Mr. Lowe to make use of this pit for reuse of groundwater and will improve water use efficiency and should reduce deep percolations of water and nutrients.

Ehlers made the motion (Motion #8) that the staff be authorized to write a letter of support for the approval of Mr. Lowe's 404 application with the one to one mitigation conditions proposed. Seconded by Anderson. Question called. Motion carried.

PROJECTS COMMITTEE MEETING REPORT:
Obermier gave a report on the Projects Committee meeting held October 15, 1990 and reviewed the committee report as distributed.

CITY OF SUTTON - REQUEST FOR FLOOD CONTROL PLANNING:
Mac Tilberg, City Administrator from Sutton, was present at both the October 15 Projects Committee meeting and the October 18 board meeting to discuss recent flood damage at Sutton due to flooding from School Creek. Mr. Tilberg explained that the City would like to have the District be involved in preparation of a study to determine what measures can be taken in and around Sutton to prevent future flooding of the type experienced this summer; damage from the last flood was estimated to be $150,000.

Typical damages from flooding in Sutton amount to $30,000. Mr. Tilberg also stated that the City is willing to provide political support for the District's study and planning effort and expects to pay for construction of needed facilities if they are determined to be feasible.

No board action is being taken at this time. The Projects Committee has requested staff prepare a proposal for presentation to the City of Sutton. The proposal would outline study alternatives, spell
out responsibilities to be borne by the District and the City and present an estimate of study costs.

**SCHOOL CREEK WATERSHED - REQUEST FOR WATERSHED FLOOD CONTROL PLANNING:**
Mac Tilberg explained that the people in the School Creek Watershed are once again interested in development of a comprehensive flood control plan. He indicated that the City of Sutton and others would be willing to provide political support for such planning if the District would provide the engineering. Mr. Tilberg indicated that there may never be 100 percent support for such an effort; however, he felt that the community as a whole is ready to support the effort.

Obermier made the motion (Motion #9) that comprehensive flood control planning for the School Creek Watershed be reinitiated and that it be placed on the list of active projects. Seconded by Hansen.

Following some discussion, Reichlinger amended the motion to make the motion (Motion #10) to strike the words "School Creek Watershed be reinitiated" and insert the words "Sutton and surrounding areas" so that the motion would read "that comprehensive flood control planning for Sutton and surrounding areas be placed on the list of active projects. Seconded by Anderson. Question called on the amendment. Amendment carried.

**LAND TREATMENT - IRRIGATION RETURN LINE POLICY:**
Kirby Roth, Seward County farmer, was present at the Projects Committee meeting to ask for a variance from the District's policy on buried irrigation water return lines. Mr. Roth requested a variance from the policy provision that does not allow cost-share if the reuse pit collects water from the land of more than one owner. The Projects Committee explained to Mr. Roth that the reason for the policy is to encourage efficient reuse of groundwater by all landowners and to discourage allowing irrigation water to runoff to local streams.

The current policy allows cost-share for buried irrigation water return line if the "...water impounded in the reuse pit, and subsequently pumped through the return line, is returned to the land from which the runoff occurred, or to other crop land under the same ownership, provided resulting runoff is controlled." Cost sharing on a given installation is only available for the number of feet of pipe necessary to return the water to the head of the field from which it came, not to exceed $2,000 per
system or $3,500 per cooperator per year.

Obermier made the motion (Motion #11) that the Projects Committee reconsider the portion of the buried irrigation return line cost-share policy which limits cost-share to only those installations which return water to land under the same ownership from which it came. Seconded by Hansen. Question called. Motion carried.

PROJECT 18-10-1W - ROGER BAILEY DAM:
Roger Bailey was present at the Projects Committee meeting to request engineering and cost-share assistance in revising the design of the dam. The dam was designed by HWS Technologies, Inc. and was constructed by the District in 1979. Mr. Bailey has requested that the structure be modified to allow the principal spillway riser to be elevated approximately 5 feet in order to store more water. Staff explained to Mr. Bailey and the Projects Committee that the structure is operating satisfactorily as it is. Any modification of the structure would require recalculating spillway capacities, evaluation of emergency spillway soils, preparation of plans and specifications for the proposed work and construction supervision. The Department of Water Resources will require plans and specifications approval prior to construction.

No board action is being taken at this time. The Projects Committee directed the staff to discuss the matter with HWS Technologies and NDWR to determine the extent of work required and potential for liability to the District.
YORK GROUNDWATER RECHARGE PROJECT - PROGRESS PAYMENT - PHASE 1 - DAM AND SPREADING BASINS:
Obermier made the motion (Motion #14) that payment of $7,330.62, $733.06 of which is to be held as retainage, be made to Schwisow Enterprises, Inc. for work completed in September 1990 on Phase of the York Groundwater Recharge Project. Seconded by Ediger. Question called. Motion carried.

PLUM CREEK WATER RIGHT:
Mike Jess, Director of Water Resources, issued an order on the Plum Creek (Gosper County) water rights on 9-24-90. The order dismisses applications A-16041 and A-16636 for failure to show progress and failure to comply with prior directors orders. The applications were jointly filed by the Upper Big Blue NRD, The Platte River Whooping Crane Habitat Maintenance Trust, and Central Nebraska Public Power and Irrigation District. The general manager recommended that no appeal be filed. The other parties are not interested in pursuing the case either.
Hansen made the motion (Motion #21) that the board of directors let the dismissal of the Plum Creek water right applications A-16041 and A-16636 stand by not filing any appeals with the Department or with the Nebraska Supreme Court. Seconded by Burke. Question called. Motion carried.

**PRAIRIE BEND/TWIN VALLEY:**
Steve Seglin and the manager attended the Twin Valley show cause hearing held October 9. The final date to file legal briefs on the Twin Valley (81) case is December 21, 1990. At the hearing the manager and attorney learned of a new filing for water rights by the Twin Valley Association.

The new filing for Twin Valley (A-17026) is dated October 5 and calls for the use of stored water from Kingsley Reservoir with a diversion on the J-2 near Lexington.

Hansen made the motion (Motion #23) to authorize legal counsel to file written objections to the recent Twin Valley application (A17026) at the discretion of the general manager. Seconded by Moore.

Turnbull advised the board that there had been considerable activity in the short time since the Committee met, resulting in other filings on the Platte River.

Moore amended the motion to make the motion (Motion #24) to strike the words "Twin Valley application (A-17026)" and insert "Platte River applications." Seconded by Goding. Question called on the amendment. Amendment carried.

REQUEST FOR CHANNEL CLEARING - HAMILTON COUNTY:
The district has been requested by the City of Aurora and Hamilton County to undertake channel clearing on Lincoln Creek. The Projects Committee felt that channel clearing would be requested for all major streams and their tributaries if such a program were initiated, and that the district could not afford such a program. As a result, the Projects Committee recommended that the board of directors deny the request.

Obermier made the motion (motion #11) that the board of directors deny the request from the City of Aurora and Hamilton County for channel clearing on Lincoln Creek. Seconded by Anderson.

Hansen amended the motion to make the motion (Motion #12) to insert the words "cost-share" to make the motion read as follows: "that the board of directors deny the cost-share request from the City of Aurora and Hamilton County for channel clearing on Lincoln Creek." Seconded by Anderson. Question called on the amendment. Amendment carried.

The question was raised regarding whether or not anything was currently being done to prevent further building within the flood plain. Turnbull advised the board that the district does not have the authority to restrict building in the flood plain, and to the best of his knowledge nothing is currently being done by either the City of Seward or their zoning board to restrict development in the flood plain.

Reichlinger made the motion (Motion) that the Upper Big Blue NRD reserves the right to refuse cost sharing on damages to any construction built after this date (9-20-90) in the 100-year flood plain as considered in this study. Seconded by Anderson.

There was considerable discussion regarding the wording and intent of the motion. There was also disagreement regarding the actual location of the flood plain boundaries. Chairman Dickinson ruled that the motion be referred to the Projects Committee for consideration at their October meeting.

BUDGET, PLANNING & LEGISLATIVE COMMITTEE MEETING REPORT:
Hermansen gave a report on the Budget, Planning and Legislative Committee meeting held September 13, 1990 and reviewed the committee report as distributed.

PLUM CREEK RESERVOIR:
Turnbull briefed the board on the status of the joint Plum Creek water right application. A prehearing conference was held by the Department of Water Resources on September 5. The Central Nebraska Public Power and Irrigation District, The Platte River Whooping Crane Habitat Maintenance Trust, and the Upper Big Blue NRD advised Mike Jess, Director of the Department of Water Resources, that they wish to proceed with the project, and asked for 90-120 days to coordinate with federal agencies (USBR and USFWS). As of September 20, 1990, no decision had been issued by the Department.

Hermansen made the motion (Motion #15) to approve supplemental Platte River Model work by Boyle Engineering for the Plum Creek water right applications, with the total cost not to exceed $7,000. Seconded by Volkmer. Question called. Motion carried.

WATER COMMITTEE MEETING REPORT:
Ehlers gave a report on the Water Committee meeting held June 12, 1990 and reviewed the committee report as distributed.

ADAMS COUNTY WELL SPACING VIOLATION STATUS REPORT:
Rod reported that he had spoken with Scott Harmon, operator and grandson of Mildred Harmon, concerning the replacement well that was drilled 914 feet from Askey Farm's well. Mr. Harmon was asked to discuss the situation with Jim Askey and see if he would provide the NRD with a written notice that he had no objection to the location of this well. Rod also spoke to Mr. Askey to get permission to survey. He did not register any objection to the location of the Harmon well. Rod later spoke to Ralph Condon of Nunnenkamp Well Company and he indicated that Jim Askey had told him that his well was a poor well and he might want to replace it and move 150 feet west, which would solve the spacing problem.

FLOW METER SPECIFICATIONS:
DeBuhr reviewed the district flow meter specifications. Ehlers made the motion (Motion #8) to adopt district flow meter specifications as submitted and reviewed. Seconded by Ediger. Question called. Motion carried.

WHIP PAYMENTS:
Reichlinger called the board's attention to the fact that only 12 of 21 cooperators were listed on the attachment to the Education & Parks Committee minutes of the June 13th committee meeting. A page was inadvertently left out when the copies were run. The point was also made that there would be no change in the total dollar amount previously approved as a result of this error. A complete list had been presented to the Education & Parks Committee for their review at the June 13, 1990 committee meeting.

Moore made the motion (Motion #19) that the board vote again to authorize payment to the cooperators whose names were not included on the list attached to the minutes. Seconded by Reichlinger. Question called. Motion carried.

Water Committee Meeting Report:
Committee Chairman Larry Moore gave a report on the Water Committee meeting held May 15, 1990 and reviewed the committee report as distributed.

Eastern UBBNRD SPA Study Report:
Jeff Gottula of the Department of Environmental Control gave a slide presentation of the Eastern Upper Big Blue NRD Special Protection Area study results. DEC made three recommendations as a result of the study.

A. No recommendation for designation of a Special Protection Area should be made until SPA studies in UBBNRD are completed. A more complete understanding of the extent and nature of contamination within the entire UBBNRD will result in a more informed SPA action plan that is consistent with conditions in the entire district.

B. UBBNRD should increase sampling of representative wells with the goals of increasing the understanding of the extent of contamination both geographically and stratigraphically.

C. UBBNRD should begin to inventory land use practices and quantities of fertilizers and pesticides applied on the Goehner Upland and in the District.

A public hearing is scheduled for June 5, 1990 at 7:30 p.m. in the Seward Civic Center to receive public comment on the study and recommendations.

Moore made the motion (Motion #9) that the district present testimony at the June 5th hearing, as presented to the board. Seconded by Ehlers. Question called. Motion carried.

WELL SPACING VIOLATION:
Rod reported that on August 7, 1989, replacement well G-6403 was drilled in the SW 1/4 NW 1/4 of Section 12-T8N-R9W, Adams County. This well was registered with Department of Water Resources on January 8, 1990 and a copy was sent to the NRD with the first quarter well registration
report in April.

In plotting well locations on aerial photographs this well appears to be less than 1,000 feet from well No. G-69678 in the SE 1/4 NE 1/4 of Section 11-T8N-R9W, Adams County. A preliminary field check confirms that the wells are approximately 920 feet apart.

Rod informed the board that since the May 15th meeting he has reason to believe that yet another well, which is unregistered, may be involved. Rod thinks what has happened is that the original well No. G-6403 is about 500 feet north of the replacement well that violated spacing. However, the well they replaced was only about 30 feet from this well. There was an intermediate replacement well drilled that was never registered. The legal aspects of this are somewhat complicated. Rod plans to conduct a field survey of both well, with the owners permission. He will take any findings to the Water Committee.

CONTROL AREA REGULATIONS HEARING:
Moore made the motion (motion #10) that the changes to the Control Area Regulations considered at the Public Hearing be adopted and forwarded to Mike Jess at the Department of Water Resources. Seconded by Anderson. Question called. Motion carried.

RUNOFF/FORMAL HEARING REGULATIONS:
Moore made the motion (Motion #11) that the public hearing be held for consideration of changes to NRD Rule 3 (Runoff) and NRD Rule 4 (Formal adjudicatory hearings) prior to the July 19, 1990 board of directors meeting. Seconded by Ehlers. Question called. Motion carried.

Orval Stahr: Well, very briefly all we wanted to do tonight is give it one final shot to see if there's anything that can be done. Basically our concern is whether there is any way to build the thing cheaper. Karl is here because I think there's some concern, from your side, about the size of the structure.

Jay Bitner: Well, I'm really not prepared to go over any detailed cost, but our current cost estimate is $110,000.00, based on the latest discussions with the county. And as far as I'm concerned, that's where we left it.

Doug Dickinson: That's basically where we left it in committee.

Jay Bitner: Yes, and we haven't really taken a look at reducing the top width or any of those items.

Bob Ehlers: Mr. Chairman, there's one way that I haven't heard suggested yet, and that's to put the dam back to it's original specifications, with a 28 foot roadway, and proceed from there.
Bruce Anderson: That's the catch, the wide top is what's got us in trouble.

Orval Stahr: I have a question in looking at some of the other dams the NRD has built. Why can't we build a dam half the size?

Bitner: I can answer that. I think Karl probably knows as well as I do at this point. Karl and I sat down with the Department of Water Resources and went over the requirements for dams. Where to set the top of dam, how to size the spillway, and how we did our design work for the Kaliff. Karl do you have any disagreement with what Lou and I covered with you?

Karl Burmester: No, I don't have anything against that. I just think there are some ways, that we discussed that day, of making the overall structure smaller. However, at that time you felt that if it was any smaller it would cease to hold water, and that's not what the NRD was in business for. We're kind of at that instance in that we can make it smaller than what it's designed for now, but will it do what everyone wants it to do with a smaller structure.

Jay Bitner: That's right you could make it smaller by decreasing the conservation pool. As I relayed to Karl, and I think Lou would confirmed that, if you're going to build the dam, at least at this NRD, our concept has been to store as much water as you can in the process. I didn't see that as an alternative.

Orval Stahr: If you're looking at it from the county's side, if our intent is to try to preserve the water, it appears to me that we can't be spending twice as much money as it would take to replace a bridge with a box culvert. I just don't think the public would go along with that. If we can reduce the size, granted we'll be storing less water, but isn't storing less water better than storing no water?

Bob Ehlers: The same philosophy holds true with our board. To start with, any road dam is much more expensive than a dam out in a field to hold the same amount of water. That's why we have shied away from road dams the past several years, because for the dollars spent, you don't get the holding capacity. It's been our thinking that if the amount the county would save could be chipped in maybe it would be feasible. But in this case, due to the increase in the size of the roadway it's no longer feasible. We still haven't heard an explanation why this dam has to be 34 feet wide on top.

Orval Stahr: Well the answer to that is basically very simple, and Karl can correct me if I'm wrong. As far as the road standards that we have to design to, when we put in a new structure, we've got to have 28 foot of roadway width. That's why we're out here spending several hundred thousand dollars a year replacing and widening bridges. We just finished a project where we put a new deck on the bridge for one simple reason and that was to get the big equipment off of the Gresham Road and Thayer Road, where they were getting run off the road, and onto a gravel road. They have to have that kind of width. It doesn't make sense to me to put in a roadway that is substandard in terms of the design standards that are dictated to us by the state.

Perry Reichlinger: The same philosophy would apply to a dam. If you can't build half a road how can you build half a dam? We've got state requirements as well, as Jay just pointed out to you.
Board of Director’s Meeting

Orval Stahr: To my knowledge, there is no requirement that we design to a 100 year flood. Why not a 50 or a 25 year flood?

Jay Bitner: There is a requirement. Design standards for the flood frequency that you design to are set by the Department of Water Resources. And it does include more than a 50 year storm for your top of dam, it's in excess of a 100 year storm at top of dam. Isn't that correct Karl?

Karl Burmester: Yes, I agree with that. I also agree with the fact that we've got a 48 inch tube and we could absolutely look at a 60 inch tube. We could also look at lowering the height of the tube inlet. There are a number of things that we could do to reduce the size of the dam and lower the cost. And to say that the county's requirement of a 34 foot top is the only reason that we're looking at $120,000 is ridiculous.

John Turnbull: I just want to clear something up from both the county and district perspective. I don't think either one of us, as groups, are really arguing with the other agency's design requirements. I think what we're trying to decide is whether or not there is a way to build the structure, with this NRD board's concurrence, with a smaller conservation pool so that the overall structure can still meet state and federal road design standards and still meet state dam safety standards and be constructed for less money. Right?

Jay Bitner: We looked at two cost estimates that came close to doing those things that you're talking about. We looked at one cost estimate that had zero conservation storage, essentially, would have the flood control required for the dam safety, and that was about $85,000. We also looked at a dam that would have the same conservation storage that we planned for the structure we currently have designed, it had a narrower top when we originally started, that also was $85,000. So I guess the question is where between those alternatives, and where we are currently at in the design, do you want to pick the dam. Anything in between is going to be somewhere between $85,000 and $110,000 no matter how you cut it.

Orval Stahr: Well is it possible to put in a larger tube and have a lower dam?

Jay Bitner: It's possible, but I don't recommend that, strictly from the design consideration in terms of scour on the downstream side. A 60 inch culvert would be fine, but when you build the head up on the inlet side of that for flood control and take the discharge on the downstream side your scour would be too excessive. I wouldn't personally design it that way.

Karl might, but that's just a difference in opinion between engineers, personally I wouldn't do that. And we covered that concept the day that Lou was out here too. His suggestion was that we take a look at a 48 inch concrete pipe instead of corrugated metal, because of a smoother barrel and higher discharge, but that's expensive. That's more expensive than what we've chosen.

John Turnbull: By about $50,000.

Jay Bitner: Yes, as a matter of fact, the day Lou Kubicek was out he brought along a sample design that he'd done for the Papio NRD. If you recall that Karl, it was exactly the same size watershed, same number of yards, same size pipe and everything, and that was $157,000. So I don't think the
cost is out of line for what we're trying to do. I think that the problem is that when you combine the road standards with dam building standards, the cost is high.

Charles Kaliff: When this dam was first started it wasn't near that high; they ballooned it up. Every time they go out and survey it, and put the stakes where the water's going to be, it keeps going higher. Now they've got it so darn high that if it were clear full I'd have water in my basement. And I've got my house right on top of the high ground. I can't see raising it 20 feet. That would be as high as the telephone posts out there. This thing has gotten clear out of proportion. You can have a nice looking dam, but not something that looks like Lake McConaughy in North Platte. It's a good site for a dam, but not what they've designed to build. That's just completely out of sight.

Jay Bitner: Well if it came right down to it the best site for the dam would not be on the road, it's actually upstream from the road. And you would have a considerably smaller structure than what it would take to build a road dam.

Orval Stahr: Why is that?

Jay Bitner: Mainly because the top width would be narrower and it would be quite a bit shorter. Probably about a third or half the length that a road dam would be. And the other thing is that you could put an emergency spillway around the west end of the structure which would lower the top. Not only that, but the county could put a culvert in instead of a bridge, and I think probably the whole thing could be done for somewhere in the range of $85,000. That includes the replacement of the bridge. But my understanding is that that wasn't acceptable to everybody concerned, as far as location.

Norman Obermier: What kind of dollars are to talking about spending?

Orval Stahr: The current estimate for what it would cost to replace the bridge structure with a box culvert is right at $30,000. What the county had agreed to previously was that we would pay 30% of the project cost, up to a maximum of $30,000. What nobody, including anybody on the county board, had thought of, was what it was going to cost to install the guardrail. When you add that cost, the gravel, and the initial $10,000 that was requested, how do you justify that to the folks out there paying the bill?

Norman Obermier: You built two structures up our way, I don't see a guardrail on them. Why do we have to have a guardrail here?

Orval Stahr: I'm not sure that the ones that were built shouldn't have them. We know there's the possibility we could have to tear them out.

Norman Obermier: Run that by me once more.

Orval Stahr: If I understand the law correctly, any kind of structure like that must be approved by the state department of water resources.
Jay Bitner: That's correct.

Orval Stahr: Those were not approved to my knowledge.

Norman Obermier: Well as far as I can see they'll be there a long time.

Orval Stahr: This brings up part of the issue that people out there are asking. If those are going to be there a long time, and they were built for an estimated cost of under $30,000, then why do we have to spend $110,000. That's the central issue.

Bob Ehlers: Orval, didn't you just answer that? There is the possibility that they might have to be torn out because they were not built to specifications.

Orval Stahr: I don't know if the county knows. I guess the reason that was done, and we were able to do it that way, was because we didn't meet the standards. Now the county, in my opinion, will bear full liability for both downstream problems, as well as the structure itself.

John Turnbull: Let me explain a procedural thing to you board members. About 60 days ago, you made a board motion suspending all activity on the Kaliff structure. If you as a board decide you want to do something to try to resolve the issue with York County, the first thing you need to do is reactivate the project. And then you need to decide what you want to do from there.

Larry Moore: Even if we walk away from it that doesn't change the requirements they're going to have to met. Granted, they've got a couple of dams east of here that don't meet Department of Water Resources standards, but I don't think York County is going to continue to make that a policy; are you Orval? I would assume now that you are aware of the problem, any future dams that you are involved in will meet the standards of the Department of Water Resources.

Orval Stahr: What that says is, as far as the current board is concerned, and if you look at the tax payers situation, there won't be any road dams.

Larry Moore: I live in Butler County and I have two road dams. One has a 28 foot top. If the county approached me for another road dam, while I've enjoyed a lot of conveniences with these, I don't think I'd be very interested because of the guard rails, the drawdowns, and all the other things the old dams don't have. After looking at both of mine for over 20 years, road dams -just aren't worth it. You just can't afford them; that's all there is to it.

Orval Stahr: The question came up about design requirements for a 100 year flood. Why?

Larry Moore: I don't write the rules. I asked the same question and discovered I wasn't going to get an answer that satisfied me anymore than it satisfied you. I think you'd just as well put in your box culverts and try to convince the landowners to put the dams upstream off the road. You can get by with a cheaper culvert down below. The dam normally costs less because of the difference in the width. Jay alluded to the emergency spillway, you can cut an emergency spillway up in the field around the edge and that helps reduce the cost of a dam. Try an cut an emergency spillway in a road
an make a nice square dipsy doodle. It isn't long before the maintenance crew is out there cutting that thing down on both edges and smoothing it off.

Orval Stahr: It doesn't have to be a nice square dipsy doodle.

Larry Moore: When you start cutting emergency spillways across the right-of-way, emergency spillways are a lot bigger than most people think they are. That's a big hole you've got to cut. That's all yardage that's got to be moved.

Merlin Volkmer: You alluded to our 100 year storm requirement and why we had to have it so high. Well why do you want 34 feet? Because those are the rules. You have to obey the rules.

Orval Stahr: Even if there was no rule, the citizens out there are telling us they don't want any more narrow bridges. They can't get the equipment through.

Bob Ehlers: I'm speaking as an individual now. I feel this board would consider any design that York County would bring to us, see if it met design requirements, and go from there. The last piece I read in the paper said you were going to discontinue all negotiations with the NRD. Has that changed since a week ago Tuesday?

Orval Stahr: That's a fair question. I think the board reaction to your request that morning was a frustrated way of saying no we're not going to pay more than we bargained for. In the interim Karl has worked with John, Jay, etc., we've tried to explore every option to see if there is a way that the county can support the NRD in their efforts and vice versa. If we can conserve water we should be doing it. If the county can do that, without spending a fortune in the process, then we should do that.

Bob Ehlers: Those are exactly our same goals.

Karl Burmester: I also think that the other party involved needs as much say as either one of these two boards, and that's Mr. Kaliff.

Bob Ehlers: I agree with that.

Orval Stahr: Maybe there is a way if we use a little common sense. Maybe we can design it so we don't need guard rails. Then we don't need 34 feet top width. We may have to design to a 50-year flood. If the standards are such they are precluding both bodies from accomplishing our objective then maybe we need to look at the standards.

Jim Jackson: I haven't been on the board very long; and I would move that we at least talk to them, but from what I've seen of the figures for the cost of road structures, it's a lot of money for no more than we get.

Jackson made the motion (Motion #2) to talk York County about the Kaliff Dam. Seconded by Hansen.
Perry Reichlinger: I have a question. What is the effect of the motion?

Does it nullify the motion made at the previous Meeting? Or is this a completely new start? What happens to the $5,000 we spent, outside of staff time, to this point?

Hansen: As I would interpret this motion, Mr. Chairman, those are some of the things we could talk about.

Perry Reichlinger: The intent of the motion is not to reactivate the project then?

John Turnbull: No, just to discuss the possibility.

Bob Ehlers: I'm reluctant to spend more staff time unless we have something concrete to work with, because the staff is busy. We've offered something concrete. My suggestion is that the county offer something concrete, like the design of a dam that would suit your purpose, and we would have to see if we concur. Question called on the motion. Motion carried.

PROJECT 21-11-03E - PLUM CREEK FLOOD PROTECTION:
As directed by the board of directors in March 1990, the staff has obtained proposals for reconnaissance level engineering for the Plum Creek Flood Protection Project at Seward. Engineering firms that were invited to submit proposals were E.A. Engineering and Olsson Associates; both firms are located in Lincoln. After reviewing the proposals and discussing the level of effort proposed by each firm, the staff recommended that Olsson Associates be selected. Obermier made the motion (Motion #4) that the district hire Olsson Associates to prepare a reconnaissance level study of various flood protection plans, outlined in the request for proposals dated March 19, 1990 and updated April 3, 1990, for a fee not to exceed $33,400. YORK GROUNDWATER RECHARGE PROJECT - PHASE IV

Phase IV (on-site water distribution system and water treatment plant) is currently in the design phase. Water treatment plant ELECTRO-COAG filtration system, ultraviolet disinfection unit and pug mill have been selected for this project. The time required for manufacturing the selected equipment is 120 days; therefore, staff is requesting authorization to purchase the process equipment at this time to allow for installation this summer. Bitner gave a presentation to the board describing the system and how it works.

Obermier made the motion (Motion #8) that the board of directors authorize staff to purchase the selected ELECTRO-COAG filtration system, ultraviolet disinfection unit and pug mill for a cost of $90,100, plus taxes and shipping. Seconded by Volkmer. Question called. Motion carried.

Donna Rasmussen, Becky French and Rod Rudebusch, representatives from the Aurora Chamber of Commerce, addressed the board regarding Project 24-11-7W (Lincoln Creek) and requested that the board keep the project on the priority list. They stressed the importance of this project to the City
of Aurora and surrounding area for water recharge, recreation and flood control. They were advised that the project is currently 5th or 6th on the priority list.

WATER COMMITTEE REPORT:
Moore gave a report on the Water Committee meetings held April 10th and 19th and reviewed the committee reports as distributed.

On April 10, 1990 the district received an order from the Department of Water Resources denying the changes to the Control Area Rules and Regulations. The denial is based on Chapter 7, Paragraph 06, which requires annual reports for groundwater users, other than irrigators. According to the order, this provision does not meet the equity standards established by 46-666 (4).

Chapter 7, Paragraph 06 reads as follows: "No later than March 1st of each year, the owner of an industrial, municipal, recreational, wildlife, livestock, poultry and other wells shall report the amount of groundwater withdrawn from each such well during the preceding calendar year to the district."

The committee considered three alternatives at their April 10th meeting. These alternatives were (1) keep existing regulations; (2) add irrigation wells to Chapter 7, Paragraph 06; and (3), delete Paragraph 06 from Chapter 7. The April 10th recommendation from the committee read "No later than March 1st of each year, a groundwater user shall report the groundwater use from each well he or she controlled for the previous calendar year to the district. Groundwater use may be reported in gallons or acre inches. (Acre inches are preferred). Said report shall also include the method used to determine the groundwater use."

After being contacted by committee members, some of whom were not present at the meeting, expressing dissatisfaction with the proposed alternative, Larry Moore, Water Committee Chairman, scheduled another Water Committee meeting for April 19th to further discuss the matter.

The committee recommendation forwarded to the board for consideration April 19th read as follows: "To rescind the committees action of April 10, 1990 and amend Chapter 4, Paragraph 5 to read as follows: "When the district groundwater level falls to a level that is 2 feet above the 1978 level, the district shall issue a public notice warning all groundwater users that groundwater use restrictions will be implemented if the district groundwater level falls below the 1978 level and require that no later than March 1st of each year, each groundwater user shall report the groundwater use from each well he or she controlled for the previous calendar year to the district. Groundwater use may be reported in gallons or acre inches. (Acre inches are preferred). Said report shall also include the method used to determine the groundwater use." And delete Chapter 7, Paragraph 06 and change the effective date of the control area regulations to July 1, 1990."

After reading the committee recommendation, Moore offered it in the form of a motion (Motion #10). Seconded by Regier. Question called. Motion carried.

HIRE 4TH ENGINEERING TECHNICIAN FOR THE SUMMER:
Bob Jurgens, one of the three district engineering technicians will quit working for the district August 21, 1990. He is returning to school full-time to work on his degree. It is necessary to replace him as soon as possible. The district normally hires new 2 year college graduates for technicians. With the next class graduating in May,- the manager recommends hiring someone from that class and having 4 technicians until mid-August. The district now has an engineering technician student employed by the district for a work study quarter from Southeast Community College. Funds are available in the budget to fund a temporary position. PROJECTS COMMITTEE REPORT:
Committee Chairman Norman Obermier gave a report on the Projects Committee meeting held March 5, 1990 and reviewed the committee report as distributed.

PROJECT 21-11-03E SEWARD FLOOD PROTECTION - PLUM CREEK:
Obermier advised the board that Larry Wentink, Roger Anderson and Roger Grunke, representatives from the Seward Chamber of Commerce, were present at the committee meeting to request a higher priority for the Seward Plum Creek Flood Protection Project. The representatives from Seward cited the main reasons for flood protection along Plum Creek are 1) to provide for future development along Plum Creek; 2) provide for emergency vehicle access east of Plum Creek during floods; 3) reduce flood damage to existing residences and businesses along Plum Creek; and 4) provide recreation along Plum Creek.

Currently the Seward Plum Creek Project is number 3 on the priority list behind the York Groundwater Recharge Project (#1) and Kaliff Dam (#2). Project priorities #1 and #2 currently demand most of the available staff time. If work on the Plum Creek Project is to be accelerated at this time the services of a consulting engineer are needed.

Obermier made the motion (Motion #3) that the board of directors authorize staff to request proposals from consulting engineers for the purpose of conducting a pre-feasibility study of alternative plans for providing flood protection along Plum Creek at Seward. Seconded by Volkmer. Question called. Motion carried.

PROJECT 31-10-02W - KALIFF DAM - AGREEMENT WITH YORK COUNTY:
Committee Chairman Obermier advised the board that Karl Burmester, York County Engineer, and Orval Stahr, York County Board Member, were present at the committee meeting to discuss the increase in project cost due to county and state road design top width requirements. Initial project cost, for a structure built on the road, was estimated at $85,000 based on a 26 foot top width. Current cost estimate is $110,000 based on a 34 foot top width. Other design alternatives for locations off the road were presented by the staff.

It was the committee consensus that York County should pay a larger portion of the cost since much of the cost increase is due to road design requirements. Staff was directed to re-negotiate the agreement with York County and request they pay 30 percent of project cost, not to exceed $40,000, subject to Kaliff's contributing an additional $5,000 toward project cost.

Turnbull advised the board that he had met with the York County Board both before and after the Projects Committee meeting. He asked them to increase their limit in the agreement from $30,000
to $40,000 to remain at 30% of project cost. At the end of the first meeting, they tabled action until Tuesday, March 20, 1990. At the second meeting, the county board took action rescinding the agreement. The reason being that they only wanted to spend $30,000 in bridge replacement costs at that site.

If the county would remove the limit and agree to 30% of project cost, their share would be $33,000. Mr. Kaliff has verbally agreed to contributed $10,000 toward the project if it is built on the road. This would leave the district share at $67,000, which would have been the cost of the dam as originally designed, off the road. Turnbull recommended that based on this information the board suspend Project 31-10-02W.

Burke made the motion (Motion #4) that the Upper Big Blue NRD Board of Directors suspend Project 31-10-2W. Seconded by Regier. Question called. Motion carried.

LAND TREATMENT - SPECIAL REQUEST:
Maynard Miller, Polk County, owns a 40 acre tract of land with an irrigation well. Miller rents an additional 40 acres from - the Ester Rambo Trust which Miller irrigates using his well. Miller has requested authorization to construct an irrigation reuse pit on the Ester Rambo Trust property.

Obermier made the motion (Motion #7) that Maynard Miller be authorized to apply for cost-share on an irrigation water reuse pit to be constructed on property owned by the Ester Rambo Trust. Seconded by Volkmer.
Volkmer asked about the length of Miller's lease on the property. Turnbull advised it was a yearly lease. It was noted that Miller has farmed the property for approximately 20-25 years. Bob Schneider, who is the land manager for the Rambo Trust, contacted the district to see if the board would approve such an application. Ehlers expressed concern about whether or not the property was being taxed as irrigated land. There was some discussion about whether or not this application was in line with district policy. SOLID WASTE MANAGEMENT:
The UNL Extension Service is conducting a series of meetings for communities on future requirements for solid waste management. Some communities are still unsure whether or not they will have to address the new EPA regulations. The committee consensus was that the district not tell the communities what to do, but rather provide assistance to the communities to accomplish what they want to do. The district will wait until the extension service meetings are complete before
proceeding with assistance.

COMMUNITY TREE RESOURCE PROGRAM:
The board was presented with the second draft of the tree resource program. Several changes were made by the committee.

Hansen made the motion (Motion #23) that the board of directors adopt the Community Tree Resources Program as amended. Seconded by Burke. Question called. Motion carried.

EXECUTIVE COMMITTEE REPORT:
Vice Chairman Ray Burke gave a report on the Executive Committee meeting held March 22, 1990 and reviewed the committee report as distributed.

ATTORNEY FEES:
Burke made the motion (Motion #24) to approve payment of $3,473.65 to Crosby, Guenzel, Davis, Kessner & Kuester for Steve Seglin's work through February 20, 1990. Seconded by Anderson. Question called. Motion carried.

OUT-OF-STATE TRAVEL:
The Executive Committee authorized Rod DeBuhr to travel to Casper, Wyoming April 17-18 to speak at the Wyoming Association of Conservation Districts Convention.

NACD CONVENTION - DIRECTOR EXPENSES:
Ed Ediger requested reimbursement of $782.35 for out-of-pocket expenses for travel and lodging while attending the NACD Convention. Travel & lodging expenses for the other directors who attended were charged directly to the district. His request does not include per diem.

Burke made the motion (Motion #25) to approve payment of $782.35 to Ed Ediger for his expense of attending the NACD Convention. Seconded by Hansen. Question called. Motion carried.

EQUIPMENT PURCHASE - RECHARGE PROJECT:
Burke advised the board that staff requested approval of the purchase of weather station equipment for the York Groundwater Recharge Demonstration Project. The equipment is necessary to gather the data for the recharge study.

Burke made the motion (Motion #26) to approve the purchase of metrological equipment for the York Groundwater Recharge Demonstration Project from the Qualimetrics Company for $2,1519.65 and from the Forestry Supplies Company for $2,451.35. Seconded by Hansen. Question called. Motion carried.

EQUIPMENT PURCHASE - TRACTOR HYDRAULICS:
The district has on several occasions considered purchasing a deep soil probe for soils investigations. Deep soil sampling is necessary in the Nitrogen Management Demonstration Program, as well as initial investigations for project sites. The SCS has recently loaned a deep soil probe to the district. The staff has considered modifying the soil probe to mount on the tractor 3 point hitch for utilization of existing district equipment. However the tractor does not have remote hydraulics, which are necessary to operate the soil probe. The staff recommended the expenditure of $2,500 to upgrade the tractor hydraulic system.

The Executive Committee directed staff to investigate the purchase of a new tractor instead. The reason being that add-on equipment is more trouble prone and the cost is not recoverable.

FINANCIAL STATEMENT:
Burke made the motion (Motion #27) to approve the financial statement and budget report as of February 28, 1990; to make payment of the accounts payable and approve the expenditures for publication. Seconded by Regier. Question called. Motion carried.

YORK GROUNDWATER RECHARGE PROJECT - PHASE V AGREEMENT
An agreement between the district and York Cold Storage was presented to the Projects Committee. Terms of the agreement are as follows:
   a. The district can use up to 300 gallons per minute of cooling water discharged from York Cold Storage at no cost to the district
   b. The initial term of the agreement is five years. The agreement can be extended for an additional five years at the district's option

Obermier made the motion (Motion #7) to authorize the district to enter into an agreement with York Cold Storage, subject to the terms reviewed and accepted by the committee, for the purpose of obtaining 300 gallons per minute of cooling water from York Cold Storage. Seconded by Anderson. Question called. Motion carried.

PROJECT 31-10-02W (KALIFF DAM; YORK COUNTY) - AGREEMENT
An agreement between the district and York County was presented to the board for approval. The purpose of the agreement is to define the terms necessary for York County and the district to cooperate in construction of a road dam to replace a bridge along the south line of Section 31, Township 10 North, Range 2 West of York County.

Obermier made the motion (Motion #9) to authorize the district to enter into an agreement with York County, subject to the terms reviewed and accepted by the Projects Committee, for the purpose of constructing Project 31-10-02W. Seconded by Anderson.

After some discussion of possible land rights complications due to transfer of lands between the Burlington Railroad and adjacent landowners the board decided to refer this agreement back to the
Projects Committee for further review.

Reichlinger made the motion (Motion #10) to refer the matter back to the Projects Committee. Seconded by Burke. Question called. Motion carried.

An agreement between the district, Charles L. Kaliff and Janet Kaliff was presented to the board for approval. The purpose of the agreement is to define the terms necessary for the district to construct a dam without public access on the Kaliff property located in Section 31, Township 10 North, Range 2 West of York County.

Obermier made the motion (Motion #11) to enter into an agreement with Charles L. and Janet Kaliff, subject to the terms reviewed and accepted by the committee, for the purpose of defining the terms under which Project 31-10-02W will be constructed and operated. Seconded by Burke.

Following some discussion, it was the consensus of the board that the district not enter into the agreement with the Kaliffs until the agreement with York County is settled. Volkmer made the motion (Motion #12) to refer the matter back to the Projects Committee. Seconded by Regier. Question called. Motion carried.

DISTRICT ROAD DAM POLICY
The Projects Committee reviewed the second draft of a policy to be used for administering a program of cost sharing with counties, or the state, on road dams to replace bridges and culverts when the county or state would design, construct, own and operate the road dam. A copy of the policy was forwarded to the board of directors for adoption.

Obermier made the motion (Motion #13) to adopt the Road Dam Cost-share Policy as reviewed and accepted by the Projects Committee and made a part of these minutes. Seconded by Anderson. Larry Moore expressed concern about the fact that there was no provision in the policy for inspection by the district to guarantee that Nebraska Department of Water Resources design specifications were met.

There was also concern expressed that the district would not hold the water storage or use rights on these structures. Ehlers made the motion (Motion #14) to table the matter. Seconded by Hansen. Question called. Motion carried.

WATER COMMITTEE REPORT
Moore gave a report on the Water Committee meeting held February 6, 1990 and reviewed the committee report as distributed.

CONTROL AREA RULES AND REGULATIONS
Moore made the motion (Motion #15) that the board adopt revised draft 8(final draft) and forward it to the Department of Water Resources. Seconded by Anderson.

Chairman Dickinson asked for comments on the regulations.
ANDERSON: "Yes, I've got a lot of comments but at the rate we're going here today I don't know whether I should make them. First I want to compliment the Water Committee for all they've gone through; I'm not a member so I guess I can speak as an outsider. They've backed off on this, and put in that, taken out that, and I guess as you can see from the committee report, that last go around we had options in there. That seemed to create more problems, and what we actually did then was lose sight of the original goal of what we had a control area for. So we took the options out, both for the farmer and for the city. And the way we've got it set up now, Larry mentioned, it goes to the Department of Water Resources so what we do today won't etch it in stone I assure you. And even if he goes ahead and agrees mostly with what's in there, it's still not final in reality. The founder of all of this, Maurice Kremer, was laid away 8 days ago. It was his dream when he set up this ground water control area. I can remember when that was going on it wasn't easy... I met with Kremer going into the legislature almost every Sunday and he was trying to gather information. He told me at that time, if you believe it isn't serious business, they damaged one of his wells, but what concerned him the most was that they threatened his family, especially his wife. So you see what we're dealing with here is serious business. But I guess in view of this, I can't think of a better thing that we could do in the memory of the founder of all this than to adopt these rules and go on ahead. In other words, I guess what I'm saying is that, it's time we stand up and be counted.

VOLKMER: I'm a little bit concerned. When we had our public hearing most of the farmers that I talked to were well pleased with the set aside reduction for several reasons; now we've knocked it out. I don't feel we've given these people any time or notice of what we've done this time. To me we've totally changed the program and I really don't know if we should be doing this without another public hearing.

LASH L. CHAFFIN, LEAGUE OF MUNICIPALITIES: I'll keep this very brief. Those were very thought provoking words Mr. Anderson. I would like to be on record in opposition to the final draft and the League of Municipalities position is well documented in that we supported the two option system for municipalities. Hopefully with two goals in mind, those being that municipal governments and the district maintain the regulatory power within their jurisdictional limits for their customers and secondly that there be some recognition of the existing conservation programs that they've taken through the years. And that primarily being those who have extensive metering within their jurisdictional boundaries for their customers. Does anybody have any questions?

BURKE: On Rule 5, Chapter 14, Paragraph 02 which reads "Within 120 days after implementation
of this chapter the municipal user shall adopt an ordinance that allows the municipal
user to require water conservation practices and restrict the water use of its customers." What's your
opinion on that?

CHAFFIN: Okay, I forgot about this, it's been awhile since I looked at these. Actually I think "an
ordinance" may not be the correct language. Municipalities are set up in probably a half a dozen to
a dozen different ways, some of which have the authority which you are envisioning without an
ordinance. Some municipalities have what's called a board of public works and a board of public
works has vested certain authorities, either the city council or the village board to take care of those
matters. And some municipalities may be able to take care of that type of concern through the actual
contract with each individual water user. I have no problem with the concept, if in fact there is a
need, an urgency in the district, to reduce water use, if you can show that part of that need is
municipal water use, in fact the municipalities, do go ahead and undertake some kind of
conservation measures at that point. I guess I'm not really opposed to that concept, we all have to
share in hard times. I do have some problems with the language itself. An ordinance is the ultimate
form of a municipal law and this can probably 'be taken care of at a different stage and for some
municipalities
probably a more appropriate stage in their municipal government.

BURKE: What would be an appropriate word to put in place of ordinance?

CHAFFIN: You might put in legal mechanism, or rule and regulation or administrative procedure.
I believe we suggested something to the staff at some point; some convoluted legal type sounding
language.

ORVILLE DAVIDSON, CITY OF YORK: I think we suggested administrative procedure.

BURKE: "user shall adopt an ordinance", it kind of bothered me as to what that really meant.

CHAFFIN: It bothered me a little bit too because I guess 'you wouldn't want the city council telling
you to adopt a certain law. The forms of government probably shouldn't be telling each
other what they have to do. What good does it do for the city council to pass a law if that law is
being written by another board? It really takes away from the power you have. You 'have certain
powers vested in your board and they have powers vested in their board. And I know how mad we
get when the state, and you guys probably have the same situation, dictates to us exactly how a city
has to pass an ordinance. I'm sure it's just as frustrating for you when the state or federal government
tells you exactly how you have to do something.

MOORE: I think, and I'm glad Ray pointed it out, that when the committee was thinking ordinance
we weren't really thinking in that narrow a sense of the word. We could have just as well said
administrative procedure, because a mechanism was what we were really wanting--a mechanism to
do this.

CHAFFIN: Okay.
MOORE: I'm glad Ray brought it up because it is a galling point that you're raising, but it wasn't the intent of the committee to be that narrow in their scope on that, it was to get a procedure of some sort into the city's regulations.

CHAFFIN: Okay, I appreciate that too.

ANDERSON: Your point is well taken, it really is.

CHAFFIN: I don't have any problem with the concept itself, we all have to share if there's a time of problems. Some of the cities represented here may have some individual wording problems with the final draft that I'm not aware of. I do ask you to give them a chance to talk.

MIKE BAIR, CITY OF AURORA: I'm Mike Bair, with the City of Aurora, and we too appreciate Mr. Anderson's words regarding Senator Kremer and his efforts in the past. On page 5-16 you'll find Chapter 12, Article 15. It says "The district will consider variances in instances where Nebraska Department of Health regulations governing municipal water supply systems conflict with these rules and regulations." It looks to me like there's potential there that if we're in conflict with Department of Health or in conflict with EPA and we're in conflict with your rules and regulations, we're getting placed in between a set of different regulations. Do we obey yours and disobey theirs'? It would seem to me that perhaps the district should consider allowing variances in instances where Department of Health regulations governing our actions are coming into conflict with your rules and regulations.

EHLERS: Explain to me what the conflict would be.

BAIR: I have no idea at this point what it might be, but we're setting your rules and regulations to be supreme to the Department of Health rules and regulations, or at least you have that possibility with current wording.

TURNBULL: Well, again, I don't think it was the board or committee intent to do that.

DEBUHR: I'm not sure that it does that. It leaves the judgement of whether or not there is a conflict up to the district. It doesn't leave that up to anybody else to decide, it's this board's decision.

BAIR: And if there is a conflict

DEBUHR: Obviously, if there is a conflict, you grant a variance, but somebody has to make that determination.

BAIR: As long as there's a record of what the intent is I guess we can accept that. Perhaps my next comment comes not: as a city administrator but as a geologist, having worked in that: profession, and received a degree in the same. As I look at the map from your more recent publication (BLUEPRINT) I see a wide variance in what's happening in groundwater levels as we look over this whole district. It's apparently gone from raising feet in some areas to dropping 20 feet in others during a 1 year period. That's really not a criticism as much as perhaps a question, and perhaps a
question that should be asked of staff later, but maybe just raised at this time. The complexity of where we get our water -- it is not a homogeneous aquifer that we have. There is some question even in my own quarter, where one of my wells is located, we're probably in a different water source that the well a 1,000 feet away from us. Because of depth and clay barriers that exist according to the gamma ray neutron logs that we have on our wells. So my question really is... "when you look at the average of such a broad diverse area is there relevance back to any one locality?" If the southern half has dropped significantly, the northern half is raised, but the average, because of the statistical accumulation of the two, would reflect that we might reach a trigger mechanism, when half the district has actually gone up. I'm sure you've given a lot of consideration to that, it's just really a question that I have that has lingered in my mind.

TURNBULL: Let me give you an answer for that, that doesn't address the technical side, but it addresses it from the board's point of view. When we first wrote regulations for the control area back in 1978 we went through the same process that we've been going through here for the last two years trying to sort out what we should do. I'd recommended at that time that we have a particular date that we choose that we would begin allocation of groundwater. It didn't make a difference what the date was, just pick a date. Then when that day came the meters would go on and allocation would begin. The board in no uncertain terms told me to go sit down in the corner and be quite, that that wasn't the way that would be accepted by the public in general. There had to be some mechanism set up to offer the public, the citizen at large, a chance to try to control the groundwater declines themselves. At that point we arrived at the way of a foot and a half decline over a three year period as a way to begin allocation. In other words, if we exceeded that historic rate then we would begin allocation. Then we had an average, that you've commented has been calculated over a number of years district-wide, that showed a significant rise in the water-table and then in the last year and a half we've seen rapid decline begin to develop off the peak. The board then felt that there should be something other than that rate of decline mechanism in order to begin allocation, so it was decided then to use the average amount based on the earlier 1978 level. So it really doesn't address what you're talking about, and that is a particular well with specific geologic conditions, or varying conditions around the district, but rather a political way of trying to set up some fair way of controlling groundwater, of beginning the actual controls.

BAIR: That answers my question.

EHLERS: I'd like to make it clear too that there has been more than one board member all along feel that there should be specific regulations for specific areas, so far they haven't been successful.

BAIR: I suppose an analogy might be that if you had a glass of water and I had a glass of water and if you drank all of yours and I didn't touch mine, statistically it's half empty.

EHLERS: Well, yes, I agree with you. I happen to be one of those board members that feel there should be specific regulations for specific areas, but so far I haven't prevailed.

SEDLAK: I just want to ask Rod how the readings are checked for groundwater levels. These little squares on the map on the back of the Blueprint, are those townships?
DEBUHR: Yes, those are townships. The groundwater district measures wells twice a year. The rules and regulations are based on spring readings. There are some 600 or so irrigation wells that are measured annually to compile those averages. And those numbers, I am not sure, I think he's probably using the fall map there, but basically that's an average in those townships of the wells in that township that were measured. When we calculate for the rules and regulations we use a computer program that weights the value of each well according to the area it represents. In other words, some wells are closer together than others, so if you had measured 10 wells in an area where you had a big decline, and only 1 where you didn't, if you just used a straight average it would skew the number clear off one way. So we weight those according to area that they represent.

SEDLAK: How many wells do you use in each township; does it vary?

DEBUHR: It varies somewhat, Mark may know a range.

MARK NANNEN, BLUE RIVER ASSN. OF GWCD'S: We always try to have at least 6 to 10 in each township. 8 would be a good average.

SEDLAK: They're all active irrigation wells?

NANNEN: Yes.

DEBUHR: All the ones that they measure are. In the calculations we also use observation wells that the state has, there are about a dozen I think.

NANNEN: They're all measured at approximately the same time every year; within 2-3 days depending on weather of course. Normally the spring readings start the first of April, and we usually get done in April, so they're as close to the same day as they can be.

Burke amended the motion to make the motion (Motion #16) to strike the word "ordinance" and insert "administrative procedure" in Rule 5, Chapter 14, Paragraph 02. Seconded by Anderson. Question called on the amendment. Amendment carried.

The Chairman recognized Orville Davidson's request to address the board.

ORVILLE DAVIDSON, CITY OF YORK: I'm Orville Davidson, representing the City of York. The City of York would like to go on record opposing the final draft before you today. There are a few things that I would like to discuss with you. Certainly we've been debating this issue for two months now and I'm not sure we've proceeded very far. We've certainly gained from the experience, I think, hopefully we have a better understanding of the problem that the irrigators face and I hope the irrigators have a better understanding of the problem that the municipalities face. I've made a few calculations based on some of the information received or handed out by the NRD that I would like
to share with you. It just kind of helps put in perspective the significance of the municipal use of groundwater. Within the district it appears that about 61% of the population is from within municipalities. Looking at York specifically, our consumption for 1989 amounts to about the same as a well pumping 1,140 gallons per minute on a 24 hour a day capacity. And that's a relatively insignificant amount when you consider that there are in excess of 10,000 irrigation wells within the district. If you look at the district-wide municipal use it appears that there are about 7,300,000 gallons per day consumed at the municipal level, which would equate to about 5,666 gallons per minute of necessary pumping capacity to serve the total needs of the municipal user. And again, if we look at the total irrigation wells in the district, and the figure I'm using is 10,490, those wells pumping at 700 gpm would pump more water than what the municipalities in the district would use in a 6 hour period.. So I think that kind of helps bring it into perspective as to the significance of the municipal use. It really is a very, very small part of the overall use of groundwater within the district. Some inequities that I see in the draft as proposed, again in Chapter 6, page 5-9, in Paragraph 04, the cities and villages are encouraged to require meters for customer services and it's stated that is to increase the awareness of the volume of domestic use. It seems inconsistent that in 03 that we would not recommend or encourage the similar use of meters for irrigation users. I can't help but believe that the volume of the use is irrigation use and there needs to be an awareness of that also. And it would seem that maybe metering would be one way to increase the awareness of the volume of irrigation use as well as increasing the awareness of volume of domestic use. In Chapter 7, there appears to be yet another inconsistency in that in 06 all uses are required to report the annual groundwater withdrawn to the NRD with the exception of the irrigation use. Now again, it seems that it's probably very important for the district to have the total use of all groundwater within the district, I think it would be extremely important to know the amount of groundwater withdrawn from within the district for agriculture uses. As far as Chapter 14 - Allocation to Municipal Users, we favor the option of 1.02. I'm wondering about 03, if that section should not be stricken completely, and if that should not be a function of the NRD rather than place yet another burden on the municipalities that is not generally shared by other users in the district. As far as implementing the water conservation information and education program, certainly that's something that we do, but to make an additional requirement seems a little bit redundant and seems as though maybe it's isolating that type of requirement to a single user. That concludes may comments.

BURKE: Isn't irrigation use reporting required in the draft?

TURNBULL: Once the 1978 level is reached, and allocation is required, then ag use is required to report, but not until that point. The way this regulation is written is that other users have to report now, regardless of what level the water is at. That's a carryover from the old regulations.

EHLERS: They've operated under that regulation for the past twelve years. And if they hadn't had that regulation you wouldn't have those facts and figures that you're talking about.

DAVIDSON: We would have them, but you wouldn't.

EHLERS: A lot of them came from here I would imagine. And as far as this last item you objected to, that doesn't take effect until allocation is in effect over the whole district.
OBERMIER: Okay, Mr. Chairman, Rule 5, Chapter 6 - Efforts of the District. I'm a little puzzled. We go down the line to 03 outlining what we're to do and one item is control runoff from center pivot irrigation. I see nothing in here to control runoff. Have we eliminated this entirely?

DEBUHR: What do you mean; from gravity irrigation?

OBERMIER: Yes.

DEBUHR: The very first one (03.01) Install and use irrigation reuse systems.

OBERMIER: It doesn't say you can't have runoff.

EHLERS: That's against state law.

TURNBULL: Well we also have a separate set of regulations that govern irrigation runoff. They're completely separate of this. Whatever you do with this set of regulations has nothing to do with irrigation runoff regulations, they're completely separate.

FRED SCHEELE, WACO, NEBRASKA FARMER: At this meeting today, if it's passed, it will be allocation for the farmers; is that right?

EHLERS: No.

SCHEELE: Nobody handed me a sheet so we sit here kind of dumb.

TURNBULL: I'll explain it real briefly to you. Somebody want to pass that around to him. We've got a copy of the draft coming. The draft that we're talking about says that if the groundwater levels, as an average across the district, drop to the 1978 levels then we will require meters and allocation for ag users; for all users. But specific to your question, it will require allocation of water for irrigation.

SCHEELE: That would be finalized today? The farmers don't know a thing about it. A fellow called me about 12 o'clock.

EHLERS: Oh yes, farmers know about this.

SCHEELE: No farmers know about this.

TURNBULL: This is the same procedure that we talked about back in that special meeting in August, and also at our public hearing on December 14, 1989.

SCHEELE: I realize that but I believe the farmers should be notified if we're going to do this. You have a legal notice, I realize that.

TURNBULL: Let me explain the rest of the procedure for adoption to you so you understand that
part. Before any change can happen the board needs to adopt a set of regulations. It may be these, or they may decide something else today. When they do adopt a proposed change then we have to submit that to the State Department of Water Resources. The department then has the authority to call for another public hearing, and I suspect that they will, but it will be in Lincoln and it will be a short hearing. It won't be as extensive as we had here. After that's completed then the department will probably consult with the Attorney General's Office to see if these fit under state statutes. Then they will come back to us and say they're going to approve them as written or they come back and say they won't accept anything, or they may come back and accept parts and recommend changes.

SCHEELE: I think it would've been kind of nice if you'd notified the people in the newspapers what this meeting was pertaining to.

EHLERS: I have to disagree with you, and we don't very often disagree, but I've got to disagree this time. I made the mistake of going to the Waco farm sale yesterday and I found out there are a lot of farmers who know what's going on. And before I got out of there I was pretty firmly told that if there were no regulations on the cities don't expect any cooperation from the farmers. And this wasn't from one or two, but a dozen. Anil I went to a meeting the other morning in Bradshaw, a chemical meeting, and basically I was told the same thing by three or four farmers, so I feel that most farmers are informed on this. Because we've been working at it since 1986 to make this change and the change came from the grassroots, it didn't come from this board. It came from outside of this board. And the old rules and regulations have been there since 1977, and most farmers know about those. I have to disagree with you.

SIEBERT: John, would you want to explain to him what the rules are if we don't approve this.

TURNBULL: The current set of rules and regulations now in effect, and have been in effect since 1979, say that if our rate of decline exceeds an average of one half foot a year for a three year period then we will call for meters in one season, and allocation the next. Last time we had spring measurements, which was taken in the spring of 1989, we had in excess of a three foot drop. The year before that was a rise, but when you add those two together, this spring's condition has to be six tenths of a foot rise or greater, or the board will be forced to call for allocation and meters this summer under existing regulations. And that set of regulations, the only thing it requires of municipalities is that they report their annual use.

SCHEELE: I don't think you've done a very good job controlling runoff. I'm for saving water, there's nobody hear more in favor than I am. I've put in alot of pits to keep my water and reuse it. But I've got water running through my farm that I'm ashamed of. It's not my water. But I haven't seen much control of runoff. I go to Henderson to go get peaches and I see water running. I go south to the next county south and the county north and heres water running; highway ditches are full. That's not controlling runoff.

TURNBULL: Would you call us and tell us specific legal descriptions so we can do something about it?
SCHEELE: We've got a guy that's paid to look at that.

TURNBULL: Will you call us and tell us?

SCHEELE: No! Because you know what your neighbor says? "You're a bad man."

TURNBULL: Do I have to be the bad man? Why can't you help me? Let's both wear the black hat. We'll follow up on that.

MOORE: As far as Fred and his family, I know their operation and they do a good job a good job irrigating, they've taken care of their runoff water. But as far as getting the word out, I don't take alot of papers, but I know the York paper has covered this pretty consistently, especially the last 6 months -- since early last summer. They've followed us pretty close; kept a pretty consistent series of articles coming on it. I've seen it in the Butler County paper. I know there's been at least one article in the Nebraska Farmer about our considered changes., In fact, I think it was just in the last month that there was an article by Don McCabe. And our own publication, that's inserted in papers across the district, has been trying to keep people informed. So I think that we've made an effort, I'm sure we haven't reached everybody, but I've sure caught enough devilment about it that somebody heard about it. I'm like Bob, if there's anything that's been driven into me, it was two things in our area. One, that people in our area did not like option 2, because they thought it just didn't do what the rules and regulations should, and two, they felt that if the farmers, even though they use the majority of the water, were asked to observe regulations, municipalities should have some restraints put on them. And I don't feel the regulations, as proposed, are real galling for municipalities. We set perimeters for how much water the municipality can use, we've got a provision for asking for additional water, we've got a provision if they annex more 'Land they've got a way to take the allocation and change it, if industry comes in, there's provision for industry to ask for water. And all we're saying is stay within this limit, use it anyway you want to. We've got provisions for emergency use., We tried to allow for the event of a fire; if they're a small town and furnish water to rural fire department and they haul it all over the country, and that can be more than some people realize at times, in a town the size of Surprise probably one fire takes a two year supply for what people in town use. we've tried to allow for that. I think we're pretty close to about right. The farmers are about half sore and the cities are about half sore, we must be about where we ought to be.

SCHEELE: Everybody wants to control everybody, but don't control me.

MOORE: You got it right, Fred.

SCHEELE: I think we're going to run out of water. I don't care what we do, I think it's going to come, and that's my honest opinion. I've been here quite awhile and I hate to see it, don't think I don't. Whenever you get a malted milk and you put one straw in it lasts quite awhile. You put ten in it, it goes down kind of quickly.

JACKSON: I have a question. As a new board member I'd like to say I supported this kind of action a long time ago. I have no information as to whether you have conducted studies on how long
this will prolong the life span of our aquifer. Have you got any projections?

DEBUHR: We do have studies, Jim, and I could get you copies of those. Whether you'll believe what you read or not; it's the best information available.

EHLERS: The main reason they wouldn't believe them is because they were all proven wrong by this rise.

DEBUHR: And that's another reason that the district has gone through this amendment process, because 10 years ago everything predicted a decline. All the modeling, all the work, and then just the opposite happened for a period of years, which no one predicted. So that's probably the major reason for making these changes.

JACKSON: I'd like to make one more comment. I realize a lot of farmers are going to be upset but I hope they realize it (metering) is one of the best public relations things they could ever do because when Orville gets up and says we (the municipalities) use this much water, if we (the farmers) could come back and say this is how much we're actually using, I think we'd have money well spent for public relations on what we're doing. We'd better be finding ways to get by with less.

DEBUHR: I have a request. I'd like the board to consider a motion to make a change on page 5-12. John discovered a loophole when he went to work one day to figure out exactly what our well spacing rules were. In Paragraph 01 it says "A new well must be located at least one thousand feet from any other well under ownership". I would request that you change that to read "A well constructed after the effective date of these rules and regulations must be located at least one thousand feet from any other well under different ownership". The reason for striking the word "new" and adding that language would be that we discovered that if a replacement well were being drilled, where the original well was more than 1,000 feet from someone else's well, he could actually move to within 600 feet of that well, according to state law. And we did not have any provision for that. We said only new wells were subject to 1,000 foot spacing, not new and replacement wells. So if you strike the word "new" and add the language regarding the effective date that means all wells then would have to be located 1,000 feet from any other well. With the exceptions that are listed in Paragraph 02 and so on.

Moore amended the motion to make the motion (Motion #17) to strike the word "new" from Rule 5, Chapter 9, Paragraph 01 and insert language to make it read "A well constructed after the effective date of these rules and regulations must be located at least one thousand feet from any other well under different ownership". Seconded by Burke. Question called on the amendment. Amendment carried.

NANNEN: Just as a point of information, was the main reason for dropping the acreage reduction option to make it consistent with other parts of the draft?

TURNBULL: Yes.

SCHEELE: Question. You irrigate pasture with a tow line and you've got a pond and you use water out of there. If it doesn't rain you use your irrigation runoff. What do you call that; irrigated land or dryland?

TURNBULL: If I was you I'd call that irrigated land.

SCHEELE: But if it rains it doesn't need to be irrigated.

TURNBULL: But if it doesn't rain and it needs water, you're probably going to need that allocation to protect yourself.

SCHEELE: I just didn't know what you called that.

TURNBULL: That question came up several times in committee discussion. And I think the final decision was that if the individual was willing to call it irrigated land and have it assessed as irrigated land on that pasture then it would be allocated water.

HANSEN: These regulations call for allocation on surface water?

TURNBULL: As I understood what he was saying he was talking about groundwater recirculation of some type. If you're going to keep it strictly as surface water, in other words whatever runs off the watershed, then this whole set of regulations does not apply. But if you're going to run groundwater through the system then they do apply.

HANSEN: If the groundwater you're catching isn't your own, once it's entered the public drainage of the watershed, then it's surface water.

TURNBULL: I think you and I and Rod need to sit down after the meeting and answer some of your technical questions.

Moore called for the question on the original motion as amended, which would read as follows:
"To strike the word "ordinance" and insert "administrative procedure" in Rule 5, Chapter 14, Paragraph 02, and to strike the word "new" from Rule 5, Chapter 5, Paragraph 01 and insert language to make it read "A well constructed after the effective date of these rules and regulations"
must be located at least one thousand feet from any other well under different ownership." and to add to Rule 5, Chapter 6, Paragraph 03 an additional item, number 03.11, that would read "Encourage installation of flow meters." and that the board adopt the revised draft 8 (final draft) and forward it to the Department of Water Resources. U.S. FISH AND WILDLIFE SERVICE MINIMAL EFFECT DENIAL
The U.S. Fish and Wildlife Service has rejected a minimal effect agreement for two irrigation reuse pits located in Section 24, Township 11 North, Range 2 West, York County. In a letter dated December 4, 1989 the Service contends that "to place two reuse pits in farmed wetlands would have adverse impacts on adjacent Rainwater Basin Wetlands. The Spikerush Wildlife Management Area (WMA), owned by the State of Nebraska, is most likely to be impacted by the reuse pits." Moore made the motion (Motion #9) that the District request the U.S. Fish and Wildlife Service to reconsider the Minimal Effect Agreement for the two irrigation reuse pits located in Section 24, Township 11 North, Range 2 West, York County, Nebraska. Seconded by Burke. Question called. Motion carried.

CONTROL AREA REGULATIONS
Moore made the motion (Motion #10) to adopt Draft 7B with the January 9, 1990 committee changes, as reviewed, for presentation to Mike Jess. Seconded by Oswald.

Lash L. Chaffin, Utilities Coordinating Manager with the League of Nebraska Municipalities was present and read his letter of January 18, 1990. Copies of that letter, and his letter of December 12, 1989, are attached to these minutes. The main concern Mr. Chaffin expressed, as far as regulations pertaining to municipalities, was that Draft 7B only required metering of wells pumping in excess of 100 gpm and not individual users. He argued that this takes away the municipalities power to set up a priority system for the water they distribute. Orville Davidson, Director of Public Works for the City of 'fork, summarized his letter of January 16, 1990, a copy of which is attached to these minutes. He voiced his concern about the proposed change in the trigger method, as well as Option 2 for category 2 groundwater users. He felt municipalities should also have another option available to them. He expressed a desire to see Draft 7B returned to committee for further review, and possible changes. Mike Bair, City Administrator for Aurora, addressed the board briefly and expressed the City of Aurora's willingness to work with the District. He was in agreement with both Mr. Chaffin and Mr. Davidson that municipalities should have authority over how the water was allocated.
within each community.

Moore amended the motion to make the motion (motion #11) to adopt Draft 7B Amended. Seconded by Ehlers. After considerable discussion Regier made the motion (Motion #12) to send Draft 7B back to the committee for further review and direct the committee to report back to the Board at the February meeting. Seconded by Hansen. Question called. Motion carried.

LANDMARK WATER RIGHTS
Turnbull advised the board that on December 16, 1991 Mike Jess, Director of the Department of Water Resources, issued an Order of Denial for the Landmark Project water rights applications. The Upper Big Blue NRD has 30 days from the date the Order was issued to file an appeal with the State Supreme Court, should the District decide to pursue the matter.

Turnbull recommended to the board that they schedule a special board of directors meeting to decide whether or not to appeal the Directors decision.

Moore made the motion (Motion #2) to hold the January budget committee meeting on the 8th at 9:30 a.m. and a special board of directors meeting at 2:00 p.m. to discuss the Landmark Project water rights applications. Seconded by Ehlers. Question called. Motion carried.

**LATE WELL PERMIT**

Reichlinger made the motion (Motion #13) to approve a late permit for an irrigation well in the NE ¼ of Section 10, Township 7 North, Range 3 West, Fillmore County, Nebraska owned by Martin E. Lauber. Seconded by Hansen. Question called. Motion carried.
BUDGET, PLANNING & LEGISLATIVE COMMITTEE MEETING REPORT
Moore gave a report on the Budget, Planning & Legislative Committee meeting held December 12, 1991 and reviewed the committee report as distributed.

PROPOSED LEGISLATION - NEBRASKA GROUNDWATER QUALITY ACT
Draft legislation on water quality was reviewed. The draft included:
A. Five cents per pound fee on active ingredients in pesticides paid by the distributor
B. $3.00 per ton fee on nitrogen fertilizers or soil conditioners, paid by the distributor
C. Fund to be administered by the state tax commissioner
D. 75% of monies in the fund to be used for University of Nebraska to research and implement programs and methods of sustainable agriculture
D. 25% of monies in the fund to be used by the Natural Resources Commission to assist NRDs to establish and regulate Special Protection Areas.

Moore made the motion (Motion #14) that the district oppose the Nebraska Groundwater Quality Act as written. At a minimum the draft should be changed to: treat all classes of fertilizers equally; use 25% of the fund for university research; and return 75% of the fund directly to NRDs for administration and operation of Special Protection Areas, and Groundwater Management Areas for quality; and further to direct staff to write letters to Senators Moore, Johnson, Coordsen and Schmidt. Seconded by Reichlinger. Question called. Motion carried.

BOARD OFFICERS FOR 1992
Burke made the motion (Motion #17) that the past chairmen serve as a nominating committee for board officer elections. Seconded by Ediger.

Ediger amended the motion to make the motion (Motion #18) that two names be submitted by the nominating committee for each position to be filled. Seconded by Anderson. Question called on the amendment. Amendment carried.

FINANCIAL STATEMENT
Regier made the motion (Motion #19) to approve the financial statement and budget report as of November 30, 1991; to make payment of the accounts payable and approve the expenditures of publication. Seconded by Volkmer. Question called. Motion carried.
Board of Director’s Meeting

Meeting adjourned at 4:00 p.m.

Louis Oswald, Secretary
:nd
Mr. Chairman, and members of the Committee, I am John C. Turnbull, General Manager of the Upper Big Blue NRD, York, Nebraska. I am here today on behalf of the Board of Directors.

The Upper Big Blue NRD comprises 3.8% of Nebraska's total land area, but has more irrigated acreage than any other NRD, 14.1% of the state's total. The district has about 1,000,000 acres that are under irrigation, almost all from private wells.

10,680 irrigation wells
111 municipal wells
19 industrial wells
9 other
10,819 total registered

The Upper Big Blue is one of 3 Groundwater Control Areas in Nebraska. Regulations have been in place since 1979. Current regulations become more restrictive as groundwater declines worsen.

The District has reviewed the proposed Legislative Bill Requests 1291, 1317, 1318, 1319F, 1320, 1321, 1322, 1323, 1324, and 1325. We understand and recognize that there is a physical interrelationship between ground and surface waters. We also understand the basic legal principles of law which govern the uses of groundwater and surface water.

Groundwater laws in Nebraska are based on the "Share and Share Alike" doctrine in times of shortage. The three Control Areas in Nebraska are set up to manage the groundwater use, on a shared basis, by allocation. That is, so many acre inches of water per year per acre. (The date land was first irrigated or when the well was registered or permitted has no bearing.) The 3 Control Areas manage more than ¼ of the total irrigated acres in the state.

Surface water laws in this state are based on the appropriative doctrine, which when simply stated, is "First in Time-First in Right."

In times of shortage, the older rights get all of their appropriation at the expense of the junior right. The filing date of the original application governs all.

"Share and share alike" and "First in time-first in right" are in direct conflict. Therein lies the basic underlying problem of legally recognizing the interrelationship of ground and surface water.

There are instances where legal recognition is important the M.U.D. and Lincoln well fields along
the Platte are prime examples of wells dependent on recharge from a stream. The Big and Little Blue Rivers' daily flows into Kansas are interstate problems caused, to a certain degree, by wells intercepting groundwater flow into the otherwise gaining streams.

We aren't sure what the best solution is, but bringing groundwater use under the appropriate doctrine statewide is not the answer. Conservation of groundwater is the Upper Big Blue District's primary responsibility. A first in time first in right principle does not necessarily promote conservation.

The recognition of ground and surface water should be done in such a fashion so as to blend the two legal doctrines together in limited geographic areas.

The district feels strongly that new statutes should not undermine the Nebraska Groundwater Management Act, its principles, or effectiveness. Areas of potential conflict with that act are:

**IRRIGATION RUNOFF**

- **Surface Water**

  46-265. "Embankments; maintenance; return of unused water; duties of owner. The owner or owners of any irrigation ditch or canal shall carefully maintain the embankments thereof so as to prevent waste therefrom, and shall return the unused water from such ditch or canal with as little waste thereof as possible to the stream from which such water was taken, or to the Missouri River."

- **Ground Water**

  46-664. "Action to control or prevent runoff of water; district; rules and regulations; power to issue cease and desist orders; notice; hearing. (1) In order to conserve ground water supplies and to prevent the inefficient or improper runoff of such ground water, after August 24, 1975, each person who uses ground water irrigation in the state shall take action to control or prevent the runoff of water used in such irrigation."

If a well were to come under the appropriative doctrine because it is close to a stream, the district believes any runoff which occurs because of the use of that well needs to be controlled by the user, and by regulation as per the Groundwater Management Act.

**ALLOCATION OF USE**

- **Surface Water**

  46-231. "No allotment from natural flow of streams for irrigation shall exceed 1 c.f.s. of time for each 70 acres of land, nor 3 acre feet in the aggregate during one calendar year . . . Such limitations do not apply to storage waters."

In times of shortage the Senior right may continue to divert at his maximum rate, and the Junior right must curtail his use of water to allow it to happen.
-Groundwater

46-666. "A District (NRD) in which a Control Area has been designated . . . may determine the permissible withdrawal of groundwater for each day, month, or year and allocate such withdrawal among groundwater users."

The District believes that a Control Area allocation should still apply to a landowner, whose land is in a Control Area, when he is granted an appropriative right for a well within jurisdictional limits of a stream. That is even if the owner is granted a surface-type right for the well, any groundwater allocation in effect should apply our initial allocation is 16" of water per acre per year - considerably different than 3 acre feet (36 inches) allowed under 46-231.

The following summarizes the District's current position on the various Legislative Bill Requests:

Request 1291 - Zones of administration of groundwater - 60 day- travel time from streams.

District position - We recommend that only wells of 100 gpm capacity or more fall under this proposal. That way the proposal will coincide with the Nebraska Groundwater Management Act which permits the regulation of only those wells that have a capacity of 100 gpm or greater. Any conflicts with control areas need to be resolved to allow control area regulations to remain effective.

Request 1317 - Principles of equity between ground and surface water users.

District position - We recommend that the nine factors be weighed equally; economic value should not be more important. My directors are nervous about manufacturing or industrial water needs outweighing Ag water needs.

Request 1318 - Instream flows for recharge of public water supplies.

District position - No position at this time.

Request 1319 - Groundwater within one mile each side of natural streams to come under the appropriative doctrine.

District position - The District opposes REQ 1319 because it is in direct conflict with the legal doctrine of groundwater in Nebraska. Our concern lies with the language of Sections 3 & 4, page 4 which, if strictly interpreted, would bring most of the wells in the Upper Big Blue under the Appropriate Doctrine. I have a map of York County which shows the impact of Sections 3 & 4; it is typical for our district. We are afraid that this extensive action will cause major conflicts with our Control Area and its regulations.

We will remain opposed until the effort to protect public water supplies can be worded narrowly enough to prevent the widespread administration of groundwater through the Appropriate doctrine. We are also concerned about restricting groundwater use in order to provide senior surface water appropriations water.
Board of Director’s Meeting

Request 1320 - Require drainage plans and acceptance of responsibility by applicant on projects; larger than 4,000 acres.

District position - We recognize the problem and support reasonable legislation.

Request 1321 - Control area purpose expansion - add streamflow reductions.

District position - The district opposes REQ 1321 because among other things, a downstream NRD can initiate control area establishment in an upstream NRD. Control Areas are politically difficult enough as it is.

Request 1322 - Groundwater transfer

District position - It is important to watch out for conflict with control area regulations, such as transfer limitations, and allocations.

Request 1323 - Fees for incidental underground water storage.

District position - The district is opposed to change at this time, but we need to consider it further.

Request 1324 General well fees, groundwater use fees, property tax for recharge facilities in control and management areas.

District position - Any general well fees or ground water use fees ought to be on a prorated scale with increasing fees with increasing quantity pumped.

An example of such a prorated scale is:

<table>
<thead>
<tr>
<th>Water pumped @ Acre</th>
<th>Fee @ Acre Foot</th>
</tr>
</thead>
<tbody>
<tr>
<td>0&quot;-12&quot;</td>
<td>no fee</td>
</tr>
<tr>
<td>12&quot;-16&quot;</td>
<td>low fee</td>
</tr>
<tr>
<td>16&quot;-20&quot;</td>
<td>moderate fee</td>
</tr>
<tr>
<td>20&quot; +</td>
<td>high fee</td>
</tr>
</tbody>
</table>

Also, NRDs need clear authority to decide if fees and/or a recharge tax is to be established in control or management areas.

Line 13, page 4, of REQ 1324 states that funds raised by a tax levy shall only be utilized for construction. Operation and Maintenance costs need to be authorized, also.

Request 1325 - Research funds from state general fund to NRC for streamflow, lakes and wetlands studies.

District position - We oppose REQ 1325. Isn't some of this already occurring?

This concludes my testimony. I'll be glad to answer any questions.

SCHOOL CREEK WATERSHED - SUTTON FLOOD CONTROL PROJECT
E.A. Engineering is continuing to work on a study of possible flood control measures at Sutton. The District is continuing to work with the Federal Emergency Management Agency (FEMA) to prepare a request for federal and state grant money to be used for construction of flood protection works at Sutton. FEMA has extended the deadline for filing a grant application to December 5, 1991. The City of Sutton has requested that the District take the lead in project planning and cost-share with the City in project construction.

Regier made the motion (Motion #2) that the District take the administrative lead as applicant, as requested by the City of Sutton, to prepare and administer a grant application for federal and state cost-share assistance to construct flood control facilities at Sutton. Seconded by Volkmer. Question called. Motion carried.

LAND TREATMENT PROGRAM - SURGE VALVES
The District has had several requests that the Board of Directors reconsider allowing surge valves as an eligible practice under the land treatment program. Some residents of the District were present to express their support for the surge valve practice. Staff explained that the purpose of the land treatment program is to provide cost-share as an incentive for farmers to install soil and water conservation measures.

Regier made the motion (Motion #5) that the District allow cost sharing on surge valves for the remainder of fiscal year 1992, that the total cost-share for all surge valve applications not exceed $20,000 and that each landowner/applicant be limited to one surge valve. Seconded by Hansen. Question called. Motion carried.

PROJECT 4-8-2E - JOHNSON CREEK SITE 12
Greg Easley, tenant, on lands within the reservoir conservation pool at Johnson Creek Site 12, has requested that the District construct a stream crossing at the tailwater of the reservoir. The crossing is being requested to provide access for farming operations between the west property line and the reservoir.
Regier made the motion (Motion #9) that the District install a stream crossing, as requested by Greg Easley, across the reservoir tailwater of Project 4-8-2E to provide access for farming operations, that the District's cost for the crossing no exceed $1,200 and that the District not be responsible for operation and maintenance of the crossing. Seconded by Volkmer. Question called. Motion carried.

SCHOOL CREEK WATERSHED - HARVARD FLOOD CONTROL PROJECT
An Administrative Agreement between Harvard and the District was approved at the District's October 1991 Board Meeting. After reviewing the Agreement, the Harvard City Council requested the following amendments:

Paragraph 5 - Original
The CITY agrees to contract for all engineering services and for the construction of the FLOOD CONTROL WORKS, and to make timely payments due under such agreements, prior to requesting reimbursement from the grant funds held by the District. It is agreed between the parties that the grant funds shall be drawn upon and exhausted before the DISTRICT is required to expend the funds which it obligates to the FLOOD CONTROL WORKS, in accordance with paragraph four above.

Paragraph 5 - Amended
The CITY agrees to contract for all engineering services and for the construction of the FLOOD CONTROL WORKS, and to make timely payments due under such agreements, prior to requesting reimbursement from the grant funds.
Paragraph 10 - Original
The CITY agrees to support and testify in favor of any future flood control planning efforts undertaken by the DISTRICT in the School Creek watershed.

Paragraph 10 - Amended
The City agrees to actively support future flood control planning efforts undertaken by the DISTRICT in the School Creek watershed.

Regier made the motion (Motion #10) that Paragraph 5 of the Administrative Agreement between the City of Harvard and the District be amended to read as follows: "5. The CITY agrees to contract for all engineering services and for the construction of the FLOOD CONTROL WORKS, and to make timely payments due under such agreements, prior to requesting reimbursement from the grant funds." LATE WELL PERMIT
The water department staff recently discovered an unregistered well, which the current owners attempted to register. The well registration showed that the well was drilled in 1980 without a permit. The current owners, Dennis and Aldeen Riha, did not own the property when the well was
drilled. Except for not having a permit, the well complies with all of the district's Control Area Rules and Regulations. The Riha's have applied for a late permit.

Reichlinger made the motion (Motion #16) that the late permit be granted for a well in the SW ¼ of the SW ¼ of Section 4, Township 14 North, Range 2 East, Butler County, for the well dug on June 10, 1980, and currently owned by Dennis and Aldeen Riha. Following the voting it was brought to the board's attention by Dickinson that Oswald was registered for the GMDA Conference in Colorado Springs, Colorado in December. As a result the previous motion conflicts with the board's policy on out-of-state travel for directors which states "that each director be authorized to attend only one organization's out-of-state functions per fiscal year at the district's expense."
If Oswald attends the GMDA Conference at district expense this would eliminate him from attending the Washington, D.C. lobbying trip because he will have already had his one out-of-state trip for the fiscal year.

Moore made the motion (Motion 120) to exempt Buzz Oswald from the policy limiting directors to one out-of-state trip per fiscal year to allow him to attend both the GMDA Conference and the NARD Washington, D.C. lobbying trip. Seconded by Hansen.

Following a lengthy discussion Oswald offered to either pay his own way to the GMDA Conference or to cancel his registration for the GMDA conference. As a result Moore withdrew his motion with the approval of Hansen who seconded the motion.

PROJECT 4-8-2E - JOHNSON CREEK SITE 12:
Slepicka Brothers, Inc., contractors, have completed construction work on the dam at Johnson Creek Site #12. The work meets -the requirements of the Contract and has passed final inspection.

The quantity of site clearing was estimated at the time of bids to be 7.7 acres; Slepicka bid the work at $400 per acre (total bid for this item was $3,080). It was explained to the contractors bidding the work that the acres to be cleared were approximate at bid time since the number of trees to be left standing had not been determined. It was agreed that the final payment would be based on the number of acres actually cleared. During construction the Engineer decided to stop clearing after 2.7 acres had been completed. Final payment on the clearing was then computed to be $1,080 based on $400 per acre. Slepicka Brothers have filed a claim stating that they should be paid $3,080 for the clearing. This claim would increase final payment for clearing by $2,000.

Bitner advised the board that since the October 7 Projects Committee meeting the District offered
Slepicka Brothers $1,000 to settle their claim and they have accepted the offer. Slepicka Brothers signed the final progress payment, release of all claims, and the contract change order.

Hansen made the motion (Motion #5) that the District offer Slepicka Brothers, Inc. $1,000 to settle their claim for additional payment for clearing at Project 4-8-2E. Seconded Ediger. Question called. Motion carried.

WATER COMMITTEE MEETING REPORT:
Jackson gave a report on the Water Committee meeting held October 8, 1991 and reviewed the committee report as distributed.

HUEBERT RUNOFF SOLUTIONS:
Dennis Schroeder, District Conservationist, Hamilton County SCS, met with the Water Committee on October 8th and was present at the board meeting to discuss the design of a pit to collect irrigation runoff from Denton Huebert's farm. This is the site of the complaint filed by Lawrence Cranston, which resulted in a formal hearing before the Board.

Jackson made the motion (Motion #12) that due to the special circumstances related to the irrigation
runoff situation, the District recognizes the need for an irrigation reuse pit at this location, NW ¼ Section 36, Township 9 North, Range 6 West, owned by Denton Huebert; and further, that any future projects of this type will be considered by the District on a case by case basis. Seconded by Moore.

Following the August 15, 1991 irrigation runoff hearing (Cranston vs. Huebert) Denton Huebert voluntarily agreed to build an irrigation runoff reuse pit on his property in order to control runoff from his property onto the property owned by Lawrence Cranston. Mr. Huebert was not found in violation by the board at the August 15th hearing.

Mr. Huebert applied for cost-share assistance under the NSWCP program to construct this pit. His application was given tentative approval for cost-share funding up to $5,000. It was later brought to the attention of the staff that only reuse pits that collect water from gravity irrigation systems are eligible for funding under NSWCP guidelines. In Mr. Huebert's case the runoff is coming from a center pivot. It is unlikely that the NNRC will waive this stipulation.

The Upper Big Blue NRD staff felt that since the District had already advised Mr. Huebert that funding of up to $5,000 would be available, and to save the cost of further staff time as a result of the repeated runoff complaints associated with this property, the District should honor this commitment of funds.

Turnbull suggested that the application be transferred from an NSWCP to NRD application and that the Board make an exception and allow this application to exceed the $3,500 limit and authorize cost-share funding up to the $5,000 limit Mr. Huebert was promised.

Moore amended the motion to make the motion (Motion #13) to transfer the irrigation runoff reuse pit application from NSWCP to NRD funds and that in this case the District exceed the $3,500 limit and fund up to $5,000. Seconded by Regier. Question called on the amendment. Amendment carried.

PROJECTS COMMITTEE MEETING REPORT:
Regier gave a report on the Projects Committee meeting held September 9, 1991 and reviewed the committee report as distributed. CITY OF HARVARD - FLOOD CONTROL PROJECT: Harvard is requesting that the District assist with filing the application for federal/state cost-share of 75 percent and that the District pay 50 percent of the local 25 percent of project cost. It is estimated that the project cost will not exceed $250,000. On this basis, the cost-share limits would be as follows:

Federal (50%) ........................................ 125,000
State (25%) ........................................... 62,500
Harvard (12.5%) ..................................... 31,250
NRD (12.5%) ........................................ 31,250
Total Project Cost ................................. 250,000

Regier made the motion (Motion #4) that the District take the administrative lead as applicant, as requested by the City of Harvard, to prepare and administer a grant application for federal and state cost-share assistance to construct flood control facilities at Harvard. PROJECT 29-11-01W - WACO FLOOD CONTROL STUDY:
Regier made the motion (Motion #15) that the District offer to provide project management, design
and construction inspection on Project 29-11-01W and that Waco be required to pay for 50 percent of the District's cost of providing this service. Seconded by Volkmer. Since the Projects Committee meeting, Bitner has met with the Chairman and several other members of the Village Board. They have indicated that they are not really sure at this point if they want to proceed. Bitner indicated that it may be premature on our part to enter into any agreements or to process any applications with the railroad for this crossing. The NRD has written a study, and the project is now number 1 on the projects priority list.

Bitner recommends that the board not act on this motion so that they may complete the study and submit it to the Waco Village Board for review and leave it with them. At such time that they would like to continue with this project, or take some action at a later date, we can open it up for discussion. This motion (Motion #15) was withdrawn by Regier with the approval of Volkmer, who seconded the motion.

**PROJECT 28-10-03E - DARGELOH DAM:**
Regier made the motion (Motion #16) that the District enter into a Contract with Geotechnical Services, Inc. to provide foundation drilling and testing for the dam proposed at Project 28-10-3E, and that the fee for these services not exceed $4,400. Seconded by Hansen. Question called. Motion carried.

Vice Chairman Ray Burke reconvened the August 6, 1991 irrigation runoff hearing at 8:20 p.m.. A complete transcript of the hearing is available at the office. Following is the board motion regarding the runoff hearing. Anderson made the motion (Motion #2) that the Board of Directors of the Upper Big Blue Natural Resources District, after considering the testimony and evidence presented during the formal hearing, finds that the irrigation runoff complaint filed by Mr. Lawrence Cranston, of Aurora, Nebraska, on July 1, 1991, against Mr. Denton Huebert of Henderson, Nebraska, alleging improper irrigation runoff from the Northwest Quarter of Section 36, Township 9 North, Range 6 West, onto the Southwest Quarter of Section 25, Township 9 North, Range 6 West, all in Hamilton County, Nebraska, was properly dismissed by Rod DeBuhr, NRD Water Department Manager. Seconded by Ehlers. Question called. Motion carried.

NARD REPORT:
Moore advised the board that he did not attend the last NARD board meeting, but that Anderson was present to represent the district. He further advised the board that he did not expect to attend the September Conference, but that Bob Ehlers, as the NARD Alternate, had indicated that he would try to cover that meeting. Ehlers requested that a second NARD Alternate be named in the event he is unable to attend the September Conference. Goding indicated he would be interested in acting as the second Alternate. Hansen made the motion (Motion #3) that Cal Goding be appointed as the Alternate to the Alternate for the September NARD Conference. Seconded by Ediger. Question called. Motion carried.

PART-TIME EMPLOYEE BENEFITS:
The District's policy is to provide paid benefits, including health, dental, term life, and disability insurance for part-time, and full-time, employees. The General Manager recommended that the District consider changing the policy for part-time employees hired in the future. His recommendation did not include the elimination of benefits for current part-time employees.

The Aurora field office clerk resigned effective August 14, 1991. The District could realize a savings of $1,800 a year if paid benefits were not offered for this part-time position. Ehlers made the motion...
(Motion #30) that the District not provide district-paid group health and dental insurance, life, accidental death and dismemberment, and long term disability insurance for any part-time employee hired after August 15, 1991; that the District allow part-time employees hired after August 15, 1991 to purchase these insurances through a payroll deduction for themselves, and group health and dental insurance for their families; that personnel policies #26 and #27 be amended, as, submitted and reviewed, by virtue of this action, to reflect these changes. Seconded by Obermier. Dennis Schroeder, DC at the Aurora SCS Office, expressed his concern that without the benefits package his office would see a much higher turnover rate as well as a reduction in the quality of personnel. Volkmer voiced concern regarding the legality of offering paid benefits for only some part-time employees. A lengthy discussion ensued. Volkmer made the motion (Motion #31) to refer the matter back to Committee. Question called. Motion failed.

Turnbull advised the board that when the new personnel policy was written and adopted reference to part-time employees in policy #26 and #27 was accidentally omitted, though it was the district’s intent to offer paid benefits to both full and part-time employees. In view of that fact and the action just taken lie felt that this would be an appropriate time for the board to correct that omission. Ehlers made the motion (Motion #32) to insert the words "and each part-time employee" into Policy #26 and "and all part-time employees" into Policy #27. Seconded by Hansen. Question called. Motion carried.

The policies will now read as follows:

Personnel Policy No. 26: GROUP HEALTH AND DENTAL INSURANCE PLAN

The District provides a Group Health and Dental Insurance Plan for each full-time employee, and each part-time employee, and his or her spouse and dependent children. The District pays 100% of the single coverage but none of the cost of additional family coverage for Health Insurance. Family coverage is handled through payroll deduction. The District also pays 100% of both single and family coverage for Dental Insurance. It is possible, under IRS regulations and the District's Employee Health and Welfare Benefit Plan, for employee contributions for Health Insurance to be treated as pretax income.
Personnel Policy No. 27: **LIFE INSURANCE, ACCIDENTAL DEATH AND DISMEMBERMENT AND LONG-TERM DISABILITY**

The District provides Group Life Insurance, Accidental Death and Dismemberment Benefits and Long-Term Disability Benefits to all full-time employees, and all part-time employees, in amounts determined on the basis of each employee's annual salary. The District pays 100% of the cost.

**FINANCIAL STATEMENT:**

EPA WETLAND ADVANCED IDENTIFICATION STUDY ACTIVITY:
It has been suggested by the SCS state wetlands specialist that the NRDs involved with the Rain Water Basin area make a formal request to the SCS for modifications to the technical guides for practices such as irrigation reuse pits to accommodate special requirements in wetlands. Reichlinger made the motion (Motion #7) that the district make a formal request to the State Conservationist for consideration of possible modification to SCS technical guides regarding soil and water conservation practices in wetland areas. Rod recently attended a meeting of the advanced identification study technical committee. At this meeting Rod was told that the Corps of Engineers has determined that class III wetland determinations cannot be removed from the advanced identification manual as we had been told earlier. Gene Glock from Senator Kerry's staff contacted the district concerning this matter and asked that the NRDs involved make a request to the EPA and Corps in another effort to change this ruling and to send copies of this correspondence to him so the Senator can work on it in Washington.

Reichlinger made the motion (Motion #8) that the district request that the determination denying the removal of class III wetlands (pits) be reconsidered by EPA and the Corps of Engineers and that copies of this request be submitted to the congressional delegation.
After considerable discussion, Siebert made the motion (Motion #9) to refer this back to the Water Committee. Seconded by Regier. Question called. Motion carried.

DISTRICT CREDIT CARDS:
The visa cards expire July 31, 1991. The District can no longer get all of the cards it needs for one flat fee. FirstTier Bank, the current agent for our Visa, now charges $25 per card issued. The District has 27 cards, 10 for staff and 17 for the directors. National Bank of Commerce charges $20 per card, if 25 or more cards are ordered. Both banks provide accounting for each separate card, along with a consolidated billing. PERSONAL TYPING SYSTEM:
The Personal Typing System that Nancy Davis uses has a 20 megabyte hard drive for storage of files and programs. All the space is full, and more is needed to properly run the accounting and payroll softwares, and to store files. Because of the design of the IBM PTS, there is no space for either a larger hard drive or a hard card. To add space, three options are available.

Eakes Office Products Center
a- Replace IBM PTS 86 with new PTS 286 with 80 mg drive
   Cost - $2,436.00
b- Add expansion box and 40 mg hard card, but the 20 mg drive would no longer be hooked up
   Cost - $1,278.00

COST-SHARE PROGRAM FOR PLUGGING ABANDONED WELLS:
The Water Committee reviewed programs developed by four other NRDs. After discussing several options, the following program was recommended to the board.

AQWA - CAP
Aquifer Quality Well Abandonment
Cost-share Assistance Program

01 This practice shall allow for cost-share for proper plugging of abandoned wells according to Title 178, Chapter 12 of the Department of Health Regulations governing water well abandonment standards.

02 All plugging activities must be conducted by a licensed well driller or by the owner of the well.

02.01 If the plugging is done by a licensed well driller the cost-share rate shall be 65% of labor and materials.

02.02 If the plugging is done by the well owner the cost-share rate shall be 100% of materials only.

02.03 The district may require that a district representative be present during the actual plugging process.

02.04 The maximum cost-share for the proper plugging of wells of various sizes is as follows:

<table>
<thead>
<tr>
<th>Size</th>
<th>Cost Share</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less than 6 inches</td>
<td>$100</td>
</tr>
<tr>
<td>6 to 12 inches</td>
<td>$150</td>
</tr>
<tr>
<td>Over 12 to 18 inches</td>
<td>$300</td>
</tr>
<tr>
<td>Over 18 inches</td>
<td>$400</td>
</tr>
</tbody>
</table>

03 All below ground pipe and any above ground pipe, tower or other apparatus that may impede the plugging activity must be removed.

03.01 Any cost incurred in this removal is not eligible for cost-share.

04 The Nebraska Department of Health regulations shall be followed when plugging a well. The district handout titled "PROPER ABANDONMENT PROCEDURES" is a general guide for the approved plugging procedure.

05 Quantities of materials and methods used in plugging the well must be reported on forms provided by the district.
The procedures established for all other NRD cost-share programs will be followed.

Cost-share payment shall be made upon approval of the completed work by the board of directors.

Reichlinger made the motion (Motion #6) to adopt the Aquifer Quality Well Abandonment Cost-share Assistance Program, as reviewed, and to begin on July 1, 1991. Seconded by Obermier. Question called. Motion carried.

PARKVIEW ESTATES - AURORA - NITRATE SAMPLING:
The NRD and Blue River Association of Groundwater Conservation Districts cooperated in providing water sampling for nitrate and bacteria for the residents of Parkview Estates on the north side of the city of Aurora. Some residents of the area have found nitrates above 10 p.p.m. The NRD and Blue River Association's work revealed that out of 21 samples, five exceeded 10 p.p.m. nitrate and two were about 9 p.p.m. All bacteria samples tested negative. The staff will be working with the city and residents to see if more can be determined as to why some wells are showing higher nitrates.

MID-NEBRASKA WATER QUALITY MANAGEMENT DEMONSTRATION - VADOSE; ZONE BASELINE ANALYSIS:
The Demonstration Project committee has recommended that additional baseline data or vadose zone nitrates and Atrazine levels be collected in 1991. The total estimated cost for the sampling done to-date and remaining sampling and analysis is $106,950.00. The federal grant for the project does not cover the cost of this work. In May the Water Committee included $10,000 in the proposed budget for vadose zone sampling, partly in anticipation of this proposal.

Reichlinger made the motion (Motion #8) that $8,000 be earmarked as the NRD’s contribution for the Mid-Nebraska Water Quality Demonstration Project Vadose Zone Monitoring. Seconded by Jackson. Question called. Motion carried.

COST-SHARE POLICY - DISTRICT STUDIES:
The committee considered a new policy of requiring cost-sharing on district studies. The committee discussed the need for meaningful studies leading to project construction.

Goding made the motion (Motion #21) to require cost-sharing of 50% on district studies that exceed $4,000 (in-house and/or out of pocket costs); and further that 75% of the applicants 50% be applied towards the applicants share of the project costs if the project proceeds to construction. Seconded by Ediger.

Volkmer amended the motion to make the motion (Motion #22) that the applicant shall have two years after the study is completed to be eligible for the 75% of their share (50%) of the study costs. Seconded by Goding.

Concern was expressed that the two-year time limit was too restrictive and would be unfair to large projects which could easily take more than two years to reach the design stage.

Oswald made the motion (Motion #23) to refer back to the Budget Committee. Seconded by Regier. Question called. Motion carried.

CREDIT CARDS:
The district currently has FirsTier VISA cards. They expire in July 1991. The district can only get the business account upon renewal. Each staff member or director who has a card would be treated
as a separate sub-account, with the district getting a consolidated billing. The district currently holds 27 cards. The fee would be $675 per year.

The Executive Committee has directed the general manager to shop around.

**MAILING SYSTEM:**
The district currently has a Pitney Bowes postage meter which it has been leasing from Pitney Bowes since 1974. Pitney Bowes has advised the district that this model is being discontinued and must be turned in. Staff has recommended that a mailing system be purchased to save both time and money processing mail.

The mailing system features:
- A. Semi-automatic feeder which feeds and seals 60-80 envelopes per minute
- B. Seal-only mode (payroll or bulk mailings)
- C. Auto-on/auto-off power
- D. Electronic scale weighs up to 10 pounds
- E. Interfacing which automatically transfers amount of postage from scale to postage meter
- F. Scale allows shopping for best rate, including UPS
- G. Scale calculates postage for other mailing zones
- H. Stack unit for ease of handling envelopes
- I. Lock-out key to prevent misuse

The district would own the mailing system itself, but not the meter. Federal law requires that all meters be leased. The district would still have to pay meter rent.

Quotes have been received from two suppliers.

Pitney Bowes has an excellent reputation and a good service record. The IMS Hassler machine offered by Eakes Office Products is very new to the market and very few have been sold in our area. Based on IMS Hassler's newcomer status in the marketplace staff has recommended the purchase of the Pitney Bowes model 6462.

Burke made the motion (Motion #25) to approve purchase of a Pitney Bowes model 6264 semiautomatic mailing machine for $3,779.00. Seconded by Ehlers. Question called. Motion

PAY SCALE AND JOB CLASSIFICATIONS:
The manager recommended that a new pay scale be adopted by the board to replace the one originally adopted in 1981. The old one had rigid step increases (raises) of 3.5%. The new scale system will have a minimum and maximum pay only. It is based on the State of Nebraska system. The pay scale will need to be adjusted periodically to account for the impact of inflation. The manager also recommended that the job classifications be adopted. Burke made the motion (Motion #28) to adopt the minimum/maximum pay scale, with $4.25 per hour as the starting point, as presented and further to adopt the job classifications. Seconded by Reichling. LAND TREATMENT COST-SHARE RATE:
The possible reasons for the decrease in land treatment activity were discussed. The general consensus was that the decrease is economically driven and that a slightly higher cost-share rate might increase the incentive to install more practices. The current ACP and district cost-share rates were reviewed. Hansen made the motion (Motion #4) that the board of directors authorize changing the cost-share rate for NRD and NSWCP funded land treatment to 65 percent. Seconded by Hermansen. Question called. SUTTON AREA FLOOD CONTROL STUDY:
Mac Tilberg, Sutton City Administrator, and Virgil Ulmer, Mayor of Sutton, were present at the Projects Committee meeting to request that the district obtain proposals for engineering services required to conduct a reconnaissance level study of the local flooding problem at Sutton. The study would identify several options, and associated costs, for resolving the flooding problem. Sutton has verbally agreed to pay a portion of the study cost; the district and City of Sutton will discuss cost-sharing arrangements after proposals have been received. Hansen made the motion (Motion #7) that the board of directors authorize the staff to request proposals for engineering services to conduct a reconnaissance level study of local flooding problems at Sutton. PLUGGING OF ABANDONED WELLS COST-SHARE PROGRAM:
This program was discussed by the Water Committee at their May 7th meeting. There was a motion made in committee to adopt a cost-share program to plug abandoned wells. The motion failed in committee.

There was strong sentiment among several of the board members that this would be a good incentive program to encourage proper well abandonment as well as an inexpensive way to protect the quality of the groundwater. A lengthy discussion followed.

Ehlers made the motion (Motion #10) to refer back to committee for further discussion. Seconded by Moore. Question called. Motion carried.

PART-TIME HELP FOR WATER DEPARTMENT:
Rod has requested authorization to hire a part-time chemigation inspector for approximately eight weeks during the months of June, July and August. Additional help is needed primarily because of added workload on Rod and Russ due to the Recharge Project, Special Protection Area studies and the Ground Water Management Planning activities. The estimated cost is $2,000 to $2,500. The Water Committee voted unanimously to support Rod's request. Due to the nature of the request (hiring of personnel) the Executive Committee will take action on the matter during their report later in the meeting.

EDUCATION & PARKS COMMITTEE MEETING REPORT:
Sedlak gave a report on the Education and Parks Committee Meeting held May 9, 1991 and reviewed the committee report as distributed.

YORK HIGH SCHOOL OUTDOOR CLASSROOM PROPOSAL:
The Education and Parks Committee heard a presentation from Mike Sandall, natural resources instructor from York High School, and four students on a proposal for cost-share assistance under the Outdoor Classroom Program. The students, under the direction of Sandall, have designed an outdoor classroom to be planted east. Of the high school incorporating an existing native grass plot. Total cost of the materials for the proposed project is $1,500. The students will provide the labor. The Outdoor Classroom Program provides cost-share assistance for materials at a rate of 50% with a $400 ceiling.

Mr. Sandall and his students were present at the board meeting to answer questions regarding their outdoor classroom project.
Sedlak made the motion (Motion #11) that the Upper Big Blue NRD accept the application of York High School for cost-share funding under the Outdoor Classroom Program at 50% of the actual cost of seed, materials and related items, not to exceed $400. that have been collected. Other notices are expected. Unless the board certifies to the county
treasurers, within 30 days from the date of notice, that such refunds at this point in time would
interfere with the governmental functions of the district the refunds will be paid from tax collections
held by the county treasurers belonging to the district.

NRD BUDGETS:
The Budget, Planning & Legislative Committee reviewed the draft department budgets.

Concern was expressed about planning studies conducted by the district for cities and villages. It
was suggested that a studies and planning policy should be developed that would require cities and
villages to pay a portion of the study and planning cost.

Long range program costs and public benefits were also discussed, including wildlife habitat
contracts and costs vs. benefits.

WILDLIFE HABITAT IMPROVEMENT PROGRAM:
Goding made the motion (Motion #20) that no new or renewal of wildlife habitat contracts be
accepted in FY92, or thereafter. Seconded by Ediger. There was considerable discussion regarding
the merits of the Wildlife Habitat Improvement Program and the impact discontinuing the program
would have on other district programs. Question called. Motion failed.

DIRECTORS' PER DIEM CHANGE:
LB 264 has been signed into law by the governor and reads as follows.

22-3218. Board members shall be compensated for their actual and necessary expenses incurred in connection with their duties. Each board may provide a per diem payment for directors of not to exceed fifty dollars for each day that such director attends meetings of the board or is engaged in matters concerning the district, but no director shall receive more than two thousand dollars in any one year. Such per diem payments shall be in addition to and separate from compensation for expenses.

Burke made the motion (Motion 12) to change the directors' per diem to $30.00 a day effective October 1, 1991. Seconded by Ehlers. There was considerable discussion regarding where the rate should be set.

Obermier made the motion (Motion #13) to table the matter until the May board meeting. Seconded by Jackson. Question called. Motion failed.

BOARD COMMITTEE APPOINTMENTS:
The board of directors need to take action on Motion #22 of the March 21, 1991 board of directors meeting, which was held over until the next board meeting at Ehler's request.

Motion #22 read "that in the future the committee appointments made by the Executive Committee be final".

Reichlinger read the board motion from February 19, 1981, which cited as the basis for his hold-over request on a matter affecting district policy. That board motion read "that the board of directors adopt the policy that if requested by any board member, any proposed district policy change be held over to the next regular board meeting after its presentation for action."

After reading the previous motion Reichlinger stated he did not feel the intent of the March 21st motion was a policy change, but rather an amendment to the bylaws. As a result, the March 21st motion should not have been carried over based on the February 19, 1981 motion. The proper way to resolve the matter would be to amend the bylaws.

Reichlinger withdrew Motion #22 with the approval of Ediger, who withdrew his second.

Burke made the motion (Motion #18) to amend Article III, C-1 of the bylaws to read.... "Any requests for changes in committee assignments are to be submitted to the Executive Committee for reconsideration, and the committee will forward the matter to the board for ratification. Such requests should only be considered in the first 30 days following the effective date of the committee assignments." Seconded by Hansen.
Ehlers amended the motion to make the motion (Motion #19) "Any requests for changes in committee assignments are to be submitted to the Executive Committee for reconsideration, and the committee will forward the matter to the board for ratification. Such requests should be made prior to the next Executive Committee meeting following the effective date of the committee assignments. Seconded by Reichlinger. Question called on the amendment. Amendment carried.

Article III, C-1 of the bylaws now reads as follows:

C. MEMBERSHIP

1. The membership of the committees shall be appointed by the Executive Committee and approved by the board of directors. Committee memberships will be reviewed and new appointments made every two (2) years but not later than the March board meeting immediately following the general elections. Any requests for changes in committee assignments are to be submitted to the Executive Committee for reconsideration, and the committee will forward the matter to the board for ratification. Such requests should be made prior to the next Executive Committee meeting following the effective date of the committee assignments.

PERSONNEL POLICY:

Turnbull reviewed the latest draft of the personnel policy that the Executive Committee has been working on.

Burke made the motion (Motion #20) to adopt the personnel policies as revised, and that these personnel policies become effective May 1, 1991. Seconded by Goding.

Several directors expressed concern over the wording of Personnel Policy No. 39: EMPLOYMENT OF FAMILY MEMBERS OR DIRECTORS which reads "The District will not employ anyone for any position who is an immediate family member of a current employee or director, nor will the District employ a current director."

Moore made the motion (Motion #21) to strike the words "employee or" from policy no. 39. Seconded by Sedlak.
Following further discussion Ediger made the motion (Motion #22) to table the matter until the next regular board meeting. Seconded by Volkmer. Question called. Motion carried.

Reichlinger made the motion (Motion #22) that in the future the committee appointments made by the Executive Committee be final. Seconded by Ediger.

Ehlers requested, as outlined in the bylaws, that the motion be carried over for 30 days.

Several years ago the board voted that anyone board member would have the right to ask that a policy issue be held over 30 days for consideration with no further action on the part of the board.

Chairman Dickinson advised the board that the matter would be carried over 30 days at request.

**PHONE SYSTEM**
The district is currently leasing a phone system from Lincoln Telephone. Lincoln Telephone no longer can properly maintain the system due to lack of parts. The lease payment has been reduced accordingly.

Turnbull recommends that a new phone system be purchased from Lincoln Telephone for $8,490. A service contract would cost:

<table>

Maintenance from Lincoln Telephone, without a service contract, is $47 an hour plus parts.

ATT quoted three systems ranging in cost from $7,374 to $9,717. Service contract prices were requested but never sent. Maintenance from ATT, without a service contract, is $75 an hour plus parts.

Burke made the motion (Motion #23) to purchase a Telrad Key BX 2464 office telephone system from Lincoln Telephone for $8,490, without a service contract at this time. Seconded by Volkmer.

NRD OFFICE BUILDING STAIRS:
A cost estimate has been obtained from Jensen Lumber to construct a new stairway to the board room in order to meet fire code. That cost estimate is $18,670 plus electrical costs. However, this does not meet handicap requirements. An elevator will be about $32,000 plus installation. Restrooms will also need to be upgraded for handicap requirements; possibly $5,000.

The staff is investigating the possibility of building a ground floor addition for the board room, which would include new restrooms. A ground floor addition might better meet both fire code and handicap requirements, as well as save money.

Reichlinger made the motion (Motion #25) to direct the staff to proceed with the study of the options to meet the fire code and handicap requirements. Seconded by Burke. Question called. Motion carried.

AYE: Anderson, Burke, Ediger, Goding, Hansen, Jackson, Obermier, Oswald, Reichlinger,
HASTINGS NORTHWEST EMERGENCY PREPAREDNESS PLAN:
Rod distributed a copy of a resolution to all the board members present. He explained that this was the same resolution approved by the board in 1988. However, the City of Hastings and Adams County failed to ratify the Hastings Northwest Emergency Preparedness plan due to some disagreements over the carrying out of various responsibilities covered by the plan. Rod has been advised by the civil defense director that the city and county have now reached an agreement over areas of responsibility and are ready to approve the plan, however, they are concerned that the NRD signature is over two years old and have asked that the Upper Big Blue NRD Board ratify their approval of the plan.

RESOLUTION
WHEREAS, the Upper Big Blue Natural Resources District is charged with the prevention of damages from flood water and sediment, flood prevention and control, and water supply for any beneficial uses, and

WHEREAS, Hastings Northwest Flood Control Structure was constructed for these purposes, and

WHEREAS, the District wishes to provide adequate protection for the residents of the City of Hastings in the unlikely event of a dam failure, and

NOW THEREFORE BE IT RESOLVED, that in order to provide a coordinated effort and response to an emergency situation at the Hastings Northwest Flood Control Structure the Upper Big Blue Natural Resources District deems it advisable and in the best interest of the District to approve said Emergency Preparedness Plan.

Volkmer made the motion (Motion #7) to ratify approval of the Emergency Preparedness Plan for the Hastings Northwest Flood Control Structure and approve the resolution as stated. Seconded by Hansen. Question called. Motion carried.

**WATER COMMITTEE MEETING REPORT:**
Moore gave a report on the Water Committee meeting held January 8, 1991 and reviewed the committee report as distributed.

**IAMS COMPANY WELL SPACING VARIANCE REQUEST:**
Several months ago IAMS Company requested a variance to operate an industrial well (two wells in a series) at a rate exceeding 100 gpm. These wells are currently operated on an alternate basis at a rate less than 100 gpm. CF Industries owns two wells that are less than 1,000 feet from IAMS wells. As long as IAMS' wells were operated at less than 100 gpm, the District's 1,000 foot spacing does not apply.

On January 7, 1991, the NRD received a letter from CF Industries regarding IAMS' request. CF Industries' letter states the following: "...Although at this time CF Industries does not foresee any difficulty in granting IAMS such a variance, CF cannot project the effects of IAMS' water consumption on the aquifer and CF's operations. Therefore, CF reserves the right to petition to the Water District Manager for remedial steps should the water supply change, thereby disrupting the operations of the Aurora Terminal."

Tom Kell, IAMS Company plant manager, told the board that the primary reason for requesting the
variance was to allow future plant growth. The company anticipates that by 1993 they will need to increase the output of the Aurora facility by 30 percent.

They also feel there is the possibility of further expansion at this location to produce another pet food product line, which is presently being produced in the states of Minnesota and Indiana. Due to the availability of resources they feel it would be more economical to produce it here in Nebraska. He also stated that the process for producing this new line would not use a lot of water. He stated that he felt the requested variance to pump up to 200 gpm, if granted, would meet their needs for the foreseeable future.

There was considerable discussion on the matter, by both those who favored granting the variance and those who were opposed.

Moore made the motion (Motion #14) to grant IAMS Company a well spacing variance to operate its well (a series of 2) at a rate not to exceed 200 gallons per minute. Seconded by Volkmer. Question called. Motion carried.

**GENERAL MANAGER - LEAVE OF ABSENCE FOR MILITARY DUTY:**
The General Manager, as a member of the Nebraska National Guard, may be ordered to active duty with the U.S. Army in response to the current Mid East situation. If he is ordered to active duty he is entitled, under the law, to a leave of absence without loss of pay during the first 15 work days of such leave of absence. (Nebraska statute 55-161) The district is not required by 'Law to make any additional or other salary payments during a military leave of absence.

Burke made the motion (Motion #24) that the General Manager's gross compensation remain the same if he is called to active duty for the military. Seconded by Anderson.

Moore advised the board that he had requested an opinion from the district's legal counsel as to the legality of such action on the part of the district. There is some confusion about how to interpret the statutes relating to this matter. Legal counsel is still reviewing the matter. Reichlinger made the motion (Motion #25) to refer the matter back to the Executive Committee. Seconded by Moore.

ROLL CALL
15 directors were present during roll call. Siebert arrived following the approval of the minutes and Oswald was absent.

NOTICE OF PUBLIC MEETING
A copy of the agenda was sent to each member as notice of this public meeting. Public notification was made by a "Notice of Public Meeting" published December 7, 1992 in the York News-Times. The agenda is kept continually current and is readily available for public inspection at the principal office of the Upper Big Blue NRD, during normal business hours.

MINUTES OF THE NOVEMBER BOARD MEETING
Goding asked that the minutes be corrected to reflect that he abstained from voting during Motion #15 and did not vote nay, as stated in the minutes.

Ediger noted a typographical error in the discussion of the draft water quality study proposal for the York Groundwater Recharge Demonstration Project. The third sentence in that paragraph should read "The total cost of the three-year study is $717,000." One zero was inadvertently omitted when stating the cost in the November minutes.

Burke made the motion (Motion #1) to approve the minutes of the November 19, 1992 board of directors meeting, as corrected. Seconded by Regier. Question called. Motion carried.

WATER SPECIALTIES FLOW METERS
Water Specialties has requested that their LP-41 and LP-51 flow meter be approved for use in the Upper Big Blue NRD. The meters meet the district's specifications, except that information on low range temperatures (minus 40 degrees Fahrenheit) was not included in the company's specifications.

Reichlinger made the motion (Motion #6) to approve the use of Water Specialties LP-41 and LP-51 flow meters, subject to written documentation from Water Specialties that the meters can meet the minus 40 degrees Fahrenheit standards. Seconded by Dickinson.
Rod informed the board that following the Water Committee meeting on December 10, 1992 he received information verifying that the meters do meet the low range temperature standards. Question called on the motion. Motion carried.

OPERATING POLICIES
The Executive Committee has about one-half of the operating policies completed. The completed sections (1-17) are basically a consolidation of the existing bylaws and operating practices approved by the board over the years. A few sections have been added by the Executive Committee.

The balance of the operating policies will deal with financial management, property management, as well as other matters.

Obermier made the motion (Motion #8) that the board of directors adopt operating policies one through 17. Seconded by Burke.

Ehlers amended the motion to make the motion (Motion #9) to make the following changes to Operating Policy No. 3:
A. No change.
B. The General Manager shall publish a notice of the vacancy which shall contain a request that persons interested in filling the vacated position shall submit a letter of application, stating at a minimum their place of residence and that they are in fact registered to vote, to the Board Chairman.
C. No change.

D. After letters of application have been received, the Executive Committee shall review them and forward all the applications of those meeting the statutory qualifications to the board.

E. Eliminate.

F. Renumber as 5 - no content change.

Seconded by Goding.

Considerable discussion ensued regarding what role the Executive Committee should play in the selection of potential candidates for a board vacancy, as well as what information should or should not be requested from those applying for the vacated position.

Regier made the motion (Motion #10) to refer Operating Policy No. 3 back to the Executive Committee. Seconded by Reichlinger. Question called on the motion to refer back to committee. Motion carried.

BUDGET COMMITTEE MEETING REPORT
Goding gave a report on the Budget, Planning & Legislative Committee meeting held December 15, 1992 and reviewed the committee report as distributed.

NARD BUILDING FUND The NARD
Building Fund now has $118,376.33 for the purchase of office space for the Association. The NARD has just leased new office space for three years because the option of purchasing the existing space was too expensive. In order to insure that the fund is used in a reasonable time, for the purchase of an office, a deadline should be set.

Goding made the motion (Motion #15) that the District recommend to the NARD that a deadline of November 30, 1995 be established, by NARD board motion, for that board to decide to purchase office space or return the building funds to the districts. Seconded by Dickinson. Question called. Motion carried.

SMALL DAMS PROGRAM - NEW APPLICATIONS

Applications for small dam construction have been received from Roger Pittard in Fillmore County and Maurice Salmen in York County. The Pittard dam would be located 1 mile north and 1 ½ miles west of Geneva; the drainage area is 56 acres and conservation storage is 3 acre feet. The Salmen dam would be located in York County and would be located 3 miles west and 1 mile north of Lushton; the drainage area is 323 acres and conservation storage is 18 acre feet. Both dams would be conventional earth fill with three to one side slopes and would have either corrugated steel or PVC outlets.

Hansen made the motion (Motion #6) that the small dams program application from Roger Pittard, reviewed by the committee, be approved as eligible for cost-share. Seconded by Burke. There was concern expressed by some of the board members about the amount of benefit derived from the Pittard structure. They felt the cost per acre foot of storage was too high.

Bitner reminded the board that the small dams policy does not state that there will be any benefit to cost analysis done. If the project falls under the $37,500 limit, is not a high hazard structure, and is within the program guidelines then the application is brought to the board for approval. The two applications being considered meet the guidelines of the small dams program.

Hansen told the board that if they did not like the small dams program policy then they should change the policy, but for the present, he felt that the board should act based on the existing policy. Question called on the motion. Motion carried.

EAST BLUE RIVER WATER STUDY PROPOSAL
The Water Committee reviewed the Corps of Engineers proposal for a study of rural water supply alternatives in the area of the Upper Big Blue NRD east of the Big Blue River in parts of Seward and Butler Counties. The District was notified by letter from the City of Seward that they would support the Corps efforts if the study were conducted, but that they could not contribute to the local share of the study cost. The Village of Bee had earlier expressed interest in the study, however, they have been included in a similar study currently being sponsored by the Lower Platte South NRD. The total study cost would be $35,250. The local share would be $10,575; a 70/30 split.

Reichlinger made the motion (Motion #7) that the District not enter into the agreement with the Corps of Engineers for the Rural Water Supply and Distribution Study of the East Blue River Area. Seconded by Volkmer. Question called. Motion carried.

EXECUTIVE COMMITTEE MEETING REPORT
Oswald gave a report on the Executive Committee meeting held September 8, 1992 and reviewed, the committee report as distributed.

OFFICE EQUIPMENT - COMPUTER
A computer purchase has been budgeted for in the FY 93 budget to be funded with eighty percent federal money from the Recharge Project grant. The staff recommends that a new 386 computer be purchased for $2,399 from Computer Spectrum, Inc. of Aurora. The new 386 is to be dedicated to the Water Department for use principally on the Recharge Project and funded through that, project grant.
Goding inquired about whether or not any other quotes had been sought for price comparison. Staff indicated that no other quotes had been obtained, but that they felt this was a reasonable quote for the equipment needed. Goding requested that in the future at least one other quote be obtained.

Oswald made the motion (Motion #9) that the District purchase a CSI 386/SX 25 computer for $2,399.00, plus tax, from Computer Spectrum, Inc., Aurora, Nebraska. Seconded by Hanson. Question called. Motion carried.

UPPER REPUBLICAN NRD LEGAL DEFENSE FUND REQUEST
The Upper Republican NRD's enforcement of the control area provisions of the Nebraska Groundwater Management Act has been challenged in court. The district won their case at the district court level. That decision is on appeal to the Nebraska Supreme Court.

In July the Upper Republican requested assistance from the NARD legal defense fund. No specific amount has been requested. The NARD board will consider this request at their September meeting. Reichlinger made the motion (Motion #12) that the district support the Upper Republican NRD legal defense fund request. Seconded by Burke. Question called. Motion carried.

CONTROL AREA PERMITS FOR MONITORING WELLS
Up to now the district has not considered monitoring wells to fall under the permitting requirements simply because neither we, nor any other NRD, thought of it. Recently, however, the Department of Water Resources told a group of well drillers and consultants that wells such as those drilled around gas stations, landfills, etc., that are to be pumped to test water quality, or to clean up contamination, do require permits if they are in a control or management area.

The Central Platte NRD was the first district contacted by Geotechnical Services asking how they planned to handle existing wells drilled without permits. They have also contacted us.

In July the Central Platte NRD adopted the policy that they will waive the normal $250 late permit fee for late permits for all wells until September 30, 1992 to give the NRD and the monitoring well owners the opportunity to correct this oversight. So as not to discriminate, the policy applies to all wells. After that date the $250 late fee will be accessed for late permits.

Reichlinger made the motion (Motion #13) that the district waive the $250 late permit fee for monitoring wells for applications received from August 21 through October 31, 1992. Such late permits submitted during this period must pay the regular permit fee of $17.50. Seconded by Anderson. Question called. Motion carried.

AQWACAP PROGRAM MODIFICATION
Currently AQWACAP applications approved by the board are authorized for 90 days from the date of approval. If the well abandonment is not completed in this amount of time, the application is cancelled. This policy has caused some problems with applications that were made this spring. The combination of field work, wet weather, and growing crops have prevented completion of some abandonments. The staff has granted some extensions, but this caused more paperwork and unnecessary program administration.

Reichlinger made the motion (Motion #16) that three expiration dates be established for the program as follows: Applications approved April - September would expire December 31; applications approved October - December would expire April 30; applications approved January - March would expire September 30. Seconded by Goding. Question called. Motion carried.

YORK GROUNDWATER RECHARGE DEMONSTRATION PROJECT - UNL COOPERATIVE AGREEMENT
DESCRIPTION OF WORK:
A. to map the Recharge Lake drainage area relative to soil type, land use and selected practices on crop acreage.
B. to identify weeds present and weed control methods presently being used.
C. to identify tillage, irrigation, fertilizer, insect control, and other practices currently being
used.
D. to identify farm operators' attitudes and knowledge about water quality issues and their opinions about voluntary, regulatory, or cost-share programs available to improve or maintain water quality.

The cost of this work is estimated to be $6,000. The U.S. Bureau of Reclamation has agreed to pay 80% of this cost.

Reichlinger made the motion (Motion #17) to approve the cooperative agreement between the district and Board of Regents University of Nebraska. Seconded by Burke. Question called. Motion carried.

GRANT APPLICATIONS FOR RECREATION FACILITIES AT PIONEER TRAILS AND RECHARGE LAKE
There are two grant funds to which the district can apply. They both require the district to have 50 percent matching funds available. The Nebraska Recreation and Park Association fund has a limit of $1,000 but may be used at each of the recreation areas. The limiting factor for the Land and Water Conservation is the amount of money budgeted by the NRD for the FY 93 construction at Pioneer Trails.

Anderson made the motion (Motion #21) that the staff prepare applications for the following grants.

PIioneer Trails

Grant 1
That the Upper Big Blue Natural Resources District apply to the Nebraska Game and Parks Commission for a 50 percent matching grant of $24,000 from the Land and Water Conservation Fund. This grant is to be used for Phase II construction at the Pioneer Recreation Area. The NRD would be responsible for $24,000 in matching funds.

Grant 2
That the Upper Big Blue Natural Resources District apply to the Nebraska Recreation and Park Association for a 50 percent matching grant of $1,000 from the Nebraska Recreation and Park Association Development Program. This grant is to be used for construction of a foot bridge at the Pioneer Trails Recreation Area under Phase II. The NRD would be responsible for $8,000 in matching funds.

YORK GROUNDWATER RECHARGE DEMONSTRATION PROJECT

Grant 3
That the Upper Big Blue Natural Resources District apply to the Nebraska Recreation and Park
Association for a 50 percent matching grant of $1,000 from the Nebraska Recreation and Park Association Development Program. This grant is to be used for construction of an accessible outhouse at the Recharge Lake Recreation Area. The NRD would be responsible for $5,000 in matching funds.

ROLL CALL:
16 members were present during roll call; Goding was absent.

NOTICE OF PUBLIC MEETING:
A copy of the agenda was sent to each member as notice of this public meeting. Public notification was made by a "Notice of Public Meeting" published July 23, 1992 in the York News-Times. A current agenda is kept on file for public inspection.

Chairman Larry Moore briefed the board members, and members of the public who were present, about why he had called the special meeting.

Moore was contacted by Ray Burke on Tuesday, July 21st regarding the procedure necessary to call a special meeting of the board. Moore informed Burke that it was his belief that a special meeting
could be called at the request of any three board members.

On Wednesday afternoon Moore received a letter from seven board members requesting that a special board meeting be called for the purpose of reconsidering the Upper Big Blue NRD's testimony to be presented to DEQ at the SPA hearing August 3-4-5, 1992.

Following receipt of this letter Chairman Moore had notice sent to all NRD directors, as well as the York News-Times, that a special meeting to reconsider the SPA testimony would be held on July 28, 1992 in the NRD office at York.

Moore instructed the board, and the public, that the purpose of this meeting tonight was not to designate a Special Protection Area; the only item to be discussed tonight was the board's position on SPA testimony at the hearings to be held next week.

Moore advised the public that the change in location was made because of concern expressed by several of the board members that the regular meeting room might not be large enough to accommodate those wishing to attend tonight’s meeting.

Moore asked if there was a motion from the floor to reconsider.

Anderson made the motion (Motion #1) to reconsider the SPA testimony adopted July 16, 1992. Seconded by Burke. Question called. Motion failed.

Testimony
before the Nebraska Department of Environmental Quality
Upper Big Blue Natural Resources District
Special Protection Area Hearing
August 3, 4, 5, 1992

My name is Larry Moore. I am the Chairman of the Board for the Upper Big Blue Natural Resources District.

On behalf of the district, I want to thank Director Wood and his staff for this opportunity. I also want to thank the department staff for their efforts in conducting the special protection area studies in the Upper Big Blue NRD.

The district’s board of directors feels strongly that public input to the Special Protection Area process is extremely important. We encourage others here to take this opportunity to provide constructive input to the Director and to the district.

Water quality concerns everyone. The district has, through its actions, long promoted the philosophy that, wherever possible, preventing groundwater contamination is preferable to trying to clean it up.

We have already begun efforts to inform the public of the need to prevent groundwater contamination and to promote methods of accomplishing it. The district and the Blue River Association of Groundwater Conservation Districts have been collecting groundwater nitrate data since 1980. The district is a cosponsor and active participant in the Mid-Nebraska Water Quality Demonstration Project. This is a five-year program, in cooperation with three other NRDs, state agencies, federal agencies and area farmers. The project includes approximately thirty demonstration fields set up to show the public the results of the best management practices, such as nitrogen management, irrigation water management and integrated pest management.

The district has a long history of promoting water conservation. Most of the Upper Big Blue NRD has been in a control area since 1977. We have sponsored various demonstrations of traditional methods and new inventions in water conservation. Cost-share assistance has been available for best management practices, such as irrigation water reuse pits and buried return lines for several years. In FY 92, the board of directors authorized cost-share assistance for surge valves. For FY 93, the Board has authorized increased funding of this program. Our Information and Education Department works with teachers, schools, civic groups, farm organizations and other groups to promote awareness of both water quantity and water quality concerns. The district newsletter and other publications provide information on the subject.

The Board of Directors asks the Director to consider the district’s education and cost-share programs previously outlined. We also ask the director to note figure 14 on page 28 of the Special Protection Area study of the western portion of the district. Figure 14 shows that nitrate levels in the
area have declined almost 20 percent over the past three years. Paragraph 7 on page 33 of the same study also indicated that point source contamination may be influencing nitrate levels. In view of these factors the board urges the Director not to declare a Special Protection Area at this time. The district will actively continue to promote the programs it has started and continue groundwater monitoring to assess the effectiveness of these programs.

In the event the Director does decide to declare a Special Protection Area, the Board would like the Director to keep in mind that the geology of the area is complex and variable. Therefore, we feel that trying to exclude areas that may not currently show high nitrate levels would make managing the Special Protection Area difficult. If the Director feels that evidence supports the declaration of a Special Protection Area, the board would encourage him to include the entire district in the designation.

The district would point out that a Special Protection Area is not the solution to all groundwater quality problems in the district. Communities and individuals will continue to be faced with point source and well construction problems in the future, despite the degree of success of a Special Protection Area.

We want to make it clear to the Director that the district is committed to the execution of its duties under the law. If a Special Protection Area is declared, we will make every effort to make the Special Protection Area successful, as well as fair and reasonable. To make this happen, the district will need public support and input. The district will ask for help from many organizations and individuals throughout the district to develop the action plan. We have some concern over the 180-day time allowed for development of an action plan. It is our first and foremost wish that the action plan be the best possible to serve the needs of the citizens, both rural and urban.

I want to thank you again for the time to express our desire to continue the good working relationship that we now have with the department.

PROJECTS COMMITTEE MEETING REPORT:  
Regier gave a report on the Projects Committee meeting held July 6, 1992 and reviewed the committee report as distributed.  

SUTTON FLOOD MITIGATION PROJECT:  
Representatives from the City of Sutton were present at the Projects Committee meeting to request financial assistance on design and construction of the Sutton Area Flood Mitigation Project. The proposed construction would include clearing and realignment of the School Creek channel within Sutton, levees on both banks of School Creek extending from the wastewater treatment plant to James Avenue, removal and replacement of the James Avenue and Ash Street bridges, upgrading one culvert under the Burlington Northern Railroad and construction of a linear parkway along the levee system.  

Total project cost is $880,000. Funding from other sources would total $372,500, leaving an unfunded balance of $507,500.  

The district previously agreed to fund 12.5 percent of the portion of project cost ($100,000) which was eligible for a FEMA grant. Sutton has applied to FEMA for a grant that would fund 75 percent of the $100,000. The local share (to be split equally between Sutton and the district) would be 25 percent. The district share would be $12,500.  

Mayor Ulmer presented a resolution, from the Sutton City Council, requesting that the District provide additional cost-share at the rate of 50 percent of the unfunded balance ($507,500), not to exceed $250,000.  

Regier made the motion (Motion #2) that the district accept the City of Sutton proposal, dated June 29, 1992, for cost-share on the Sutton Flood Mitigation Project, excluding the cost of the box culvert ($150,000) under the Burlington Northern Railroad, and that the remaining anticipated local share, $357,500, be cost-shared at the rate of 50 percent ($178,500) by the district over the fiscal years 1993, 1994, and 1995, and that the district's share not exceed $178,750. Seconded by Volkmer.  

There was concern expressed that the $357,500 local share and the $178,500 district share stated in the previous motion did not reflect the 25 percent ($25,000) of the local share of the FEMA grant and the 50 percent ($12,500) district share of that 25 percent.  

Dickinson amended the motion to make the motion (Motion #3) to change the dollar amounts to $382,500 and $191,250. Seconded by Goding. Question called on the amendment. Amendment carried.

SPA HEARING TESTIMONY:
The Nebraska Department of Environmental Quality has set the SPA hearing for August 3-4-5, 1992.

After reviewing the draft testimony for the August SPA hearing, the Water Committee recommended that the board authorize Larry Moore to present the testimony.

Reichlinger made the motion (Motion #12) to approve the testimony for the August SPA hearing, as attached. Seconded by Ediger.

After the Water Committee meeting, and prior to the board meeting, Ehler's prepared, and had distributed, his own revised draft of the testimony he would like to see presented at the August SPA hearing. A copy is attached.

Ehlers amended the motion to make the motion (Motion #13) to add the following words after paragraph six of the Committee's draft SPA testimony:

"The Board of Directors would, considering the educational measures outlined earlier and the nitrate declines outlined in Figure 14, Page 28 of the Western Portion of the SPA study and the possibility of influence of point source contamination as referred to in Paragraph 5 on Page 33 of the same document, urge the Director not to declare an SPA at this time. In view of the nearly 20 percent decline in average nitrate-nitrogen levels previously referred to, the Board would continue monitoring of the Upper Big Blue NRD over the next few years to see if these measures continue to affect declines in the average nitrate-nitrogen levels."

"In the event the Director does decide to declare an SPA, the Board would like the Director to keep in mind the geology of the area is complex and variable." Seconded by Volkmer. Question called on the amendment. Amendment failed.

PROJECTS COMMITTEE MEETING REPORT:
Regier gave a report on the Projects Committee meeting held May 11, 1992 and reviewed the committee report as distributed.

LAND TREATMENT PROGRAM - SURGE VALVE FUNDING:
The Projects Committee discussed removing the $20,000 cost-share funding limit for surge
valve practice, however the matter failed to advance from committee.

Ediger told the board that he had been approached by several landowners who expressed interest in obtaining cost-share money for surge valves, but had, been told there weren't funds available for this practice.

He felt that since there were still unobligated funds in the land treatment line item that this money should be used to fund surge valves.

Both Goding and Hansen reminded the board that when they approved the $20,000 for funding surge valves it was the board's intent that this be a one-time program.

**Ediger made the motion (Motion #2) to allow the balance of the unobligated NRD land treatment funds to be used to fund surge valves in excess of the $20,000 limit for this practice. Seconded by Burke. Question called. Motion failed.**

**PROJECT 28-10-3E DARGELOH DAM:**

The ASCS has stated that they will require repayment of Conservation Reserve Program (CRP) payments previously made to Richard Dargeloh if dam construction alters the ability of CRP acres to be farmed after the CRP contract is completed. The District is appealing this ruling on grounds that the affected acres, currently in the CRP program, will be converted to grass land to enhance erosion control and provide wildlife habitat. The ASCS rules on this issue can have more than one
Regier made the motion (Motion #5) that further action on Project 2810-3E be deferred until the ASCS waives the requirement of refunding previous payments for CRP acres affected by construction. Seconded by Goding. Question called. Motion carried.

BUDGET, PLANNING & LEGISLATIVE COMMITTEE MEETING REPORT:
Goding gave a report on the Budget, Planning & Legislative Committee meeting held May 11, 1992 and reviewed the committee report as distributed.

NARD BUDGET:
The NARD Budget Committee proposed an initial budget of $261,608 (which would require a 4.6% dues increase) to the Association. The NARD I & E Committee proposed an additional $9,000 be added to the budget, for a total of $270,608 (which would mean a 10.2% dues increase). The I & E Committee proposal was tentatively adopted by the NARD in March on a 12-8 vote.

Goding made the motion (Motion #6) that the Upper Big Blue NRD support the NARD Budget Committee proposed budget, with a dues increase of no more than 2 percent. Seconded by Hansen. Question called. Motion carried.

SURVEY EQUIPMENT:
Bitner requested that the district replace the transit used for surveying. The Lietz electronic partial station transit was purchased in May of 1983 for $7,669.00 plus $1,220.00 of rods, prisms, and tripods. The Transit Works in Lincoln will allow $9,500.00 trade-in for the partial station transit if the district purchases an electronic total station transit for $15,995.00 + tax ($9,500 trade-in plus $6,495 cash + tax). Half of the cost should be charged to the Recharge Project, with the U.S. Bureau of Reclamation paying 80 percent of that ($2,598 from the USBR and $3,897 from the district).

Oswald made the motion (Motion #17) to purchase a Lietz total station electronic survey instrument from Transit Works of Lincoln, Nebraska for $15,995.00 plus tax ($9,500 trade-in plus $6,495.00 cash). Seconded by Anderson. Question called. Motion carried.

SPECIAL PROTECTION AREA - NDEC REPORT:
Nebraska Department of Environmental of Control (NDEC), Jeff Gottula presented the results of the Upper Big Blue Special Protection Area Study. The study concludes that non point groundwater contamination is occurring or is likely to occur across the entire NRD. NDEC staff has recommended that the entire Upper Big Blue NRD be designated an SPA.

Dick Ehrman, Manager of the SPA Program for NDEC, reviewed the process that must be followed from this point forward. A public hearing or hearings must be held within 120 days from the date that the report was released (April 23, 1992). If the Director of NDEC declares an SPA, the District
Board of Director’s Meeting

has six months to prepare an action plan.

NDEC staff answered several questions from the Board and others present at the meeting.

PROJECTS COMMITTEE MEETING REPORT:
Hansen gave a report on the Projects Committee meeting held April 13, 1992 and reviewed the committee report as distributed.

LAND TREATMENT PROGRAM - NSWCP FUNDS - NEW APPLICATIONS:

SCHOOL CREEK WATERSHED - SUTTON FLOOD MITIGATION:
Staff presented to the committee results of the E.A. Engineering study of flood mitigation options at Sutton. The study focused on measures which could be taken within Sutton to relieve flood damage to residential and commercial properties. Proposed improvements include widening and reshaping the School Creek channel, rebuilding one bridge and several culverts, construction of levees along School Creek and construction of stormwater detention basins. Project cost estimates vary from $416,000 to $1,347,000 depending upon what level of mitigation Sutton decides to implement.

E.A. Engineering has requested that their fee for preparing the Sutton Flood Mitigation Study be increased to $31,530. This is an increase of $1,530. The additional fee is being requested to cover costs associated with hydrology information they prepared to support the Sutton FEMA grant application.

Hansen made the motion (Motion #8) that the District authorize, an increase of $1,530 in the E.A. Engineering Contract for preparing the Sutton Flood Mitigation Study, and that the approval of the increase be contingent upon the City of Sutton agreeing to pay their 50 percent share. Seconded by Anderson. Question called. Motion carried.

ROGER BAILEY DAM - PROJECT 18-09-01W:
Bids for construction of modifications to the Bailey Dam were opened on April 8. A summary of the engineer's estimate and bids received were as follows:

<table>
<thead>
<tr>
<th>Engineer's Estimate</th>
<th>$16,070.72</th>

<tbody>
<tr>
<td>Slepicka Brothers</td>
<td>$10,733.97</td>
</tr>
<tr>
<td>VanKirk Brothers</td>
<td>$16,373.52</td>
</tr>
</tbody>
</table>

The final cost will be approximately $2,000 higher than the bid price since an undetermined quantity of excavated muck will be removed.

Hansen made the motion (Motion #10) that Slepicka Brothers be awarded the contract for construction of modifications to the Bailey Dam, Project 18-09-01W, in accordance with their bid of $10,733.97. Seconded by Volkmer. Question called. Motion carried.

NEW PROGRAM FOR SMALL DAMS:
Hansen made the motion (Motion #11) that the District's Board of Directors adopt a new program to promote construction of small dams and that the program be structured as follows:

1. The District would share the cost of dam construction with landowners in accordance with the following schedule:

<table>
<thead>
<tr>
<th>Actual Project Cost</th>
<th>Landowner Share</th>
<th>District Share</th>
</tr>
</thead>
<tbody>
<tr>
<td>$</td>
<td>$</td>
<td>$</td>
</tr>
<tr>
<td>Less than 7,500</td>

<td>50</td>
</tr>
<tr>
<td>7,500 to 15,000</td>
<td>40</td>
<td>60</td>
</tr>
<tr>
<td>15,000 to 22,500</td>
<td>30</td>
<td>70</td>
</tr>
<tr>
<td>22,500 to 30,000</td>
<td>20</td>
<td>80</td>
</tr>
<tr>
<td>30,000 to 37,500</td>
<td>10</td>
<td>90</td>
</tr>
<tr>
<td>Greater than 37,500</td>
<td>0</td>
<td>100</td>
</tr>
</tbody>
</table>

2. Actual Project Cost will be based on the final contract price including change orders.

3. For dams costing less than $37,500 the landowner would obtain easements, own the dam, operate and maintain the dam and own the water right. These responsibilities
would be the District's for dams costing more than $37,500.

4. The District would perform design, obtain water rights from DWR, advertise for bids, administer construction contracts and inspect construction.

5. Contractors would be required to provide bid bond, payment bond and performance bond.

6. Funding of dams built under this program will be budgeted in the General Fund, Project Construction line item.

The board had considerable discussion on the amount of cost-share and the merits of such a program.

Ehlers made the motion (Motion #12) to refer the New Program for Small Dams (Motion #11), to the Projects Committee. Seconded by Dickinson. Motion carried.

**DESIGN PROJECT PRIORITIES - CURRENT LIST**
The Projects Committee reviewed the current list of projects being proposed for design by the district. Staff recommended that Projects 12-13-01E, 35-11-02W and 33-13-03W be suspended due to lack of landowner interest. It was also recommended that Project 33-12-01W be suspended since York County has built a bridge which eliminates the need for a flood control dam at this site. Staff requested that Project 23-10-01E, Sleepy Hollow Creek, be removed from the project list, but be kept as a District wildlife habitat conservation project.

Hansen made the motion (Motion #4) that Projects 12-13-01E, 3511-02W, 33-13-03W and 33-12-01W be suspended. Seconded by Goding. Question called. Motion carried.

**DESIGN PROJECT PRIORITIES - PROPOSED LIST**
The Projects Committee reviewed the remaining proposed design projects and considered priority
Staff presented a proposed construction budget cashflow, projected to the year 2020, to complete the projects on the current list. The committee discussed the viability of large projects with respect to the district's tax levy. It is estimated that the district currently contributes an average of $90,000 per year toward construction of projects. In order to construct the projects currently on the priority list, in addition to other small projects which will be added to the list in the future, the district would need to budget $200,000 to $400,000 per year.

Hansen made the motion (motion #6) that the District's list of Design Project priorities be adopted as follows:

BUDGET, PLANNING & LEGISLATIVE COMMITTEE MEETING REPORT
Goding gave a report on the Budget, Planning & Legislative Committee meeting held March 10, 1992 and reviewed the committee report as distributed.

Turnbull explained that he had been approached by Mike Bair, Aurora City Administrator, about NRD assistance in solid waste planning. Hamilton, Merrick, Polk and York Counties and three cities in Clay County have joined together to study a regional landfill. Olson & Associates are being hired to conduct an analysis to select a site for a regional solid waste disposal facility for urban and rural residents of the area. The population of the four county region is about 40,000. The scope of work includes:

1 - Assessment of need
2 - Projected waste volumes - 30 year period
3 - Preliminary site screening
   --initially five sites to be considered to be narrowed down to two sites
4 - Preliminary landfill site selection including geotechnical work on two sites
5 - Olson & Associates final site recommendation

The study is to be paid for by each county and community participating on a per capita basis. No requests have been made for NRD funds.

The NRD is being asked to assist in the regional solid waste planning by:
1 - Coordinating meetings
2 - Handling billings from consultants
3 - Collecting and disbursing funds from counties and communities to consultants
4 - Providing technical advice on water quality and resource concerns
5 - Being active in recycling planning
6 - Providing staff and clerical services to a steering committee of the counties and communities
Turnbull recommended that the district provide such assistance to the group without charge.

Goding made the motion (Motion #18) that the District offer its services to Hamilton, Merrick, Polk and York Counties and participating communities including Clay Center, Harvard and Sutton, for regional solid waste planning. Seconded by Burke. Question called. Motion carried.

**SCS CONSERVATION PLAN COMPLIANCE**
Turnbull reviewed the SCS/NARD draft procedure for NRD enforcement of farm plans.

A lengthy discussion followed regarding the role the NRD should take in the enforcement of conservation plan compliance. The general consensus of the board and staff was that the NRD should not become involved in the review process or enforcement of the plans.

Goding made the motion (Motion #20) that the District does not agree with being involved in compliance plan reviews, because it is a federal government act, and therefore a responsibility of ASCS and SCS. The final determination should be made by a federal agency. Seconded by Ehlers.

Ehlers amended the motion to make the motion (Motion #21) to strike the words "does not agree with being" and insert the words "will not be" to make the motion read as follows: "that the district will not be involved in compliance plan reviews, because it is a federal government act, and therefore a responsibility of ASCS and SCS. The final determination should be made by a federal agency." Seconded by Volkmer. Question called on the amendment. Amendment carried.

**LEGISLATION - LB 1063**
The exemption the NRDs received last year to the lid placed on political subdivisions would no longer exist in LB 1063.

At their March 10, 1992 meeting the Budget, Planning & Legislative Committee passed a recommendation that read as follows: "that the district not oppose a lid on budgeted taxes in the short term, provided that the NRDs be able to make up any shortfall because of the loss of government subdivision aid; and further, that any lid on total costs and/or total revenues be opposed".

Turnbull advised the board that since the time of the committee meeting there has been an amendment to LB 1063 that removes NRDs from the list of political subdivisions subject to a lid. As a result he recommended that the board not take any action on the Budget Committee's recommendation at this time.

**EDUCATION GRANT PROGRAM**
During the past few years, the district has received requests from teachers for financial assistance for registration fees for environmental education conferences and workshops. Examples of these conferences and workshops include Ag in the Classroom, Project Wild, Project Aquatic Wild and the Nebraska Environmental Education Conference. The committee directed the staff to review the policies and programs of other districts and develop a program for this NRD. The following program
is the committee's recommendation to the board.
1. That the program be open to any teacher or substitute teacher from the Upper Big Blue NRD.
2. That applications be accepted on a first come, first served basis and that each teacher be limited to assistance for one event per year.
3. That the application be in the form of a written request to the district identifying the workshop or conference and the amount of the registration fee.
4. That the SNEES be excluded from this program because of the district's current level of support for the seminar.
5. That no tuition or mileage be paid under this program.
6. If the registration fee is $50 or less, the district will pay 100 percent of the cost.
7. If the registration fee is greater than $50, the district will pay $50 plus 50 percent of the fee above $50. (Example: if the fee is $80, the district would pay $65.) The maximum amount that will be paid by the district per teacher per conference is $100.

The RBJV is a cooperative project sponsored by Ducks Unlimited, the Nebraska Game and Parks Commission and the U.S. Fish and Wildlife Service. The goals of the project are as follows:

To protect, restore or create 25,000 acres of wetlands in the Rainwater Basin, an area in south-central Nebraska that includes all or parts of 17 counties.

1. To protect 10,000 acres of existing wetlands
   A. 5,000 acres on private lands
   B. 5,000 acres purchased or by easement from willing sellers

2. To restore or protect 12,000 acres of degraded or destroyed wetlands
   A. 6,000 acres on private lands
   B. 6,000 acres purchased or by easement from willing sellers

3. To create 3,000 acres of new wetlands
   A. 1,500 acres on private land
   B. 1,500 acres on public land

POSSIBLE WATER SUPPLY STUDY FOR EASTERN SEWARD COUNTY:
Several months ago, members of the Seward City Council had met with John and Rod to discuss what assistance the NRD could be in Seward's effort to secure an adequate supply of good quality water. The Village of Bee has had difficulty finding and keeping good quality water. Several rural residents east of the Big Blue River complained about the quality of water. The NRD has found
several wells in the area with very high nitrates. The Lower Platte South NRD has applied to the Corps of Engineers for the Water Resource's Development Act, Section 22, funds for a water supply study in Western Lancaster and Eastern Seward Counties bordering the Upper Big Blue NRD. Rod spoke with Larry Buss at the Corps of Engineers, who indicated that if the Upper Big Blue NRD was interested in adding part of this NRD to the study, or running a concurrent study, funds may be available. Reichlinger made the motion (Motion #13) that the staff be authorized to work with the interested communities and individuals in Eastern Seward County to prepare a request to the Corps of Engineers for a scope of work and cost estimate for EL Section 22 water supply study. Seconded by Burke. Question called. Motion carried.

PROJECT 24-11-7W, AURORA FLOOD CONTROL PROJECT
This project currently has a priority of #3 on the active projects list. The project would be designed as a flood control dam and would provide some recreation and ground water recharge. Estimates of the quantity of each benefit have not been prepared at this time.

In order to continue the planning process, staff has recommended that aerial photography and mapping be done to assist with dam site selection, determination of flood way and identification of lands affected by reservoir conservation pool and flood pool.

Proposals received for providing aerial photography and mapping are as follows:

**PROJECT 18-9-1W, BAILEY DAM REHABILITATION PROJECT**

Final design for rehabilitation of Bailey Dam has been completed. Project cost is estimated to be $25,000. The Projects Committee discussed possible cost-share between the District and Roger Bailey and decided that a 60/40 split should be proposed.

Regier made the motion (Motion #16) that the district cost-share with Roger Bailey on the cost of rehabilitating the Bailey dam, Project 18-9-1W, and that the District pay 60 percent and Roger Bailey pay 40 percent of the construction cost. Seconded by Volkmer.

Turnbull advised the board that following the committee meeting he and Bitner met with Roger Bailey to discuss the final design for Bailey Dam and proposed 60/40 cost-share split. Bailey approved of the design changes but felt 40 percent of the cost was more than he was willing to put into the rehabilitation of the dam.

Bailey is scheduled to meet with the Projects Committee in February to attempt to come to an agreement on the cost.
Ehlers made the motion (Motion #17) to refer back to the Projects Committee. Seconded by Dickinson. Question called. Motion carried.

**LEGISLATIVE BILLS**

**LB 242: IRRIGATION WATER ON PUBLIC ROADS**
Present Nebraska law prevents the diversion of water onto or across a public road so as to saturate, wash, or impair the maintenance or passability of the road. LB 242 would expand the prohibition to include irrigation water flowing or falling upon the road. The bill would also eliminate the current exemption for mechanical malfunctions and for damage caused by a sprinkler because of adverse weather conditions. Mechanical malfunctions and weather conditions would be considered by the court as it determined the appropriate sentence, but would not be a defense to prosecution.

Dickinson made the motion (Motion #20) to oppose LB 242. Seconded by Volkmer. Question called. Motion carried.

**LB 288: OPEN MEETINGS LAW**
LB 288 would amend the Open Meetings Law in several ways. First, it would provide that imminent litigation, not just current litigation, would be an acceptable reason for a public body to meet in closed session. Secondly, the bill would define what constitutes "formal action" for purposes of determining what must be done in open session. Formal action would be defined to mean 11 . . . a collective decision or a collective commitment or promise to make a decision on any question, motion, proposal, resolution, order or ordinance or formation of a position or policy." Lastly, the bill would increase the penalties for knowing violations of the act. A first offense would be a Class IV misdemeanor and subsequent offenses would be Class III misdemeanors. Currently all offenses are considered Class 17 offenses.

Volkmer made the motion (Motion #21) to oppose LB 288 in its entirety. Seconded by Goding. Question called. Motion carried.

**LB 306: CONJUNCTIVE USE AND INSTREAM FLOW MODIFICATIONS**
LB 306 is the first bill concerning the interrelationship between ground water and surface water. The bill is on general file with pending committee amendments. Other amendments have been prepared and may be offered when the bill reaches the debate stage on general file.
In its original form, LB 306 provides that ground water located within one mile of a natural stream is declared subject to appropriation under the surface water statutes. Ground water located more than one mile from a natural stream would be subject to such appropriation if it was "shown to be influenced by stream flow." To avoid making a public water supplier well field withdrawal an interbasin transfer under state law (e.g., MUD's well field on the Platte), the interbasin transfer statutes would be amended to exclude such transfers from the definition of interbasin transfer. Also, the instream flow statutes would be modified to add public water supply as a valid purpose for instream appropriations; public water suppliers could request such appropriations.

**LB 891: APPROPRIATION OF GROUND WATER/INSTREAM APPROPRIATIONS FOR PUBLIC WATER SUPPLY; INTRODUCED BY SENATOR ROD JOHNSON**

This bill is the same as LB 306 including the pending committee amendments and the same as Request #1319. It would declare that ground water within one mile of a natural stream is subject to appropriation except where the Director of DWR determined that the ground water was not interrelated with the natural stream. Ground water located more than one mile from the natural stream would be declared subject to appropriation if it could be shown that it was influenced by stream flow. The bill also says that "nothing in the section shall be construed to give surface water users a preference over ground water users or to authorize an automatic better right for surface water users based on priority of appropriation over ground water users based on the date of well installation or first use."

Siebert made the motion (Motion #22) to oppose LB 306 and LB 891. Seconded by Volkmer. Question called. Motion carried.

**LB 453: ENTRY UPON LAND**

LB 453 authorizes counties, cities, villages, and natural resources districts to enter upon property to make surveys, examinations, investigations and tests to acquire data. No damages would be recoverable solely because a trespass had occurred, but the municipality or district would be liable for actual damages. The bill would also require 15 days advance notice by mail or personal delivery to the property owner.

Goding made the motion (Motion #23) to oppose LB 453. Seconded by Ehlers.

Following considerable discussion Goding withdrew his motion with the approval of Ehlers.

**LB 489: UNIFORM PROPERTY ACQUISITION HEARINGS**

All entities subject to the uniform property acquisition statutes are currently required to hold a public hearing at least 30 days prior to purchasing land for a project even if the entity does not plan to use
an eminent domain or has no authority for an eminent domain. LB 489 would repeal that requirement in those situations. The bill would also exempt the City of Lincoln from application of the uniform property acquisition statutes if the proposed acquisition was to be within the corporate limits or involved 10 or fewer separately owned tracts.

Reichlinger made the motion (Motion #24) to oppose LB 489. Seconded by Goding. Question called. Motion carried.

**REQUEST FOR A GROUNDWATER TRANSFER VARIANCE**
Gerald Stengel of rural Shickley was present at the Water Committee meeting to request a variance to the District's Control Area Regulation concerning groundwater transfer (Rule 5, Chapter 10).

Mr. Stengel currently irrigates over 396 acres under three center pivots in the following legals: the SE 1/4 of Section 5 and the S 1/2 of Section 4, Township 6 North, Range 4 West, Fillmore County from a well in the NE ¼ of Section 17, Township 6 North, Range 4 West. Mr. Stengel proposed to add two more pivots 1:0 this transfer in the N 1/2 of Section 4, Township 6 North, Range 4 West, (approximately 264 acres). He indicated that he planned to grow wheat on two pivots in a rotation. He also indicated that the well in Section 17 provides approximately 1,500 gallons per minute, enough water to run the two pivots at the same time. The committee discussed the fact that the penalty for illegal transfer is no allocation for these acres. If Mr. Stengel wants to develop the two pivots and not receive any allocation, he could do so.
Reichlinger made the motion (Motion #26) that the District deny Gerald Stengel's request for a variance to Rule 5, Chapter 10 of the Control Area Rules and Regulations. Seconded by Goding.

Turnbull advised the board that if they were to grant this variance, and the Control Area Regulations were triggered and the District began allocation, Mr. Stengel would receive an additional allocation on approximately 260 acres.

The land Mr. Stengel wants to transfer water to is in an area of Fillmore County, generally west of Geneva, where there is no groundwater. Turnbull recommended that the board follow the Water Committee's recommendation. Question called on the motion. Motion carried.

**LATE PERMIT FOR DON STULKEN**
Don Stulken of Marion, Iowa has applied for a late permit for a well drilled in the SE 1/4 of the SW 1/4 of Section 15, Township 8 North, Range 9 West, Adams County. The well was drilled in 1978 as a replacement well. The old well was not registered. According to Mr. Stulken and the well driller, the old well, was more than 600 feet from the existing well. Therefore, the existing well must be treated as a new well. Except for failure to obtain a permit, this well does not violate any other NFD regulations.

Reichlinger made the motion (Motion #27) that the District grant a late permit to Donald Stulken for a well drilled in 1978 in the SE 1/4 of the W-1/4 of Section 15, Township 8 North, Range 9 West, Adams County. Seconded by Burke. Question called. Motion carried.

LANDMARK APPEAL
Steve Seglin, the District's legal counsel, reviewed the Department of Water Resources denial of the Landmark water rights applications. Possible issues that could be raised on an appeal to the Nebraska Supreme Court were discussed.

The Department of Water Resources Order was issued on December 16, 1991. The District has 30
days to file an appeal with the court.

Mac Tilberg and John VanKirk, Jr., were present at the meeting representing the Sutton Commercial Club and asked to address the board concerning the Stockham Reservoir, a component of the Landmark project.

Mac Tilberg submitted a letter from the Sutton Commercial Club which read in part "Motion by Carol VanKirk and seconded by Malcolm Tilberg to lend support for a similar structure to be built within the Upper Big Blue watershed, and to not pursue the current NRD proposal to divert Platte River water. Discussion followed in which many members voiced concern that since Platte River water permits were denied, the goal of ground water recharge within the watershed would be abandoned. This, it was felt by the group is not necessary and that an alternate structure/structures should be built on a smaller scale with local source runoff to provide reservoir recharge. With no further discussion, the motion was passed unanimously".

Staff advised Mr. Tilberg and Mr. VanKirk that a scaled-down version of the Stockham Reservoir, separate from the Landmark proposal, is currently listed as number 17 on the active Projects Priority List. The low priority number is a result of the expense of the project.

The concept has been to build the scaled-down version of the Stockham reservoir in such a fashion that if Landmark were to go ahead in the future that the structure could be enlarged to accommodate the Landmark version of the reservoir. As a result the two proposals are really not competing with each other.

Tilberg advised the board that the members of the Sutton Commercial Club were not even aware that the scaled-down version of the Stockham Reservoir was on the active priority list and requested that a letter confirming this be sent to the Commercial Club.

Goding made the motion (Motion #1) that the Department of Water Resources Order of Denial of Landmark be appealed to the State Supreme Court. Seconded by Ediger. Question called. Motion carried.

NON-POINT SOURCE MONITORING PROGRAM
Dan Fitzpatrick and Ingrid Verstraeten from the USGS presented a draft proposal for a five-year effort to develop a monitoring program for non-point groundwater contamination. The intent is to develop an adequate tool for monitoring the spatial and temporal nitrogen variations in concentrations of the NRD. The specific objectives are to:

A. Perform an evaluation of the principal aquifer systems susceptible to non-point source contamination based on existing land use, soil, geological, and hydrological information.

B. Identify acceptable monitoring sites and depths which effectively allow evaluation of nitrogen concentrations in the subsurface over time.

C. Identify frequency and optional time frames with which groundwater samples should be collected and analyzed.

D. Estimate the nitrogen species concentrations in the unsaturated zone prior to fertilizer application at representative sites.

Hansen made the motion (Motion #4) to authorize the staff to work with the USGS to develop a final
work plan and agreement for consideration by the board in January. Seconded by Jacobsen. Question called. Motion carried.

MID-NEBRASKA DEMONSTRATION PROJECT
IRRIGATION EFFICIENCY EVALUATION USING POLYSONICS FLOW METER

Andy Christiansen and Dennis Schroeder presented a proposal to the Water Committee for evaluation and education of area producers concerning water use and distribution efficiency. This project would be a joint effort between Cooperative Extension, SCS, and other ag related cooperators, with the district providing use of the electronic meter. The district would use this meter for other similar activities.

Hansen made the motion (Motion #8) to purchase a Polysonics ISTT ultrasonic meter and Stresstel ultrasonic wall thickness gauge for $8,494.50. Seconded by Burke.

Austin expressed her concern about lending out an expensive piece of equipment without a written agreement or policy regarding repairs, breakage, etc.

Turnbull felt her concerns should be addressed and this could be accomplished by drafting a simple agreement. Question called. Motion failed.

POCKET GUIDE AND FIELD RECORD BOOK

The Mid-Nebraska Project Committee has authorized the printing of 3,000 pocket guides. These provide a handy source of information and record keeping method for irrigation, fertilizer and pesticide management decisions. The committee is asking the four NRDs to contribute $1,000.00 each to the printing cost. The total printing cost is approximately $6,000.00.

Hansen made the motion (Motion #9) to contribute $1,000-00 to the printing of the Mid-Nebraska Pocket Guide and Field Record Book. Seconded by Burke. Question called. Motion carried.

OUTDOOR CLASSROOM PROGRAM
The district has had a request from Concordia College in Seward, for assistance in establishing an outdoor classroom. The district’s Outdoor Classroom Assistance Program specifically mentions elementary and junior and senior high schools as eligible. Colleges are not mentioned. The committee thinks this was probably an oversight and proposes that it be corrected.

Volkmer made the motion (Motion #17) that the Upper Big Blue NRD's Outdoor Classroom Assistance Policy be amended to replace elementary and junior and senior high schools with educational facilities and to read as follows:
The outdoor classroom is an educational program to assist students in learning about their environment. The program includes the planting of trees, shrubs and native grasses. Ponds, marshy areas and miniature water sheds may be constructed. An educational facility may design its own classroom or the NRD will give technical assistance. Almost any type of development which includes environmental factors will be acceptable. All educational facilities within the Upper Big Blue district are eligible to participate.

NNRC MEMBER - NUMBER OF TERMS
Traditionally this district and the Lower Big Blue NRD have rotated members on the Natural Resources Commission each term (four years); a gentlemen's agreement. Several past commission members feel that one four-year term is not enough to be effective. The committee suggests that it is time to move away from the traditional one term, and to let the best person be elected at the Blue Basin Caucus whenever elections are held.

Regier made the motion (Motion #22) that the Upper Big Blue NRD Board of Directors discontinue the tradition of rotating the Natural Resource Commission members with the Lower Big Blue NRD, in order to allow for election of a commission member to successive terms. PROJECTS COMMITTEE REPORT
Oswald gave a report on the Projects Committee meeting held November 8, 1993 and reviewed the committee report as distributed.

EMERGENCY WATERSHED PROTECTION PROGRAM - APPLICATIONS
Bill Gilliam, SCS, recommended six applications for cost-share assistance to clear log jambs at bridges in Hamilton and York Counties. The total cost of these applications is $16,050. The current board policy is to cost-share at the rate of 10% of the total cost on each application, not to exceed a cumulative total of $7,500.

Oswald made the motion (Motion #4) that the NRD cost-share on Emergency Watershed Protection Program applications having an actual cost of greater than $2,000 and that the NRD's cumulative cost-share not exceed $1,000 and that all work be completed by July 15, 1994. Seconded by Anderson.

Dickinson amended the motion to make the motion (Motion #5) that the word "cumulative" be stricken and that the NRD's cost-share not exceed $1,425. Seconded by Austin. Question called on the amendment. Amendment carried.

SMALL DAMS PROGRAM - PROJECT SELECTION
Staff completed a benefit to cost assessment for each Small Dam application on file. This information was then used to show each project's watershed size compared to its benefit to cost ratio. On the basis of benefits vs. cost, staff recommended that the Small Dams program be amended to require that eligible projects have a contributing drainage area of greater than 250 acres. This will eliminate projects with marginal benefit to cost ratios. Projects with less than 250 acres of contributing drainage area will still be eligible for the land treatment program.

Oswald made the motion (Motion #12) that the Small Dams program be amended to require that all eligible projects have a contributing drainage area greater than 250 acres. Seconded by Dickinson. Question called. Motion carried.

GROUNDWATER MANAGEMENT PLAN
Staff reviewed draft language that would eliminate the requirement for updating the Groundwater Management Plan if an SPA is recommended.

46-673.14 Amendment of groundwater management plan; contents; exception. Prior to July 1, 1993, each district shall amend its groundwater management plan to identify to the extent possible the levels and sources of groundwater contamination within the area, groundwater quality goals, long-term solutions necessary to prevent the levels of groundwater contaminants from becoming too high and to reduce high levels sufficiently to eliminate health hazards, and practices recommended to stabilize, reduce, and prevent the occurrence, increase, or spread of groundwater contamination. If a special groundwater quality protection area has been designated in a district as of September 6, 1991, or if Department of Environmental Quality study as required by section 47-674.04 is completed by July 1, 1993, which recommends the designation of a special groundwater quality protection area, the district shall not be required to amend its plan for the geographical area encompassed by the special protection area.

TRAILBLAZER RESOURCE CONSERVATION AND DEVELOPMENT (RC&D)
Representatives of the Webster County SCS, Webster County Extension Service and the Fillmore County Development Corporation introduced the Trailblazer RC&D. It will provide regional organization for economic development in a seven-county area. The counties involved are Clay, Fillmore, Franklin, Harlan, Nuckolls, Thayer and Webster. The Upper Big Blue NRD has been asked to join as a sponsor and adopt a resolution stating their support.

Dickinson made the motion (Motion #20) that the Upper Big Blue NRD support formation of the Trailblazer RC&D with the following resolution:

RESOLUTION 94-1
RESOLUTION OF THE UPPER BIG BLUE NATURAL RESOURCES DISTRICT, YORK, NEBRASKA, GIVING SUPPORT TO THE NEWLY ESTABLISHED RESOURCE, CONSERVATION AND DEVELOPMENT PROGRAM.

WHEREAS, on or about September 8, 1993, efforts were begun to establish a resource, conservation and development program for South Central Nebraska; and

WHEREAS, purpose of the program is to accelerate the conservation, development and use of natural resources to improve economic activity for South Central Nebraska; and

WHEREAS, the NRD board believes that this program would be a benefit to the Upper Big Blue Natural Resources District.

NOW THEREFORE, BE IT RESOLVED, by the NRD Board Chairman of the Upper Big Blue Natural Resources District:

That this body gives its support to the formation of a resource conservation and development program for South Central Nebraska.

DATED this 18th day of November 1993.

Seconded by Volkmer.

EXECUTIVE COMMITTEE REPORTS
Oswald gave a report on the Executive Committee meeting held November 10, 1993 and reviewed the committee reports as distributed.

PUBLIC INFORMATION SPECIALIST
The manager is recommending that the board authorize the creation of a new full-time position for a Public Information Specialist. The individual would be under the supervision of Prudence Sadler, and would do much of the routine information and education work. The addition of the position would allow Prudence to devote much more time to SPA activities. The position was budgeted for in the FY 94 SPA Budget, and is necessary because of the increase in education work for the Special Protection Area. The manager is recommending that the position be classified as a Grade 8 on the pay scale (currently with a minimum wage of $16,936 and a maximum of $27,098).

Jackson made the motion (Motion #23) to authorize the position of Public Information Specialist as a full-time employee, with a job classification of Grade 8; and further, to authorize the General manager to fill the position. Seconded by Burke. Question called. Motion carried.

OFFICE FURNITURE
When the Public Information Specialist position is filled, office space will need to be made and furniture purchased. It is anticipated that the district will hire a technician for the SPA work early in fiscal year 95. Furniture purchases should be made with this in mind.

Staff has recommended that Steelcase furniture be purchased to match the existing panel system.
One desk with secretarial return, work counter, two swivel chairs, and acoustical panels to separate work areas are needed. A quote was received from Eakes Office Equipment of Grand Island.

AURORA FLOOD CONTROL PROJECT - FEASIBILITY STUDY
Bitner reviewed the feasibility study with the committee. Alternative flood control measures studied include levees and flood control dam. The cost of flood damage in Aurora along Lincoln Creek is $109,000. Levees would cost $140,000 and would reduce damages by $68,500 (benefit to cost ratio = 0.49). A flood control dam would cost $1,000,000 and would reduce damages by $65,000 (benefit to cost ratio = 0.65). The study concludes that federal and state grants would not be available for construction of either levees or a dam since a benefit to cost ratio of 1.0 or greater would be required.
The study recommends that further residential and commercial construction in the flood plain not be allowed. The study further recommends that Highway 34, extending from the intersection of Highways 34 and 14 east to the Highway 34 bridge over Lincoln Creek, be raised to protect existing residential areas south of Highway 34. The study states that the district encourages development of the Lincoln Creek Parkway project and other public green belt type uses of the flood plain. The study also states that projects such as the Parkway trail place flood plain lands in public ownership which prevents residential or commercial development in the flood plain.

Anderson made the motion (Motion #9) that the district approve the study and submit it to the City of Aurora. Seconded by Hansen. Question called. Motion carried.

LEGISLATIVE CHANGES TO THE WELL PERMIT PROCESS
Recent changes in the Nebraska Groundwater Management and Protection Act have, in the staff's opinion, created an unintentional bureaucracy by requiring permits for all wells drilled in control areas and management areas.

The staff has some suggested changes to the statute to correct this situation.

Hansen made the motion (Motion #13) to authorize the staff to work with other interested parties to seek legislation to correct the well permit process. Seconded by Anderson. Question called. Motion carried.

FULL-TIME MAINTENANCE WORKER
The manager is recommending that the board authorize the creation of a new full-time position for
a maintenance worker. The principal duties are to be tree planting, park maintenance (including
mowing), minor repairs on projects (dams, etc.), assisting with recharge project water sampling,
vehicle care, and building and grounds maintenance. The manager is also recommending that the
position be classified as a Grade I on the pay scale (currently with a minimum wage of $9,105 and
a maximum of $14,568).

The full-time position has been budgeted for in the current budget. The total amount in the FY 94
budget, including paid benefits and social security, is $14,422.

Oswald made the motion (Motion #16) to authorize the position of maintenance worker as a
full-time employee, with a job classification of Grade I; and further to authorize the general
manager to fill the position immediately. Seconded by Regier. Question called. Motion carried.

EMERGENCY WATERSHED PROTECTION PLAN
The SCS is conducting a program to assist public entities with repair of secondary damages from the recent flooding. The program will help with projects such as clearing log jams from streams. The program is designed to assist the general public instead of individual land owners. Eligible projects must have tributary drainage areas less than 400 square miles.

The SCS will provide 75% funding, program administration, engineering, contract documents and field inspection. The District has previously agreed to assist with mapping, review of prospective projects, obtaining land owner approvals, etc.

Staff requested that the board of directors consider funding a portion of the 25% local share of these projects.

Austin made the motion (Motion #10) that the district contribute 10% of the total funding of the Emergency Watershed Protection Program. Seconded by Burke.

Ehlers amended the motion to make the motion (Motion #11) not to exceed $7,500.00. Seconded by Hansen. Question called on the amendment. Amendment carried.

YORK SCS FIELD OFFICE CLERK
The SCS reorganization will take place October 1. The area offices will be eliminated, with much of their authority and responsibilities placed on the Liaison District Conservationists. The LDC now becomes the line of authority from the local county offices to the state office. The York Office will supervise Fillmore, Hamilton, Polk, Seward and York Counties.

The clerical workload at the York field office will increase considerably. As a result Bill Gilliam has requested that the district consider making the York field office clerk's job a full time position. In exchange, Gilliam is proposing that the SCS engineer assigned to his office lead a team of SCS technical staff to survey, design, and inspect minimum of two structures per year under the District's Small Dam Program.

Jackson made the motion (Motion #17) that the York field office clerk's position be changed from part-time to full-time effective October 1, 1993, due to an increase in workload. Seconded by Hansen. Question called. Motion carried.

DISTRICT BUILDING DESIGN
The staff requested proposals from three architectural firms for board room design. Only two firms responded; James Canon and Associates and Architectural Partners. Both sent letters indicating they
were not interested in doing the design work.

Based on the lack of positive response, staff is recommending that the district engineer design the board room and related facilities to meet the orders of the State Fire Marshall and the ADA requirements. Design work could be completed during the winter months with construction anticipated in the summer of 1994. The geotechnical, electrical, heating and ventilating will still need to be hired out to consultants.

Jackson made the motion (Motion #18) that the staff proceed with the architectural and engineering design of the district building extension, to meet ADA and other building code standards. Seconded by Anderson. Question called. Motion carried.

**SUTTON FLOOD MITIGATION PROJECT - AGREEMENTS**
The district has received notification from Nebraska Civil Defense that the Federal Emergency Management Agency has authorized a $50,000 grant and that Nebraska Civil Defense has authorized an additional $25,000 to assist Sutton with channel and levee construction.

The district has previously agreed to act as manager for the federal and state grants and will be required to enter into a "state-local contractual agreement" with Nebraska Civil Defense so that the grant monies can be released.

The City of Sutton has signed a supplemental agreement with the district agreeing to abide by the terms of the "state-local contractual agreement", the same as if the city were applicant for the grant money.

NRD staff reviewed terms of the "state-local contractual agreement" and the supplemental agreement and recommended that the district enter into the agreements.

Houdersheldt made the motion (Motion #8) that the district enter into a supplemental agreement with the City of Sutton to ensure that the city will carry out terms and conditions of the Nebraska Civil Defense "state-local contractual agreement". Seconded by Ediger. Question called. Motion carried.

LATE WELL PERMITS - McDONALD FARMS
During the updating of irrigated acres and well ownership records it was discovered that McDonald Farms had purchased property, upon which the previous owner had drilled two wells without permits. Randy McDonald requested that the district waive the late permit fee because he was not the owner of the land at the time the wells were drilled.

Hansen made the motion (Motion #19) that the district issue late permits for two wells. One in the NW ¼ of the SW ¼ and one in the SW ¼ of the SE 1/4 of Section 8, Township 10 North, Range 8 West, Hamilton County. Furthermore, that the district waive the late permit fees. YORK GROUNDWATER RECHARGE DEMONSTRATION PROJECT
A. UNL WATER CENTER COOPERATIVE AGREEMENT
Jay explained the UNL Water Science Laboratory cooperative agreement. The work covered by the agreement includes the following items:
1. Analyze ground and surface water samples for nitrates, Atrazine and other pesticides, stable isotopic tracers, and other tracers as deemed necessary.
2. Interpret transport and fate characteristics of Atrazine and its degradation products in groundwater.
3. Determine the rate that Atrazine in reservoir surface water moves to groundwater and the degree to which surface water and groundwater mix.
4. Help develop and calibrate a model of Atrazine fate and transport.
5. The contract shall run for one year beginning June 1, 1993. The district will pay $69,000 over this period of time. This cost is grant eligible from Ciba Geigy.

Hansen made the motion (Motion #20) to approve the cooperative agreement with the UNL Water Center for water analysis and associated activities for one year beginning June 1, 1993. Seconded by Jacobsen. Question called. Motion carried.

E. TRAILER TO HAUL SAMPLING EQUIPMENT
In order to haul the above equipment from site to site along with the generator, sample bottles and coolers, the district will need a trailer.

The trailer specifications are as follows: 61 x 10, flatbed, front and side rails, 3,500 lb. single axle, 151, tires, fenders, trailer jack.

Four quotes were obtained meeting these specifications:

- Dalhberg Motors, Lincoln, NE (Included Lincoln Sales Tax) *$ 729.53
- Bill Goedeken, Columbus, NE 735.00
- Brett Naber, McCool Jct., NE 945.00
- Peterson Trailers, Waco, NE 1,095.00

Hansen made the motion (Motion #24) that the district purchase a 61 x 10' flatbed trailer for the lowest bid. Seconded by Ehlers. Question called. Motion carried.

**GEOLOGIC MAPPING**
On several occasions the water committee has discussed the need for geologic mapping of the district in greater detail than currently exists. The concept of this project was discussed with Dr. Robert Difindahl of the UNL Conservation & Survey Division. His preliminary cost estimate was $150,000 over a period of approximately three years. Dr. Difindahl indicated that he could begin work on this project in the fall or winter of 1993.

Hansen made the motion (Motion #29) to authorize the staff to begin negotiations with the University of Nebraska Conservation and Survey for geologic mapping of the district. Seconded by Jacobsen. Several directors expressed concern over the high cost of the proposed mapping. Question called on the motion. Motion failed.

SMALL DAMS PROGRAM - NEW APPLICATIONS  
A small dams program application has been received from Sylvan Tesar. The dam site is located about one quarter mile east of the Smith Creek dam. The dam would be used as a water storage area for wildlife and sediment/erosion control. The dam will be designed without a pipe spillway, but will have an earth emergency spillway to pass excess flood flow.  
Silt yield from the 60-acre watershed is 282 tons per year. The dam is expected to trap 268 tons per year (95%). The estimated project cost is $6,000; the NRD share is $3,000. Conservation storage is 3.3 acre feet and the dam is designed for a 25-year life.  
Regier made the motion (Motion #7) that the board of directors approve the Sylvan Tesar small dams program application as eligible for cost-share. Seconded by Dickinson. Question called. Motion carried.

REGIONAL LANDFILL CONSULTANT AND ATTORNEY FEES
The association has hired Lee Jones of Aurora as their attorney and Bill Stoner of Olsson and Associates as their consultant for the siting studies. The association has incurred attorney fees of $627.96 through February 26, 1993.

The York siting study is being updated by Olsson and Associates at a cost not to exceed $2,500.00. The Fillmore County siting study is being done at a cost not to exceed $5,000.00.

The attorney's fees are due and payable immediately. The consultant's fees will be due over the next 60 days. Turnbull recommends that the district continue to handle the billings for the association through the planning process, and that the participants reimburse the district for all billed costs from the attorney and engineering consultants. The solid waste association's executive committee will review and approve the bills for payment and collection.

Oswald made the motion (Motion #10) to authorize the payment of $627.96 to Adams, Owens and Jones for Lee Jones' work through February 26, 1993 for the regional landfill association; further, to authorize the payment of bills received from Adams, Owens and Jones for association legal work conducted during the site selection process; and further, to approve payment of engineering consulting billings received from Olsson and Associates. Seconded by Regier. Question called. Motion carried.

WATER TREATMENT PLANT
Jay reported that, despite several modifications, the treatment plant has not been able to remove sediments adequately and therefore, direct injection is not possible with the current treatment system. The next step would be to convert the plant to a conventional water treatment system which would be very expensive. It is recommended that the treatment plant phase of the project be discontinued.

Hansen made the motion (Motion #16) to discontinue the treatment plant phase of the York Groundwater Recharge Demonstration Project. Seconded by Ehlers. Question called. Motion carried.

ROLL CALL
14 directors were present during roll call. Jacobsen arrived later in the meeting.

NOTICE OF PUBLIC MEETING
A copy of the agenda was sent to each member as notice of this public meeting. Public notification was made by a "Notice of Public Meeting" published March 4, 1993 in the York News-Times. The stated purpose of this special meeting was to discuss the probability, and extent, of a special protection area designation by the Director of the Department of Environmental Quality.

EXCUSED ABSENCES
Moore advised the board that Bruce Anderson had requested that his absence be excused due to out-of-state travel. Luke Jacobsen had also been in contact and indicated that he would attempt to make the meeting, but might be late in arriving.

Burke made the motion (Motion #1) to excuse the absences of Bruce Anderson and Luke Jacobsen from today's special board meeting. Seconded by Regier. Question called. Motion carried.

SPECIAL PROTECTION AREA
DEQ staff members reviewed the well testing data that was collected during a three-year district-wide study to determine whether or not an SPA was needed.

DEQ Director Randy Wood told the board that Adams and Butler counties had the least contamination, at about three parts per million, Saline, Clay, Fillmore and Seward could be considered marginally contaminated, at four to five parts per million, and Hamilton, Polk and York should be considered the greatest threat, at five parts per million or greater.

Wood said he concluded from the data that not only do we have an existing non-point source contamination taking place, but that the contamination is likely to increase and become more widespread. Based on the data he has determined, in accordance with the state statutes, that a special protection area within the Upper Big Blue NRD is appropriate.

Wood also stated that prior to formally designating an SPA he is requesting input from the NRD regarding the size and scope of the SPA. He asked that the board bring a recommendation back to him by May or June.

Board chairman Larry Moore instructed the board's water committee to study the issue and to make a recommendation at the board's April meeting.

Meeting adjourned at 3:00 p.m.

1993 WATER JAMBOREE

The Cooperative Extension is planning a mini groundwater festival for 1,000 school children from Adams, Clay, Fillmore, Nuckolls, Thayer, and Webster Counties to be held at the Little Blue NRD's recreation area at Liberty Cove near Lawrence in September. They have applied for a grant from the NDEQ to cover the costs of the festival. As a backup funding plan, they have asked the three NRDs involved to share the cost of the festival with the six county extension units. Total festival cost is estimated at $1,000. The three NRDs would split $550 equally.

Dickinson made the motion (Motion #14) that the Upper Big Blue NRD provide funding, not to exceed $200, for the 1993 Water Jamboree to be held at Liberty Cove Recreation Area in September. If the Jamboree receives an Information and Education Mini--grant from the NDEQ, funding will not be provided by the district. Seconded by Ediger. Question called. Motion carried. LAND TREATMENT PROGRAM - IRRIGATION WATER RETURN LINES
The revised Irrigation Water Return Line Policy, which was referred back to committee last month, was discussed. The committee decided to allow pumping from reservoirs, as well as reuse pits, and to allow cost-share on zees and other fittings below grade.

Ehlers made the motion (Motion #6) that the board of directors adopt the following land treatment program policy on irrigation water return lines, and that this revised policy become effective upon adoption:
"The purpose of the District's cost-share program on Irrigation Water Return Lines is to encourage the efficient use of groundwater for irrigation. This practice is designed for gravity irrigation systems as a means of returning water from the irrigation reuse pit, or a reservoir, to the head of the field where water can be reused. The reuse of irrigation water helps conserve groundwater and prevents damage to lands downstream.

Water impounded in a reuse pit, or reservoir, and subsequently pumped through the return line must include water from land owned by the person receiving the cost-share assistance, but may include water from other sources. The water must be returned to the land from under which the runoff occurred, or to other crop land under the same ownership, provided the resulting runoff is controlled. Cost-share assistance is based on the length and diameter of underground pipe necessary to return the runoff water to the head of the field from which it came. Pipe length will be measured along the axis of the pipe to the head of the field from which the runoff occurred. The pipe layout plan is to be the most economical, reasonable and efficient for the system. If the landowner chooses to change the technician's design or layout, he/she may do so if, in the technician's opinion, the system will function properly without additional cost-share assistance.

Payment will not be made for pumps, pump stands or for pipe above ground."

The cost-share rates for irrigation water return lines will not be changed as a result of this policy change.

GRANT APPLICATIONS FOR PIONEER TRAILS RECREATION AREA DEVELOPMENT
The district's application for funding for recreation area improvements at Pioneer Trails from the Land and Water Conservation Fund was not approved because there was not enough money available in the fund for the number of applications received. We were encouraged to revise our application (if needed) and resubmit for next year. In the interim, other possibilities for grant funding may be pursued.

FARR TRUST
This is a charitable trust that provides grants in Hamilton County. The district's application would be for the same recreation facilities included in the Land and Water Conservation fund application (foot bridge, picnic shelter, hiking trail, three information stations, playground equipment and an identification sign.) The grant would be a 50/50 matching grant ($24,000/$24,000) for a total of $48,000.

BUDGET COMMITTEE MEETING REPORT
Dickinson gave a report on the Budget, Planning & Legislative Committee meeting held February 16, 1993 and reviewed the committee report as distributed.

LANDMARK
Turnbull reviewed the Landmark supreme court decision. The court ruled that the Upper Big Blue is not granted water rights for the Landmark Project. The principal reason is that the project is not in the public's interest.

The court did not rule on the endangered species issue. The reason given is that since the NRD is no longer required to consult with the Game and Parks Commission, the district is not affected by the Game and Parks ruling. That is in error.

Our attorney strongly recommended that a motion for rehearing be filed with the Nebraska Supreme Court. The rehearing should be about the endangered species issue. He agreed that the filing, briefs, and oral arguments will be done as part of his overall charges on the case to date. No additional fees will be billed to the district. The board chairman and the manager authorized Steve Seglin to ask for a rehearing, file the briefs, and to present oral arguments.

SINKING FUND
The district has $419,654 set aside in the sinking fund for the Landmark Project. The manager recommended that the committee decide what project, or projects, these funds should be dedicated to.

Dickinson made the motion (Motion #22) that the board make a final decision on the deposition of

LAND TREATMENT PROGRAM - IRRIGATION WATER RETURN LINES
A request has been made to allow cost-share on irrigation water return lines from reservoirs. Current policy limits cost-share to return lines from reuse pits.

The consensus of the committee was that return lines from reservoirs will allow more efficient use of irrigation runoff.

Regier made the motion (Motion #8) that the board of directors adopt the following land treatment program policy on irrigation water return lines, and that this revised policy become effective upon adoption:

"The purpose of the district's cost-share program on irrigation water return lines is to encourage the efficient use of groundwater for irrigation. This practice is designed for gravity irrigation systems as a means of returning water from the irrigation reuse pit, or a reservoir, to the head of the field where water can be reused. The reuse of irrigation water helps conserve groundwater and prevents damage to lands downstream.

Water impounded in a reuse pit, or reservoir, and subsequently pumped through the return line must include water from land owned by the person receiving the cost-share assistance, but may include water from other sources. The water must be returned to the land from which the runoff occurred or to other crop land under the same ownership, provided the resulting runoff is controlled. Cost-share assistance is based on the length and diameter of underground pipe necessary to return the runoff water to the head of the field from which it came. The pipe will be measured along the axis of the pipe to the head of the field from which the runoff occurred. The pipe layout plan is to be the most economical, reasonable and efficient for the system. If the landowner chooses to change the technician's design or layout, he or she may do so if, in the technicians opinion, the system will
function properly without additional cost-share assistance.

Payment will not be made for pumps, pump stands, zees or any other fittings or equipment, or for pipe above ground."

The cost-share rates for irrigation water return lines will not be changed as a result of this policy. Seconded by Hansen.

Volkmer expressed concern that zees would be ineligible for cost-share. There was some discussion about what should and should not be eligible for cost-share. Bitner explained that the district's cost-share policy on irrigation water return lines was written to correspond with that of the ASCS.

Dickinson made the motion (Motion #9) to refer to committee to reconsider cost-share on zees. Seconded by Volkmer. Question called. Motion failed.

PROJECT 4-13-2E STARA DAM
This project is located three miles north of Ulysses in Section 4, Township 13 North, Range 2 East. Staff has discussed dam site location with the landowner and Butler County officials. The selected site is approximately 300 feet upstream from the county road in the Southwest Quarter of Section 4.

The reservoir's conservation pool would have an area of 19 acres and would store 80 acre feet. The dam would be designed as low hazard. Construction cost is estimated to be $97,000. At this point it appears that land rights will be in the form of easement at no cost if the District builds, owns and operates the dam.

This project is currently third on the District's priority list.

Regier made the motion (Motion #10) that the board of directors authorize the staff to proceed with final design of Project; 4-132E, Stara Dam. Seconded by Volkmer. Question called. Motion carried.

SUTTON FLOOD CONTROL DAM 2-7-5W - PROGRESS PAYMENT
Regier made the motion (Motion #10) that Van Kirk Brothers Contracting be paid $20,787.63 as final payment on the Sutton Flood Control Dam 2-7-5W. Seconded by Oswald.

Bitner advised the board that Van Kirk Brothers Contracting has filed a separate claim for an additional 5,000 yards of dirt work on the dam. The district was told that during the construction of the golf course 5,000 yards of dirt would be stockpiled for use on the dam. The district feels that the City of Sutton and the Golf Course Association are responsible for the additional expense since they did not provide the 5,000 yards as promised. Staff has met with the city, Van Kirk Brothers, and the Golf Course Association to discuss the matter and are presently attempting to negotiate a settlement on the claim.

NACD VICE PRESIDENT'S EXPENSES
In 1992 the Upper Big Blue agreed to pay a portion of Jerry Vap's expenses incurred as vice president of the NACD. One payment of $522 was made that November. Recently it was learned that most districts have not made any more payments. Originally $9,129 was collected and paid to Jerry Vap. Additional expenses he incurred were paid through the SCS contract with the NARD. However it is time to consider reimbursement of current expenses. The NARD has billed the District for $522, however, any payment is voluntary.

Austin made the motion (Motion #22) to pay $522 to the NARD for Jerry Vap's expenses as the NACD vice president. Seconded by Burke. Question called. Motion carried.

HAIL STORM DAMAGE
A hail storm on August 25, 1994 resulted in $13,508.86 damage to five district vehicles, $600 damage to the job trailer and $1,649.59 damage to buildings.

Of the five vehicles damaged, only the 1985 Ford LTD station wagon was totaled. The district will keep the 1985 Ford and repair the other four vehicles. The total settlement, after deductibles were met, was $14,658.45. The district has received $12,156.97 from the insurance company to-date. The remainder of the settlement will be paid when the vehicles have been repaired.

Austin made the motion (Motion #15) that the general manager be authorized to have the hail damage repaired on the 1987 Chevrolet pickup (estimate of $2,247.59), the 1989 Ford pickup
(estimate of $1,133.20), the 1993 Ford pickup (estimate of $4,393.08), and the 1994 Ford Taurus station wagon (estimate of $3,884.99) at auto body repair shops that can accomplish the work prior to December 31, 1994. Seconded by Burke. Question called. Motion carried.

PLUM CREEK FLOOD MITIGATION PROJECT
The State Civil Defense Agency and Governor's Task Force have recommended that the City of Seward apply for hazard mitigation grants from FEMA and Department of Economic Development to assist in constructing flood mitigation works along Plum Creek at Seward. The City of Seward has asked that the district update its proposal for completing option two of the Olsson & Associates engineering study dated December 1990.

In March of 1991 the Upper Big Blue NRD Board passed a motion offering to pay 25% of the local share of option two. Project cost for option two is estimated to be $2,104,520 in the Olsson study. If a 75% grant is obtained, the local share would be $526,130 and the NRD share would be $131,533.

Regier made the motion (Motion #26) that the district prepare applications for grants to construct option two, presented in the December 1990 engineering study by Olsson & Associates, and that the district limit its financial obligation to 25% of the local share of project cost, not to exceed $150,000, and that the City of Seward be required to make a financial commitment of 75% of the local share of project cost, not to exceed $450,000, and that the city accept the district offer no later than December 31, 1994. NRD BUILDING ADDITION
One bid was received for the NRD office building project. The amount of the bid, submitted by Jensen Lumber Company of York, was $288,780. The engineer's cost estimate was $237,350. The staff requested additional time to review the bid with the contractor.
The Executive Committee met again at 7:30 p.m., Thursday, September 22, 1994, prior to the regular board meeting to reconsider the bid.

Turnbull advised the board that when JLC, Inc. submitted their initial bid they neglected to allow for the salvage of the copper sheeting from the existing second story that will be reused on the addition. This oversight caused the initial bid to be higher than necessary. In addition, the heating and electrical subcontractors’ prices are considerably higher than the engineer's estimate. Following is a summary of the revised bid and engineer's estimate.

Upper Big Blue Natural Resources District
Ground Water Control Area

Resolution for the Variance of Well Spacing for
the Construction of Recovery Wells at the
York Ground Water Recharge Project

WHEREAS, the pollution of ground water has occurred as a result of ground water recharge from Recharge Lake and

WHEREAS, the construction of recovery wells is necessary to prevent spread of said pollution and
WHEREAS, failure to prevent the spread of pollution may result in the contamination of nearby domestic water supplies and

WHEREAS, in order to effectively capture the contaminated ground water some of the recovery wells must be located less than one thousand feet from irrigation wells G039965 (NE ¼) and G065499 (SE ¼) in Section 2-T10N-R3W, York County, and

WHEREAS, the net ground water withdrawal in relation to ground water recharge is estimated to be less than six percent and

WHEREAS, the recovery wells will not withdraw water from the lower aquifer which is being utilized by the irrigation wells,

NOW THEREFORE BE IT RESOLVED, that in accordance with Rule 5, Chapter 7, Paragraph 03, a variance to Rule 5, Chapter 9, Paragraph 01, is hereby granted for the installation of four recovery wells at the York Ground Water Recharge Project as per the attached map.

AFTER-THE-FACT AQWACAP REQUEST
A well driller has requested that the district consider after-the-fact cost-share in situations where emergency replacement wells were drilled. The following program changes would allow after-the-fact cost-share in certain circumstances.

06 The procedures established for all other NRD cost-share programs will be followed.

06.01 Paragraph 46-602 of Nebraska Statutes require that registered wells be decommissioned prior to commencing construction of a replacement well. In emergency situations, it may be necessary to decommission a well prior to making application for cost-share. The district will accept after-the-fact applications under the following circumstances.

06.01a. A domestic, livestock or commercial well that must be replaced because it cannot provide adequate water for its intended purpose and provided that no other source was available.

06.01b. An irrigation well that must be replaced during the growing season to irrigate a growing crop.

06.02. An after-the-fact application must be received by the district office within 30 days after the actual decommissioning.

07 Cost-share payment shall be made upon approval of the completed work by the Board of Directors. The district may refuse payment if it is believed that the completed work does not meet program requirements.
Jackson made the motion (Motion #9) to approve changes to the Aquifer Quality Well Abandonment Cost-share Assistance Program which allow for the approval of after-the-fact cost-share applications. Seconded by Austin. Question called. Motion carried.

PITLESS IRRIGATION REUSE SYSTEM
Quotes were requested from Osceola Drilling, Volzke Corporation and Northern Pump. Northern Pump was the only company willing to quote the job. Their total quote was $8,905. There may also be a minor amount of grading necessary to complete the project.

Jackson made the motion (Motion #10) that the district accept the quotation from Northern Pump and Irrigation Company and proceed with the pitless irrigation reuse system research project. Seconded by Burke.

DeBuhr advised the board that he had learned from Steve Moran, Rain Water Basin Joint Venture Coordinator, prior to the board meeting that there may be grant funds available for this type of research and he would like to further investigate that avenue.

Ehlers made the motion (Motion #11) to refer the matter back to the Water Committee. Seconded by Jacobsen. Question called. Motion carried.

GRANT APPLICATION FOR INFORMATION STATIONS AT PIONEER TRAILS
This is the first year that the Nebraska Environmental Trust is accepting applications for grants, focusing on critical habitats, surface water and groundwater quality and recycling and waste reduction. Emphasis is placed on projects that create a public/private partnership.

Prudence suggests that the district apply for a grant for $4,000 for materials to construct three information stations at Pioneer Trails Recreation Area. Volunteer labor would be used to build the stations. The district will fund $500, over an unspecified period of time, to develop and install the displays.
Dickinson made the motion (Motion #12) that the Upper Big Blue NRD apply to the Nebraska Environmental Trust for a grant for $4,000 for materials to construct three information stations to be placed along the hiking/biking trial at Pioneer Trails Recreation Area. Seconded by Burke. Question called. Motion carried.

Sale of District Acreage

The district owns 3.5 acres of undeveloped land on the south side of York that was originally purchased as the site for a new district office building. Since the decision has been made to remodel and expand the existing facility the land is no longer needed. It has been suggested that the land be sold and the proceeds used to offset the expense of building the addition.

Austin made the motion (Motion #23) to authorize the general manager to solicit offers for the district acreage located on the south side of York and further, to authorize the general manager to list the property with a realtor if necessary. Seconded by Jacobsen. Question called. Motion carried.

LAND TREATMENT PROGRAM - APPLICATION CANCELLATION
An application for a reuse pit was submitted by SCS on behalf of Bruce Meyer in April 1994. In the process of certifying irrigated acres it was discovered that Bruce Meyer does not own a well on land he intends to irrigate; he obtains water from an adjacent landowner's well. This arrangement does
not guarantee Meyer a reliable source of water into the future. Since the district's reuse pit cost-share program applies to gravity irrigated land, for which an adequate supply of water is available and on which irrigation will be continued, the staff recommends cancelling the application.

If Bruce Meyer can obtain an agreement allowing him an adequate and reliable water supply from the adjacent landowner's well, the committee will consider approving his application for a reuse pit.

Regier made the motion (Motion #6) that Bruce Meyer's application for cost-share on a reuse pit in the South Half of the Southwest Quarter of Section 22, Township 11 North, Range 5 West, dated April 11, 1994, be cancelled due to lack of adequate water supply. RETIREMENT PLAN
The NARD Retirement Committee has recommended plan changes to be considered at the June 28, 1994 NARD board meeting. One proposed change would increase the monthly retirement benefit by changing the factor used when multiplying the average pay by years of service. Another would allow employees to retire at age 62, rather than age 65, and receive full retirement benefits. However, the longer an employee works the greater the monthly retirement benefit.

Austin made the motion (Motion #18) that the Upper Big Blue NRD support the NARD Retirement Committee's proposal to increase the retirement benefits for NRD employees and resulting increase in costs for both the district and employees. Seconded by Anderson. Question called. Motion carried.

BRAINARD DAM PROJECT 18-14-04E
The Lower Platte South NRD has requested that Upper Big Blue NRD cooperate with them to construct a flood control dam near Brainard. In preliminary discussions with LPSNRD it was suggested that the UBBNRD could provide design and construction inspection as its share of project cost. LPSNRD proposes that they would obtain land rights and pay a portion of construction costs and they will request some cost-share from Butler County.

Staff recommended that the Brainard Dam, to be called Project 18-14-04E, be placed on the district's priority list with other new projects, and that the project's priority be set at a later date.

SPECIAL PROTECTION AREA - ADOPTION OF ACTION PLAN
Volkmer made the motion (Motion #11) that we not have an SPA in the Upper Big Blue NRD district. Seconded by Oswald.

Moore called a point of order. Moore contended the motion was out of order because the decision to designate the UBBNRD as a Special Protection Area was made by the Director of the Department of Environmental Quality on September 23, 1993 and the 30-day appeal period following the designation has passed and the decision is final.

Chairman Hansen ruled that he would allow the motion so that those present would have an opportunity to discuss the matter. Following a lengthy discussion Anderson called for the question. Question called. Motion failed.

AMENDMENT OF ISTEA GRANT APPLICATION FOR PIONEER TRAILS RECREATION AREA

The district received tentative authorization from the Nebraska Department of Roads for the ISTEA/Transportation Enhancement Program grant application to build a hiking/biking trail around the lake at Pioneer Trails Recreation Area. The construction requirements for building the trail have recently been received from DOR and after considerable negotiations between the NRD staff and DOR, the trail design has been completed. The initial application, submitted in October of 1993, was for $31,100.00 and was to be funded by DOR at a rate of 80 percent. The NRD's share would have been $6,220.00. After changes required by DOR, the total project cost is $42,200.00, funded at a rate of 80 percent. The NRD's share would be $8,440.00.

Dickinson made the motion (Motion #15) that the Upper Big Blue NRD amend its grant application to the Nebraska Department of Roads Transportation Enhancement Program for the construction of a hiking/biking trail at Pioneer Trails Recreation Area. The total project cost would be $42,200.00 and at a rate of 80/20 percent, the DOR's share would be $33,760.00 and the NRD's share would be $8,440.00. Seconded by Anderson. Question called. Motion carried.

EXECUTIVE COMMITTEE REPORT
Austin gave a report on the Executive Committee meeting held April 12, 1994 and reviewed the committee report as distributed.

DIRECTORS' FIRST QUARTER PER DIEM AND EXPENSES
The committee reviewed the directors, per them and expenses. The committee discussed how to compute directors' mileage to district meetings. At issue was whether or not mileage should be computed from the actual departure point to the point of destination, or from the director's residence to the meeting.

Austin made the motion (Motion #12) to approve first quarter per diem of $7,025.00 and amended expenses of $2,113.41 for the directors. Further, that directors, paid mileage only reflect actual mileage from each director's residence to the district office and back. Seconded by Ehlers. Question called. Motion carried.

PROJECTS COMMITTEE REPORT
Houdersheldt gave a report on the Projects Committee meeting held March 7, 1994 and reviewed the committee report as distributed.

SUTTON FLOOD MITIGATION PROJECT
The Sutton City Council has requested that the district assist with construction of three dams at Sutton. Dams located in the SE 1/4 and SW ¼ of Section 2 would control flood water entering the city from the south. The dam located in Section 34 would control flood water entering the city from the north. These dams are located on tributaries to School Creek that flow through Sutton. Due to the location of the dams, the structures would be designed for high hazard requirements. The City of Sutton would own, operate and maintain the dams and would obtain all land rights. The district would design and construct the dams and obtain permits.

Houdersheldt made the motion (Motion #4) that the district design and construct flood control dams in the SE 1/4 and SW 1/4 of Section 2, Township 7 North, Range 5 West as requested by the City of Sutton and that the projects be treated as special projects using guidelines of the district's small dams program. Seconded by Ediger. Question called. Motion carried.

LITTLE SANDY CREEK WATERSHED PROJECT - LITTLE BLUE NRD
The Little Blue NRD has requested that the district construct a flood control dam in Section 36, Township 6 North, Range I West, located four miles south and one-half mile east of Milligan. Approximately thirty dam sites have been identified in the Little Sandy Creek watershed and Project 36-6-1W is the only one in the Upper Big Blue NRD.

Turnbull advised the board that since the Projects Committee meeting he had met with Mike Onnen, Manager of the Little Blue NRD, Ron Fleece, Manager of Lower Big Blue NRD, and the SCS state watershed planning group. The Little Sandy Creek project is part of a proposed PL 566 watershed that includes approximately 30 structures in the Little Sandy Creek area. It is currently in the preauthorization stage. Turnbull feels that if the watershed project is determined to be feasible, construction is at least five to ten years down the road. Turnbull advised the board that he has asked the planning staff to consider recreation on this site because it is so near the town of Milligan and Milligan has approached the district several times to request the development of water-based recreation in their area.

It was suggested by Fleece and Turnbull that Mike Onnen take the lead in working with the SCS on this watershed plan, landowner meetings, land rights, etc., and the Upper Big Blue NRD and Lower Big Blue NRD work with the Little Blue NRD through an inter-local agreement.

Houdersheldt made the motion (Motion #6) that the district support Little Sandy Creek Project 36-6-1W. Seconded by Volkmer. Question called. Motion carried.

VEHICLE BIDS
The district advertised for bids for a 1994 mid-size station wagon, with and without trade-in of the 1985 Ford LTD station wagon, which has 123,645 miles on it. The following bids were received.

The low bid of $14,883.00 with trade is $274.60 lower than the low bid without trade. Staff recommends that the district keep the 1985 Ford LTD station wagon and purchase an additional car, as specified, from the low bidder.

Austin made the motion (Motion #13) that the district accept the low bid of $15,157.60, plus sales tax, for a 1994 Ford Taurus station wagon from Trowbridge of Columbus and that the district keep
the 1985 Ford LTD station wagon. Seconded by Ediger.

There was some sentiment expressed that the district should not accept bids from outside district boundaries.

Burke amended the motion to make the motion (Motion #14) to accept the bid of $15,513.60, plus sales tax, for a 1994 Ford Taurus station wagon from Geneva Motors, Geneva, Nebraska and that the district keep the 1985 Ford LTD station wagon. Seconded by Anderson. Question called on the amendment. Amendment failed.

QUORUM CALL
Twelve directors were present during quorum call. Jacobsen arrived at 1:45 p.m.

NOTICE OF PUBLIC MEETING
A copy of the agenda was sent to each member as notice of this public meeting. Public notification was made by a "Notice of Public Meeting" published February 7, 1994 in the York News-Times. The agenda is kept continually current and is readily available for public inspection at the principal office of the Upper Big Blue NRD, during normal business hours.

EXCUSED ABSENCES
Chairman Hansen reported that Steve Buller and Ken Regier had contacted the office and requested to be excused from the board meeting.

Ehlers made the motion (Motion #1) to approve the absences as requested. Seconded by Austin. Question called. Motion carried.

PUBLIC HEARING ON DISTRICT RULES AND REGULATIONS
Chairman Hansen opened the public hearing on the district's rules and regulations at 1:35 p.m. The public hearing was left open to run concurrently with the regular Board of Directors meeting until 1:58 p.m. at which time the hearing was officially closed.

ADOPTION OF AGENDA
Dickinson brought it to the attention of the board that the date of the meeting was stated incorrectly in the agenda notice. The agenda read "February 17, 1993" and should have read "February' 17, 1994". He asked that for the record the typographical error be corrected.

Dickinson made the motion (Motion #2) to approve the agenda for the Board of Directors meeting as corrected. Seconded by Houdersheldt. Question called. Motion carried.

SMALL DAMS PROGRAM - ADVERTISEMENT FOR BIDS
Final design is completed and water right permits have been obtained for the Salmen Dam, located three miles south of Henderson. The 404 permit is pending review by the Corps of Engineers. Staff has recommended that the district proceed with advertisement for bids and that award of contract be conditional on Corps approval of the 404 permit.

The proposed schedule calls for bid advertisement in March, award of contract in April and construction in May and June. Funds are available in the FY94 budget for construction.

Houdersheldt made the motion (Motion #7) that the district advertise for bids on Project 20-09-04W, Salmen Dam. Seconded by Oswald. Question called. Motion carried.

SUTTON FLOOD MITIGATION PROJECT - PROGRESS PAYMENT
The City of Sutton submitted expenses of $29,140.59 for work completed between April 1993 and January 1994 on their flood mitigation project. The expenses submitted are not eligible for state or federal cost-share, but are eligible for 50% NRD cost-share in accordance with our intergovernment cost-share agreement. The district's commitment on this project is $191,250. District funds expended to-date total $17,169.04.

Houdersheldt made the motion (Motion #8) that the district reimburse the City of Sutton $14,570.29,
fifty percent of the January 25, 1994 claim, in accordance with the cost-share agreement between the City and District. Seconded by Dickinson. Question called. Motion carried.

PITLESS IRRIGATION REUSE SYSTEM FOR FARMED WETLANDS
Rod DeBuhr has been working with representatives of several state and federal agencies to come up with an irrigation reuse system. This system would meet Section 404 and Swamp buster rules so that producers with farmed wetlands would have a way to stop irrigation runoff and improve irrigation efficiency to reduce leaching.

Steve Moran, SCS Engineer, and DeLynn Hay, Extension Irrigation Specialist, are working together to design such a system.

Two farmers within the district are willing to consider installation of a pilot system. The estimated cost of the system is $6,430. This includes the sump, earthwork, above ground pipe, pump and motor. The cost estimate for a system with buried pipeline is $8,730.00.

Rod explained to the Board that since this is an experimental project there is some risk that the system may not work right the first time, and possibly not at all. In light of the experimental nature of this project Rod is recommending that the district offer the producers the following incentives to allow the use of their property and labor for this work.

The producer and NRD agree to the following:
A. The NRD will pay for all materials and labor for installation of the system with above ground pipe.
B. The producer must provide electricity to the site at his/her cost.
C. Here will be a trial operation period not to exceed three years.
D. At the end of the trial operation, the producer may:
   2. Request that the NRD remove the system, at which time the NRD will salvage the equipment for sale or use on other district projects; or 2. He may purchase the system for 50 percent of the original cost of the pump and motor, including electrical and installation cost. (This purchase does not include the above ground pipe.)
E. The producer may purchase the above ground pipe at a price to be agreed upon at the end of the trial period.
F. If the producer wishes to have underground pipe at the end of the trial period, he may apply for cost-share assistance through the regular NRD programs.

Jackson made the motion (Motion #10) to authorize the staff to proceed with negotiations with the producers to secure a site for the trial pitless irrigation reuse system. Seconded by Austin. Question called. Motion carried.

EXECUTIVE COMMITTEE REPORT
Austin gave a report on the Executive Committee meeting held February 7, 1994 and reviewed the committee report as distributed.
DISTRICT RULES AND REGULATIONS
Rod DeBuhr and Prudence Sadler have completed the work on standardizing the format of the District's Rules and Regulations. In some cases the wording has been clarified and in others, spelling and grammar has been corrected. These rules and regulations will be printed in one publication to make it easier for all concerned to refer to. Rule 5, the Control Area Rules, have not been changed and therefore were not considered for change or review at the public hearing. The rules and regulations should be readopted as presented to the board during the public hearing.

Austin made the motion (Motion #13) to adopt the following District Rules and Regulations as amended: Rule 1 - Public participation at official meetings of the District; Rule 2 - Conduct of Informal, Non-Adjudicatory Public Hearing; Rule 3 - Conduct of Formal Adjudicatory Hearings before the District; Rule 4 - Rules and Regulations for the Enforcement of the Groundwater Management and Protection Act; Rule 6 - NRD Park Regulations; Rule 7 Chemigation Rules and Regulations Supplemental to Title 195 of the Department of Environmental Quality; and Rule 8 - Rules and Regulations for Implementing the Nebraska Erosion and Sediment Control Act. FAMILY AND MEDICAL LEAVE
The federal Family and Medical Leave Act of 1993 requires employers of 50 or more employees and government entities to grant up to 12 weeks of leave for specific family and personal reasons. This family and medical leave does not have to be paid leave but the employer must guarantee the employee the same job and status upon return from the leave. Turnbull reviewed a draft policy which meets the federal requirements.

Austin made the motion (Motion #15) to amend Personnel Policy No. 22 by striking all of the language, including the title, and replacing the same with the Family and Medical Leave policy as presented. Seconded by Jackson. Question called. Motion carried.

COMPUTER PURCHASE
Jay Bitner has requested that the district purchase an additional computer for the Projects Department to be dedicated to computer aided drafting. All of the drafting is now being done on computer instead of manually, which speeds up the work for the staff. However, this has created heavy demand for computer time. The computer now in use is best suited for word processing and mathematical computer models. A dedicated drafting computer needs more internal capacity to handle large and complicated blueprint type drawings, such as surveys, topographic maps, and construction drawings.

Two quotes for a computer with the necessary specifications were received. The quotes were as follows:

<table>
<thead>
<tr>
<th>Vendor</th>
<th>Price</th>

Austin made the motion (Motion #17) to approve the purchase of a 486-DX66 computer, as specified, from Gateway 2000 for a cost not to exceed $2,950.00 plus tax. Seconded by Jacobsen. Question called. Motion carried.

**MODEL AQUIFER COST-SHARE APPLICATION**
Polk-Hordville High School has requested assistance under the district's cost-share program to purchase a model aquifer. The University of Nebraska is selling the model and carrying case for $350.00. The district's cost-share program provides assistance at the rate of 50 percent of the actual cost of the model with a limit of $200.00 for the district's share ($400.00 total cost).

Dickinson made the motion (Motion #18) that the Upper Big Blue NRD pay 50 percent of the actual cost of a model aquifer and carrying case, not to exceed $175.00, for Polk-Hordville High School under the district's Model Aquifer for Schools Assistance Program. SPECIAL PROTECTION AREA NON-POINT SOURCE MONITORING PROGRAM
DeBuhr reviewed the revised USGS proposal for the monitoring program study for the Special Protection Area. The number of existing wells to be identified as monitoring sites has been increased from 100 to 200. DeBuhr indicated that when meeting with USGS and NDEQ it was discussed that part of the funding for the second through fifth years might be available through EPA 319 funds.

Ingrid Verstraeten and Dan Fitzpatrick of USGS were present at the board meeting to answer questions regarding the proposal.

Hansen made the motion (Motion #9) that the Board enter into an agreement with the U.S. Geological Survey for the first year of the saturated and unsaturated zone non-point source monitoring program at a 50/50 cost-share rate; the District's cost not to exceed $32,850. Seconded by Ehlers. Question called. Motion carried.

PILOT STUDY TO IMPROVE SPA AND GWMA EDUCATION PROGRAMS
The University of Nebraska Cooperative Extension is considering a program to evaluate groundwater education activities and would like to discuss using the Upper Big Blue SPA as the pilot area. Richard Ferguson, Associate Professor of Agronomy at Clay Center, has asked the district to choose a representative from the SPA Advisory Committee and the board to meet and discuss this idea.

The Water Committee authorized the staff to proceed with setting up the meeting.

MID-NEBRASKA DEMONSTRATION PROJECT
IRRIGATION EFFICIENCY EVALUATION USING POLYSONICS FLOW METER
Rod advised the Water Committee that Andy Christiansen had contacted him to discuss why the Board did not approve the purchase of the Polysonics flow meter in December.

Rod told the committee that the Board knows how the staff feels about the need for a water meter. In his opinion, if the issue is to be discussed further, it should be raised by a board member or other non-staff person.

Andy Christiansen and Dennis Schroeder were present at the Board meeting to discuss their proposal for use of the Polysonics flow meter.

Hansen made the motion (Motion #10) to purchase a Polysonics ISTT ultrasonic meter and Stresstel ultrasonic wall thickness gauge for $8,494.50. Seconded by Jacobsen. Question called. Motion

NSWCP IRRIGATION WATER CONSERVATION PRACTICE
The Natural Resources Commission will consider the adoption of a new cost-share practice for water quantity and water quality as part of the NSWCP program at their January 25 and 26 meeting. The Commission has asked NRDs to comment on the proposed program.

Such a program could provide state-funded assistance in implementing several best management practices that the district has been promoting in an effort to conserve groundwater and reduce non-point source groundwater contamination. The proposal that was sent out was somewhat sketchy, but seemed to propose some changes to NSWCP that might not be in the best interest of this district.

Hansen made the motion (Motion #11) that the district oppose the concepts of the proposed NSWCP irrigation water conservation practice. Seconded by Ediger. Question called. Motion carried.

WATER RELATED LEGISLATION
On January 18 the office received notice of several public hearings on bills relating to NRD water issues the district, is involved with. Due to the short notice staff decided to ask the Water Committee to make recommendations to the Board regarding the district's position on these bills and whether or not to testify.

This bill would exempt the NRDs management plans from the Endangered Species Act.

Recommendation: to support LB 940.

This bill proposes criteria to allow transfers of groundwater away from overlying land. If an
affected party objects to a proposed transfer, the NRD must do an investigation. If the NRD has reason to believe that there may be cause to deny an application DWR can hold a public hearing to deny the transfer.

This bill would undermine our control area regulations which now prohibit new transfers.

Recommendation: to oppose LB 963, or seek amendments that would exempt control areas and management areas that already have transfer regulations.

**LB 981:**  **Cost-sharing for abandoned wells; introduced by Beutler.** Hearing is January 20th.

This bill requires NRDs to have an abandoned well cost-share program. It sets cost-share limits and requires NRDs to abandon at least 30 wells per year or lose NSWCP and Resource Development Funds.

Recommendation: To oppose LB 981 and provide written objection to the state senators.

**LB 1017:**  **SPAs/Water Management Plan; Introduced by McKenzie and Moore.** Hearing January 21st.

This is our bill to exempt us from writing a groundwater management plan.

Recommendation: To support LB 1017 and testify.

**LB 1030e:**  **Amend Chemigation Act; introduced by Beutler.** Hearing is January 19th.

Requires NRDs to inspect sites every two years. Includes inspection of chemigation related storage tanks. Raises fees to $35 for renewals and $55 for new permits. Fees are currently $10 and $30. Contains emergency clause so it would go into effect this growing season.

Recommendation: Oppose LB 1030e and send written comments to senators.

**LB 1084:**  **Penalties for not having an approved ground water management Plan; Introduced by Beutler.** Hearing January 21st.

This bill would make NSWCP funds, Resource Development Funds, federal funds and property tax relief unavailable to an NRD that did not have an approved ground water management plan by March 1, 1995.

Recommendation: To oppose LB 1084 and testify.

Hansen made the motion (Motion #12) to adopt staff recommendations on LB 940, LB 963, LB 981,
LB 1017, LB 1030e and LB 1084. Seconded by Ehlers. Question called. Motion carried.

AURORA AREA TRAIL DEVELOPMENT
The district has encouraged the City of Aurora, Hamilton County, and the Prairie/Plains Resources Institute to coordinate on grant applications to continue development of a hiking trail system that will connect Streeter Parks with Pioneer Trails Recreation Area. The Nebraska Department of Roads has grant money available for this sort of project under the ISTEA program. The City of Aurora is applying for an ISTEA grant to develop a trail in Streeter Park and in the portion of Lincoln Creek Parkway within the city limits. The city has requested a resolution of support from the NRD.

Dickinson made the motion (Motion #16) that the Upper Big Blue NRD adopt a resolution in support of the City of Aurora's proposed hiking trail development in Streeter Park and the Lincoln Creek Parkway. Seconded by Ediger. Question called. Motion carried.

DISTRICT RULES AND REGULATIONS - REVISIONS AND PUBLICATIONS
Rod DeBuhr and Prudence Sadler have been working on standardizing the format of the district's rules and regulations. In some cases the wording has been clarified. In addition spelling and grammar have been corrected. These rules and regulations will be printed in one publication to make it easier for all concerned to refer to. Because of the changes a public hearing is advised before their readoption Rule 5, Control Area Rules, have not been changed and therefore will not be considered for change or reviewed at the public hearing. The rules and regulations to be included in the publication are: Rules 1: Public participation at official meetings of the District; Rule 2: Conduct of Informal, Non-Adjudicatory Public Hearings; Rule 3: Conduct of Formal Adjudicatory Hearings before the District; Rule 4: Rules and Regulations for the Enforcement of the Groundwater Management and Protection Act; Rule 5: Upper Big Blue Natural Resources District Control Area Rules and Regulations; Rule 6: NRD Park Regulations; Rule 7: Chemigation Rules and Regulations Supplemental to Title 195 of the Department of Environmental Quality; and Rule 8: Rules and Regulations for Implementing the Nebraska Erosion and Sediment Control Act.

Oswald made the motion (Motion #21) to set February 17, 1994 as the public hearing date for the readoption of rules 1, 2, 3, 4, 6, 7 and 8, and to direct staff to publish the proper legal notice. Seconded by Regier. Question called. Motion carried.
